Mike Inglese, Aircastle's CEO, stated, "Global demand for passenger air travel is at an all-time high, with load factors close to operational limits. However, Boeing and Airbus forecast only minimal delivery improvements in the near term. These conditions have led to robust lease rates and steady demand for placements and extensions of the narrow-body aircraft that comprise most of our fleet. In the second fiscal quarter, we capitalized on this momentum by extending 22 leases, selling 10 aircraft, and achieving a net income of \$29 million."

Mr. Inglese concluded, "In the second half of our fiscal year, we look forward to expanding our fleet with a focus on new-technology aircraft. Despite the strong competition we're seeing among aircraft investors, we believe Aircastle has a competitive edge due to our outstanding team, ample liquidity, strong balance sheet as well as the outstanding support of our shareholders, Marubeni Corporation and Mizuho Leasing."

Aviation Assets

As of August 31, 2024, Aircastle owned 244 aircraft and other flight equipment having a net book value of \$7.1 billion. We also manage 9 aircraft with a net book value of \$265 million on behalf of our joint venture with Mizuho Leasing.

We define EBITDA as income (loss) from continuing operations before income taxes, interest expense, and depreciation and amortization. We use EBITDA to assess our consolidated financial and operating performance, and we believe this non-U.S. GAAP measure is helpful in identifying trends in our performance.

This measure provides an assessment of controllable expenses and affords management the ability to make decisions which are expected to facilitate meeting current financial goals, as well as achieving optimal financial performance. It provides an indicator for management to determine if adjustments to current spending decisions are needed.

EBITDA provides us with a measure of operating performance because it assists us in comparing our operating performance on a consistent basis as it removes the impact of our capital structure (primarily interest charges on our outstanding debt) and asset base (primarily depreciation and amortization) from our operating results. Accordingly, this metric measures our financial performance based on operational factors that management can impact in the short-term, namely the cost structure, or expenses, of the organization. EBITDA is one of the metrics used by senior management and the Board of Directors to review the consolidated financial performance of our business.

We define Adjusted EBITDA as EBITDA (as defined above) further adjusted to give effect to adjustments required in calculating covenant ratios and compliance as that term is defined in the indenture governing our senior unsecured notes. Adjusted EBITDA is a material component of these covenants.
