

No Deforestation Commitment

OUR COMMITMENT

Oshkosh Corporation is committed to moving the world forward. As an industry leader in the purpose-built vehicle industry, we leverage every opportunity to develop technologies and solutions that support our purpose of making a difference in people's lives. We do this by living our core values: we put people first, we do the right thing, we persevere and we do the right thing. Oshkosh supports the preservation of our natural environment, specifically of forests which are critical to the wellbeing of the communities where we live and work.

Oshkosh Corporation strives to prevent deforestation throughout our business operations, during the purchase/procurement of raw materials, the distribution and sale of products as well as the collection and recycling of waste products.

As we implement our business strategy of "Innovate. Serve. Advance.", we'll strive to gain a comprehensive understanding of the potential consequences of deforestation throughout our value chain. We'll then seek to implement a strategy to limit or eliminate deforestation consistent with globally recognized standards and frameworks and business best practices.
