# Cautionary note regarding forward-looking statements

*This presentation contains forward-looking statements, which are any statements or information that are not historical facts. These forward-looking statements include statements about our anticipated future revenue and expenses and our future plans and prospects.*

*Forward-looking statements involve inherent risks and uncertainties, and important factors could cause actual results to differ materially from those anticipated. For example, deterioration in general business and economic conditions or turbulence in domestic or global financial markets could adversely affect our revenues and the values of our assets and liabilities, reduce the availability of funding to us, lead to a tightening of credit, and increase stock price volatility. Our results could also be adversely affected by changes in interest rates; increases in unemployment rates; deterioration in the credit quality of our loan portfolios or in the value of the collateral securing those loans; deterioration in the value of our investment securities; legal and regulatory developments; changes in customer behavior and preferences; breaches in data security; and management's ability to effectively manage the multitude of risks facing our business. Key risk factors that could affect our future results are described in more detail in our Annual Report on Form 10-K for the year ended December 31, 2023 and the other reports we file with the SEC, including under the heading "Risk Factors." Investors should not place undue reliance on forward-looking statements as a prediction of our future results.*

*Any forward-looking statement speaks only as of the date on which it is made, and we undertake no obligation to update any forward-looking statement, whether as a result of new information, future events, or otherwise.*

<b>Net Interest Income</b>	\$172,500	\$172,700	\$174,000	\$173,300	\$171,500
<b>Change from Base</b>	-0.86%	-0.75%		-0.40%	-1.44%

Simulation analyses calculate the change in net interest income over the next twelve months, under immediate parallel shifts in interest rates, based upon a static statement of financial condition, which includes derivative instruments, and does not consider loan fees.

- The base case modeled NII is largely unchanged during the quarter as asset yield benefits from a shift in asset mix, a shift in loan mix and continued asset repricing was offset by liability repricing.
- The NII sensitivity profile is largely unchanged during the quarter for smaller rate changes of +/- 100 basis points. The exposure to larger rising rate scenarios decreased modestly. Asset sensitivity increased slightly while liability sensitivity declined. Additionally, NII exposure to larger rate declines is largely unchanged.
- **Base-rate** is a static balance sheet applying the spot yield curve from the valuation date.
- **Stable core funding base.** Transaction accounts fund 37.4% of assets and other non-maturity deposits fund another 18.9% of assets. Moderate wholesale funding of just 4.9% of assets.
- 34.3% of assets reprice in 1 month and 44.9% reprice in the next 12 months.
- Continually evaluating strategies to manage NII through hedging as well as product pricing and structure.

# Strong Non-interest Income

## 2Q'24 Non-interest Income

(thousands)

## Non-interest Income Trends

(\$M)

- The \$1.6 million comparative quarterly decrease in mortgage loan servicing, net is primarily attributed to changes in the fair value of capitalized mortgage loan servicing rights associated with changes in mortgage loan interest rates and expected future prepayment levels.

- Mortgage banking:**
  - \$1.3 million in net gains on mortgage loans in 2Q'24 vs. \$2.1 million in the year ago quarter. The decrease is primarily due to lower profit margins on mortgage loan sales and lower loan sales volume.
  - \$142.6 million in mortgage loan originations in 2Q'24 vs. \$160.5 million in 2Q'23 and \$94.0 million in 1Q'24.
  - 2Q'24 mortgage loan servicing includes a \$0.9 million (\$0.03 per diluted share, after tax) increase in fair value adjustment due to price compared to a increase of \$2.4 million (\$0.09 per diluted share, after tax) in the year ago quarter.

# Focus on Improved Efficiency

- 2Q'24 efficiency ratio of 61.5%.
- Compensation and employee benefits expense of \$21.3 million, an increase of \$0.6 million from the prior year quarter.
- \$0.7 million increase in performance-based compensation expense due to a higher expected payout level in 2024.
- Payroll taxes and employee benefits increased \$0.1 million primarily due to a higher healthcare related costs.
- Data processing costs increased by \$0.4 million primarily due to core data processor annual asset growth and CPI related cost increases as well as the purchase of a new lending solution software.
- Opportunities exist to gain additional efficiencies as we continue to optimize our delivery channels.

# Outlook for 2024

	<b>LENDING</b> Continued growth	<b>NET INTEREST INCOME</b> Growth driven primarily by higher average earning assets	<b>PROVISION FOR CREDIT LOSSES</b> Steady asset quality metrics
<b>Outlook for 2024</b> <small>*as of January, 2024</small>	<ul style="list-style-type: none"> <li>• IBCP forecast of mid-single digit (approximately 6%-8%) overall loan growth is based on increases in commercial loans and mortgage loans with installment loans remaining flat.
