Operating and R&D Expenses (US\$M)

- Well-manage R&D investment & expense for customer engineering for strategic growth including WLO, CIS, TDDI, Auto, OLED, 3D sensing & WiseEye ultralow power AI image sensing. Anticipate full-year 2024 OPEX to decline mid-single digit, compared to last year
- Annual bonus expense includes share-based compensation and cash award from 2014 to 2023: \$11.1mn, \$6.2mn, \$10.2mn, \$6.9mn, \$4.1mn, \$0.4mn, \$5.4mn, \$31.0mn, \$47.3mn and \$31.4mn

EBITDA (US\$M)

- From end of 1Q22, market disruption of geopolitical conflict, China lockdown along with elevated inflation and rapidly rising interest rates, all led to our sales decline and inventory pile-up, resulting in GM contraction
- In 2021, 5G/HPC/AIoT/Auto demand and WHF demand derived from pandemic caused tight capacity shortage for mature process node and led to favorable pricing where GM is higher than those before 2019
- 2019 profit setbacks caused by lower GM due to adverse product mix change
- Robust profit growth in 2016 as a result of revenue growth and GM enhancement from new products
