## **Completion of Disaster Recovery Work for SUGIYO Co. Ltd. Following the Noto Peninsula Earthquake**

Chiyoda Corporation (Chiyoda) is delighted to announce the completion of disaster recovery work for SUGIYO Co. Ltd (SUGIYO) following the Noto Peninsula Earthquake on January 1, 2024.

The disaster recovery work, completed on September 13, 2024, was to repair significant damage, such as collapsed ceilings and damaged pipelines, including underground pipes caused by ground subsidence, to SUGIYO's Hokuriku and Danchi factories and three other locations, which significantly slowed production.

In response to SUGIYO's desire to early recommence production as soon as reasonably practicable, Chiyoda conducted on-site investigations following the earthquake and commenced recovery work at the end of January, implementing measures for efficient resumption of operations. Collaboration with partner companies ensured that production recommenced at SUGIYO's two main factories as shown below and restoration activities of all affected factories are now complete:

1. Danchi Factory at Commercial Complex (Shirahamacho, Nanao City, Ishikawa Prefecture):  
Recommended Production: February 29, 2024
2. Hokuriku Factory (Nishimisakaicho, Nanao City, Ishikawa Prefecture):  
Recommended Production: May 31, 2024

Despite production shutdown, SUGIYO, as part of their social responsibility, expressed their intention to allocate some employee remuneration during the non-operational period, and a portion of post-restart sales revenue, as supporting funds. Thorough our disaster recovery endeavors, Chiyoda contributed to the efficient resumption of production and supported SUGIYO's economic activities.

As an integrated engineering company, Chiyoda will always respond, as a matter of urgency, to requests for such support from customers following natural disasters, thus contributing to the sustainable development of society.

Hokuriku Factory - Ceiling Collapse

Danchi Factory - Ground Subsidence
