CAPITAL IN A COVID-19 ENVIRONMENT

NASDAQ: PEBO

WE HAVE LOOKED AT OUR CAPITAL LEVELS UNDER DIFFERENT STRESSED SCENARIOS.

- The graph below is based on the following key stressed assumptions, related to bank capital:
 - No net income for the remainder of 2020 and 2021, dividend continues at \$0.35 per quarter, a measured approach on share repurchases, growth in loans from the premium finance acquisition (starting in July 2020) and runoff of the PPP loans in future periods.
- Capital is most constrained at the total risk based capital level at the bank
 - Assuming the scenario above, Peoples could withstand pre-tax losses of approximately \$100 million (in addition to stressed scenario) in 2020 and 2021, and still remain above well capitalized levels for all regulatory ratios at the bank level.
- We will continue to perform capital stress testing and will adjust capital levers (dividends and share repurchases) to maintain adequate capital during the crisis.

ACQUISITIONS

- Bank acquisitions completed in 2014 (3), 2015 (1), 2018 (1), and 2019 (1)
- Insurance acquisitions completed in 2014 (1), 2015 (1), 2017 (2), and **2020** (1)
- One investment acquisition was completed in 2016
- **One premium finance acquisition effective July 1, 2020**

CAPITAL PRIORITIES

- Organic growth
- Dividends
- Acquisition activities
- Share repurchases

DIVIDENDS

- Dividend paid increased from \$0.15 per share for Q1 2016 to \$0.35 in the most recent quarter
- Consistently evaluate dividend and adjust accordingly - annualized dividend yield at September 30, 2020 was 6.46%.

SHARE REPURCHASES

- Prudent repurchase of shares
- Repurchased shares in all four quarters of 2020

WE ARE WELL POSITIONED FROM A LIQUIDITY PERSPECTIVE

- We had a loan-to-deposit ratio of 88% at September 30, 2020, which enables us to be flexible and grow loans when it is prudent.
- We can leverage our investment securities to gain liquidity through sales or pledging.
- Our loans give us the ability to increase borrowing capacity by pledging loans to provide liquidity to meet the borrowing needs of our customers.
- As needed, we will utilize the Federal Reserve's program to pledge the SBA PPP loans as collateral for our borrowings.
- In the second quarter, we saw an increase in our deposits, as we experienced inflows from stimulus money to consumers, and the majority of PPP money was deposited within the bank.
 - We realize that these inflows will likely diminish over time and will remain focused on maintaining a high level of borrowing capacity at the Federal Reserve Bank, the FHLB of Cincinnati and other funding sources.
- Over the long run, we anticipate funding the premium finance portfolio through a combination of security liquidations and shorter term wholesale funding.

DEPOSIT FRANCHISE IN A COVID-19 ENVIRONMENT

PRE-PROVISION NET REVENUE

Pre-provision net revenue (PPNR) has become a key financial measure used by federal bank regulatory agencies when assessing the capital adequacy of financial institutions. PPNR is defined as net interest income plus total non-interest income (excluding all gains and losses) minus total non-interest expense and, therefore, excludes the provision for loan losses and all gains and/or losses included in earnings. As a result, PPNR represents the earnings capacity that can be either retained in order to build capital or used to absorb unexpected losses and preserve existing capital.

EFFICIENCY RATIO

The efficiency ratio is a key financial measure used to monitor performance. The efficiency ratio is calculated as total non-interest expense (less amortization of other intangible assets) as a percentage of fully tax-equivalent net interest income plus total non-interest income excluding all gains and all losses. This measure is non-US GAAP since it excludes amortization of other intangible assets, system upgrade revenue waived and all gains and/or losses included in earnings, and uses fully tax-equivalent net interest income. The efficiency ratio adjusted for non-core items is non-US GAAP since it excludes amortization of other intangible assets, non-core expenses and all gains and/or losses included in earnings, and uses fully tax-equivalent net interest income.

TANGIBLE EQUITY TO TANGIBLE ASSETS AND TANGIBLE BOOK VALUE PER SHARE

Peoples uses tangible capital measures to evaluate the adequacy of Peoples' stockholders' equity. Such ratios represent non-US GAAP financial measures since the calculation removes the impact of goodwill and other intangible assets acquired through acquisitions on both total stockholders' equity and total assets. Management believes this information is useful to investors since it facilitates the comparison of Peoples' operating performance, financial condition and trends to peers, especially those without a level of intangible assets similar to that of Peoples. The following table reconciles the calculation of these non-US GAAP financial measures to amounts reported in Peoples' consolidated financial statements.
