- 1. Summary of Business Results
- (1) Summary of Business Results for the Current Quarter

During the first current quarter period, the Japanese economy is considered to continue its moderate recovery trend, supported by a strong appetite for capital expenditures of companies, although the outlook of the Japanese economy is ridden by uncertainties such as recession overseas, increases in various prices, and exchange rate fluctuations.

Under this business environment, in our 9th Medium-term Business Plan that started in April 2023, we, the Amano Group set forth the management concept of "The 4th Stage Towards a 100-year Company-Initiatives for a Paradigm Shift Leading to Sustainable Management" in which we will promote DX in each business field and execute strategic investments in software-based assets, IoT, AI, etc., and further enhance our competitive advantage in terms of profitability. Furthermore, we will proactively work to solve social issues.

As a result, during the first quarter under review, net sales were \pmu39,032 million (up 22.6% year-on-year), operating profit was \pmu3,232 million (up 13.6% yoy), ordinary profit was \pmu3,642 million (up 15.6% yoy), and net income attributable to owners of the parent company was \pmu1,600 million (up 2.7% yoy).

(Main factors behind the business results)

- (i) At non-consolidated Amano, Parking Systems sales increased significantly due to factors such as compatibility with new banknotes, etc. In addition, Information Systems sales increased in both software and hardware due to vigorous investment by various companies, and Environmental Systems of largescale systems continued to grow, resulting positive overall sales.
 - On the other hand, Clean System sales decreased due to the absence of favorable performance in sales of cleaning robots compared with the previous fiscal year.
- (ii) In domestic group companies, the consigned parking lot management service business continued to grow, and the cloud service business for T&A sales decreased slightly due to the transfer of operations to Amano and other factors. The digital time stamp business continued to perform well.
- (iii) In overseas markets, sales increased in North America, Europe, and Asia, partly due to the effect of yen depreciation. In North America, Parking Systems sales continued to grow due to the effect of new products. In Europe, sales of Information Systems in France continued to grow by capturing customer needs. However, in North America and Europe, increased employees and rising labor costs put downward pressure on profits. In Asia, Parking Systems sales grew in South Korea and Hong Kong, and Environmental Systems sales grew in Thailand.

Notes on Accounting Procedures Specific to the Preparation of the Consolidated Quarterly Financial Statements Calculation of Tax expenses

These amounts of tax expenses are calculated by multiplying the pre-tax net income and loss by an estimated effective tax rate for the year, determined using reasonable methods for pre-tax income for the fiscal year including the first quarter after applying tax-effect accounting.

In cases where an estimated effective tax rate cannot be adopted, the amounts are calculated by multiplying the legal effective tax rate after adjusting significant differences that are not in the scope of temporary differences from pre-tax net income and loss.
