Overview

Money and Credit

- Money supply expanded by \$241.7mn (5.4%) during the first quarter of 2024. This substantial increase was primarily due to a sharp rise in domestic banks' foreign assets and, to a lesser extent, upturns in credit to the Central Government (net) and private sector.
- The net foreign assets of the banking system increased by \$211.0mn (13.2%) to \$1,810.9mn. This growth was driven by a \$207.7mn (31.9%) increase in domestic banks' holdings to a record \$858.8mn, stemming from heightened tourism revenue and foreign direct investment inflows. Additionally, the Central Bank's holdings rose slightly by \$3.3mn to \$952.1mn.
- Net domestic credit of the banking system grew by \$53.0mn (1.5%) to \$3,663.4mn, with increased lending to the Central Government (\$40.4mn) and the private sector (\$14.8mn), as credit to the non-financial public sector decreased marginally.
- Lifted by the strong foreign asset expansion, domestic banks' holdings of excess liquid assets rose by \$74.5mn (10.0%) over the three months to \$818.6mn, which was 96.9% above the secondary reserve requirement. However, the upturn in domestic banks' purchase of Treasury securities caused aggregate excess cash holdings to decline by \$33.3mn (6.5%) to \$476.5mn, which was 182.2% above the primary (cash) reserve requirement.
- For the 12 months ending in March 2024, the weighted average interest rate on new loans rose by 44 basis points to 8.93%, with higher rates across all major loan categories. Meanwhile, the corresponding rate on new deposits declined by 30 basis points to 1.77% due to a reduction in time deposit rates. Consequently, the weighted average interest rate spread widened by 74 basis points to 7.17%.

Real Sector Developments

- In merchandise trade, domestic export earnings fell by \$17.3mn (20.5%) to \$67.0mn for the first quarter of 2024, with revenues declining across all major traditional commodities except for bananas and molasses. Simultaneously, heightened purchases of electricity generation equipment, motor fuels, pine lumber, and other manufactured goods drove the value of gross imports up by \$71.9mn (10.8%) to \$738.2mn.
- The tourism sector experienced a surge in activity, with stay-over visitors increasing by a staggering 28.4% to 169,822 visitors. Cruise ship disembarkations also rose significantly, increasing by 9.6% to 340,808 passengers. As a result, stay-over visitors surpassed pre-pandemic levels, and cruise ship disembarkations were not far behind.

- In March, the consumer price index (CPI) rose by 0.1% relative to the previous month and averaged a 3.8% increase for the quarter. Higher food prices and restaurant service costs primarily drove the latter.

Central Government Domestic and Public Sector External Debt

- For the 2023/2024 fiscal year (FY 2023/24), Central Government's operations recorded an overall deficit of \$136.0mn (2.2% of GDP), a significant increase compared to the \$32.4mn (0.6% of GDP) deficit recorded in the previous fiscal period. Notwithstanding, the Central Government still achieved a primary surplus of \$4.3mn (0.1% of GDP).
- For the first quarter of 2024, the total public sector debt stock grew by \$8.8mn (0.3%) to \$4,348.0mn (65.9% of GDP). This marginal increase was due to an \$8.8mn rise in the public sector's external debt to \$2,841.0mn (43.0% of GDP), while the Central Government's domestic debt was unchanged at \$1,507.9mn (22.8% of GDP).

1 Money and Credit

Money Supply

Money supply grew by \$241.7mn (5.4%) during the first quarter of 2024, outpacing the \$200.6mn (4.8%) expansion in the same period of 2023. This acceleration was fuelled by a sharp rise in domestic banks' foreign assets alongside modest increases in credit to the Central Government (net) and the private sector.

Net Foreign Assets

During the quarter, the net foreign assets of the domestic banking system increased by \$211.0mn (13.2%) to reach a new month-end high of \$1,810.9mn. This increase was mainly due to a \$207.7mn rise in domestic banks' holdings to a record \$858.8mn, driven mainly by higher tourism earnings and, to a lesser extent, increased foreign direct investment inflows. Meanwhile, the Central Bank's position strengthened by \$3.3mn (0.3%) to \$952.1mn, as inflows slightly exceeded outflows. Gross foreign currency inflows into the Central Bank totalled \$70.5mn, down 6.9% due to

decreases in international grants (\$9.8mn), other transfers (\$6.2mn), and sugar export receipts (\$1.7mn). However, the impact of these declines was partially offset by a 71.0% increase in loan disbursement receipts from external creditors to \$27.7mn. Conversely, gross foreign currency outflows from the Central Bank grew to \$67.9mn, up 40.9% due to a sharp rise in sales to the Central Government for servicing its external debt. Sales to the Central Government amounted to \$50.4mn, accounting for 74.2% of total gross foreign currency outflows. Additionally, \$13.2mn was sold to quasi-government institutions, and \$4.2mn was used to cover the Central Bank's overseas expenses. As a result, the gross international reserves rose by \$2.9mn to \$949.4mn, equivalent to 4.0 months of merchandise import coverage.

Net Domestic Credit

Net domestic credit from the banking system increased by \$53.0mn (1.5%) during the quarter to \$3,663.4mn. The marginal rise in credit was driven by heightened lending to

Chart 1.1: Change in Net Foreign Assets of the Banking System

Chart 1.2: Change in Net Domestic Credit of the Banking System

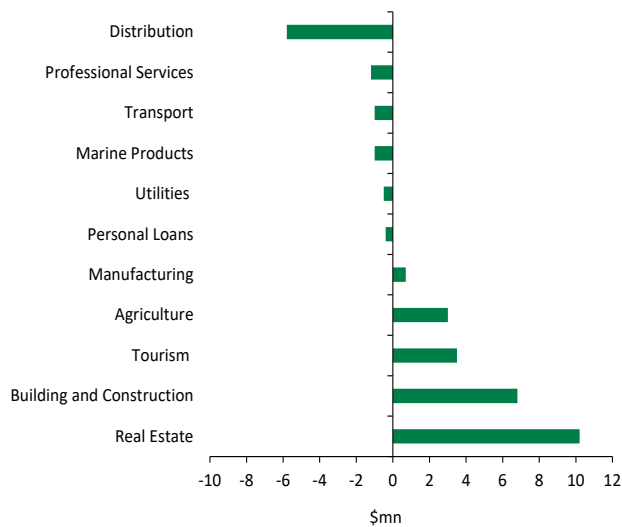

Chart 1.3: Change in Domestic Banks' Loans

the Central Government and private sector, as advances to other public sector entities declined.

The Central Government’s net borrowings grew by \$40.4mn to \$968.2mn, reflecting the impact of \$37.6mn in deposit withdrawals and a \$2.8mn increase in the banking sector’s Treasury bill holdings. Additionally, credit to the private sector rose by \$14.8mn to \$2,579.0mn, supported by increased lending for real estate (\$10.2mn), construction (\$6.8mn), tourism (\$3.5mn), and agricultural (\$3.0mn) activities, while loans for distribution purposes contracted by \$5.8mn. Write-offs of non-performing loans totalled \$4.3mn, \$1.8mn higher than the amount recorded for the same period a year ago. These write-offs were applied mainly against personal (\$2.3mn), construction (\$0.7mn), manufacturing (\$0.4mn), and distribution (\$0.3mn) loans.

Bank Liquidity

During the first quarter of 2024, domestic banks’ holdings of excess liquid assets grew

Chart 1.4: Excess Statutory Liquidity

by \$74.5mn (10.0%) to \$818.6mn, driven by the upsurge in their foreign asset holdings. At this level, excess reserves were 96.9% above the secondary reserve requirement. However, the recent surge in domestic banks’ acquisition of Treasury bills over the review period resulted in a \$33.3mn (6.5%) decrease in aggregate excess cash holdings to \$476.5mn. Despite the decline, excess cash holdings remained strong at 182.2% above the primary (cash) reserve requirement.

Interest Rates

The weighted average interest rate on new loans for the 12 months ending in March 2024 was 8.93%, eight basis points higher than the previous month. During the 12 months ending in March 2024, this weighted lending rate rose by 44 basis points, lifted by rate hikes across all four major loan categories. Mortgage rates experienced the sharpest increase, up 153 basis points. Furthermore, personal, commercial, and “other” loan lending rates rose by 42, 24, and eight basis points, respectively.

Chart 1.5: Weighted Average Interest Rates on New Loans and Deposits

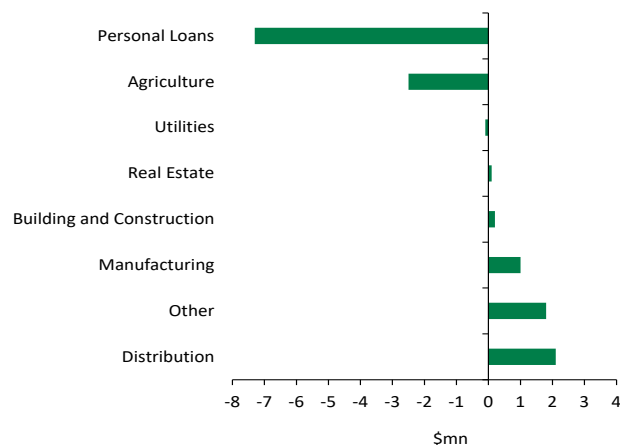

The corresponding rate on new deposits rose by three basis points during the month to 1.77%, softening the 12-month decline through March 2024 to 30 basis points. Over the 12 months, the reduction was due to an 18 basis-point drop in time deposit rates. Meanwhile, demand deposit rates remained unchanged, and savings/chequing and saving deposit rates rose by 12 and seven basis points, respectively, tempering the overall rate decline. As a result, the weighted average interest rate spread widened by 74 basis points to 7.17%.

Credit Union Lending

Between January and March, credit unions’ aggregate loan portfolio contracted by \$4.7mn (0.7%) to \$688.1mn after posting two consecutive month-on-month declines in February and March. This reduction was mainly due to decreases in outstanding personal (\$7.3mn) and agricultural (\$2.5mn) loan balances but was partially offset by increased lending for distribution (\$2.1mn) and manufacturing (\$1.0mn) activities.

Chart 1.6: Change in Credit Unions' Loans

Write-offs totalled \$1.9mn this quarter compared to \$2.5mn in the first three months of 2023. These write-offs were primarily applied to personal (\$1.4mn) and construction (\$0.2mn) loans.

2 Real Sector Developments

Commodity Production

The performance of the country's major export commodities varied for the first three months of 2024. Outturns of sugar, molasses, and bananas rose, while citrus juices and marine goods production fell.

Domestic Exports

For the first quarter of 2024, the value of domestic exports declined by 20.5% to \$67.0mn. This decline was mainly attributed to lower earnings from sugar, citrus juices, marine products, and "other" domestic exports, with the latter mostly including animal feed and orange oil. However, increased earnings from bananas and molasses partially mitigated the overall decline.

Gross Imports

Between January and March, the value of gross imports rose by \$71.9mn (10.8%) to \$738.2mn. The "Machinery and Transport

Equipment" subcategory skyrocketed to \$212.3mn, up \$76.5mn or 56.3% mainly due to the acquisition of an industrial generator and gas turbine for electricity generation. "Fuels, Lubricants, and Crude Materials" rose by \$11.9mn (9.4%) to \$137.5mn, attributed to higher purchases of motor fuels (kerosene, diesel, premium, and regular gasoline) and yellow-treated pine lumber. "Manufactured Goods and Other Manufactures" increased by \$4.1mn (2.9%) to \$145.8mn, driven by increased imports of metal structures, galvanised steel coils, tyres, and printed books. However, the overall import growth was partially offset by a \$13.0mn (14.6%) decline in the "Commercial Free Zone" subcategory, with reduced purchases of cigarettes, handbags, and fans. Additionally, "Designated Processing Areas" decreased by \$3.7mn (29.8%) to \$8.7mn due to a drop in steel drum and shrimp feed imports. Finally, "Oils, Fats and Chemicals" and "Food, Beverages and Tobacco" fell by \$3.4mn (4.6%) to \$70.5mn and \$0.2mn (0.2%) to \$87.0mn, respectively.

Tourist Arrivals

The number of stay-over visitors increased by 28.4% to 169,822 persons for the first quarter of 2024 compared to the same period in 2023. Arrivals by air contributed significantly to this outcome, rising by 31.4% year-on-year over the three months and accounting for 83.6% of total visitors. Compared to the first quarter of 2019, stay-over arrivals exceeded that mark by 16.3%.

Chart 2.1: Change in Gross Imports

Source: SIB

Chart 2.2: Tourist Arrivals

Sources: BTB, CBB, and Immigration and Nationality Department.

Cruise ship disembarkations grew more slowly, up 9.6% over the quarter to 340,808 passengers. A total of 140 ships made calls to Belize, with 91 anchoring at the Fort Street Cruise Port and 49 docking at Harvest Caye. However, cruise ship disembarkations still remained below pre-pandemic levels, attaining only 82.9% of the comparative outturn for the first quarter of 2019.

Consumer Price Index

In March, the CPI increased by just 0.1% compared to the previous month but

Chart 2.3: Average Year-on-Year Change in Consumer Price Index

averaged a relatively high 3.8% increase for the first quarter of 2024. The latter was driven mainly by rising food prices. The “*Food and Non-Alcoholic Beverages*” subindex rose by 6.4%, accounting for about two-fifths of the weighted change in the all-items index. Most food items recorded markups, with notable increases for vegetables, dairy products, sugar, and fresh fruits. The “*Restaurant and Accommodation Services*” subindex followed, recording a 12.1% increase, owing to higher prices for restaurant and café services. “*Housing, Water, Electricity, Gas, and Other Fuels*” rose by 2.3% due to increased home rental costs. The “*Furnishing, Household Equipment, and Routine Household Maintenance*” subindex grew by 4.5% due to increasing household cleaning and maintenance product prices. Meanwhile, the “*Personal Care, Social Protection, and Miscellaneous Goods and Services*” subindex expanded by 5.2%, attributed to increased costs for personal hygiene products. “*Recreation and Culture*” jumped 5.0% on account of higher costs of pet food, nightclub entrance, and rentals of chairs, tables, and event venues. However, the “*Information and Communication*” and “*Transport*” subindices declined by 1.5% and 0.9%, respectively, due to a drop in prices for internet services and motor vehicle fuels, respectively.

Sugarcane and Sugar

For the 2023/2024 crop year to date (December 2023-March 2024), sugarcane deliveries rose by 4.2% to 883,394 long tons. This increase was due to a strong rebound in the western region. Production in the north

was hampered by unfavourable weather. Sugar production rose by a narrower margin of 0.3% to 77,307 long tons, slowed by declines in both quantity and quality of cane deliveries in the northern region, particularly early in the harvest season.

An analysis by region revealed that sugarcane deliveries in the north decreased by 8.4% to 515,014 long tons, leading to an 11.2% reduction in sugar production to 50,123 long tons. Consequently, the long-tons cane to long-ton sugar (TC/TS) ratio worsened marginally from 10.0 to 10.3. In addition, molasses output fell by 11.3% to 16,112 long tons.

Conversely, sugarcane deliveries in the western region increased by 29.2% to 368,380 long tons. As a result, sugar production grew by 31.7% to 27,184 long tons, causing the TC/TS ratio to improve slightly from 13.8 to 13.6. Furthermore, molasses output rose by 24.0% to 12,023 long tons.

For the first quarter of 2024, sugar exports

plummeted by 73.0% to 5,304 long tons. The low export volume was due to the absence of large bulk sugar shipments. Only bagged sugar, which carried a premium, has been shipped to date. Consequently, sugar export earnings dropped by 62.2% to \$8.9mn. The disproportionate revenue decline was due to substantial double-digit price increases in the CARICOM (23.1%) and European (34.0%) markets. Europe remained the primary destination for sugar exports, accounting for 65.4% (3,468 long tons) of the total, valued at \$5.4mn. The remaining 34.6% or 1,835 long tons was sold to CARICOM (1,796 long tons) and “other” destinations (39 long tons), generating \$3.5mn in receipts combined. Molasses exports grew by 51.1% to 11,912 long tons, earning \$5.4mn.

Citrus

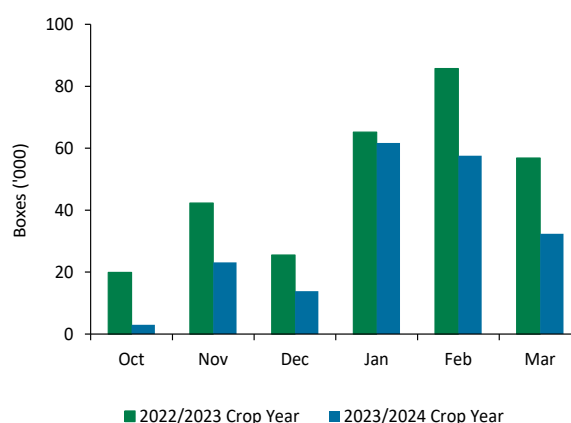

For the 2023/2024 crop year to date (October 2023–March 2024), citrus deliveries contracted by 35.2% to a mere 191,533 boxes, decimated by the citrus greening disease. When disaggregated, orange and grapefruit deliveries decreased by 32.5% to

Chart 2.4: Sugar Exports

Sources: BSI and Santander Group

Chart 2.5: Citrus Deliveries

Source: CPBL

157,808 boxes and 45.2% to 33,725 boxes, respectively.

Total citrus juice production declined by 32.4% to 0.9mn pound solids (ps), with a 4.2% improvement in average juice yield. Orange and grapefruit juice production decreased by 29.9% to 0.8mn ps and 44.5% to 0.1mn ps, respectively. Meanwhile, the outturn of citrus by-products, specifically citrus oil and pulp, remained minimal.

Citrus juice exports nosedived, falling by 86.4% in volume to 0.2mn ps and 78.8% in revenue to \$1.2mn. The export mix consisted of mostly concentrates, of which all concentrates went to CARICOM. Orange and grapefruit concentrate sales amounted to approximately 0.1mn ps each, valued at \$0.4mn and \$0.7mn, respectively. Not-from-concentrate sales were small, amounting to less than \$0.1mn. No citrus juices were sold to the United States or Europe.

Banana

Banana production more than doubled to 19,382 metric tons for the first three months of the year, reflecting a solid rebound from the Black Sigatoka disease under favourable weather conditions. In tandem, banana receipts jumped 98.8% to \$19.7mn.

Marine Exports

The volume of marine goods exported between January and March declined by 31.4% to 0.4mn pounds, owing to decreases in lobster, farmed shrimp, and conch production. Lower market prices for these commodities also caused marine export earnings to drop by a steeper 38.7% to

Chart 2.6: Citrus Juice Exports

Source: CPBL

Chart 2.7: Banana Exports

Source: BGA

Chart 2.8: Marine Export Volume

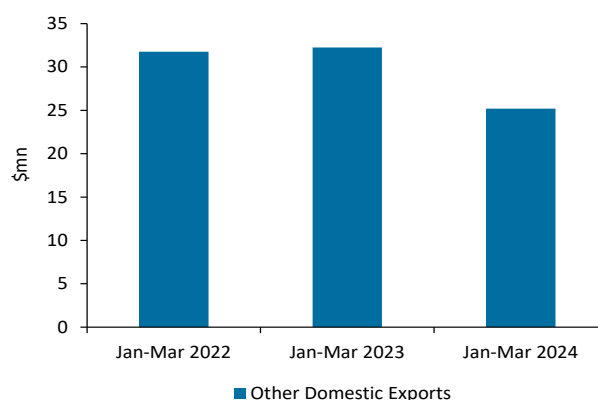

Sources: SIB and CBB

\$6.5mn. Specifically, lobster revenue fell by 46.6% to \$3.0mn after a 32.0% contraction in export volume to 0.1mn pounds. Farmed shrimp receipts plunged by 69.8% to \$0.3mn, following a 59.1% reduction in export volume to 0.1mn pounds. Meanwhile, conch earnings contracted by 21.6% to \$3.2mn, with a 15.4% decline in export volume to 0.2mn pounds.

Other Domestic Exports

Other domestic exports decreased by 21.9% for the three-month period to \$25.2mn. Reduced earnings from animal feed (\$11.3mn), orange oil (\$0.7mn), petroleum (\$0.3mn), sorghum (\$0.3mn), and black-eyed peas (\$0.2mn) contributed to the overall downturn. However, increased revenues from crude soybean oil (\$1.1mn), red-kidney beans (\$0.7mn), pepper sauce (\$0.7mn), rum (\$0.5mn), and pineapple (\$0.4mn) moderated the overall decline.

Chart 2.9: Other Domestic Exports

Source: SIB

3 Central Government Operations and Public Debt

For FY 2023/24, Central Government’s operations recorded an overall deficit of \$136.0mn (2.2% of GDP), which was \$103.6mn higher than the previous period. However, Central Government still achieved a primary surplus of \$4.3mn (0.1% of GDP), which was \$65.1mn lower than the surplus recorded in FY 2022/23. The fiscal surplus narrowed as revenue growth faced headwinds from the slowdown in economic activities and the winding down of grant-funded capital projects. At the same time, spending pressures mounted as external debt service costs rose, public officers’ emoluments were fully restored, and additional outstanding arbitral awards were settled with the acquisition of the Belize City Port. Notably, payment for the Belize City Port was recorded below the line and financed from the issuance of Treasury securities.

Total revenue and grants grew by 7.2% (\$96.3mn) to \$1,441.2mn, surpassing the budgeted amount by 2.3%. This increase was driven primarily by increased tax collections, while non-tax revenue and grants declined. Tax revenues amounted to \$1,339.7mn, 10.2% higher than the previous period. The strong growth in tax revenue was primarily due to increased collections of “*Taxes on Goods and Services*,” which accounted for 86.2% of the total increase in tax collections. Within this category, excise duties increased by the largest margin (\$55.5mn), followed by general sales tax (\$33.3mn) and stamp duties (\$13.7mn). The bump in excise duties reflected the normalisation of receipts after

Chart 3.1: Central Government Operations

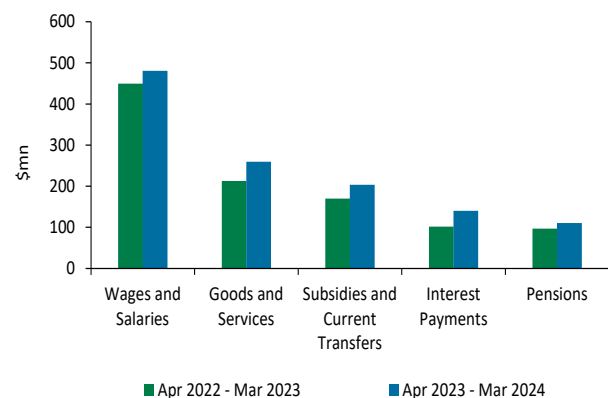

Source: MOF

Chart 3.2: Major Categories of Current Revenue

Source: MOF

Chart 3.3: Major Categories of Current Expenditure

Source: MOF

the temporary tax cuts on fuels, which aimed to temper inflationary pressures, ended in 2022. Additionally, revenues captured under “*International Trade and Transactions*” rose by \$10.0mn because of higher collections of import duties and environmental taxes. Furthermore, “*Income and Profits*” grew by \$8.8mn due to increases in income and business taxes. Meanwhile, non-tax revenue collections fell by \$17.7mn to \$77.2mn, mainly owing to lower income transfers from quasi-institutions, while grants dipped by \$9.2mn to \$18.8mn, with the winding down of grant-funded projects.

Total expenditure grew by \$199.9mn to \$1,577.2mn, driven by upturns in current spending and, to a lesser extent, capital spending. Outlays on goods and services posted the largest upsurge of all the recurrent subcategories, rising by \$46.4mn due to increased spending on food, training, medical supplies, and travel. Interest costs grew by \$38.5mn, owing to rising global interest rates on the Government’s variable interest loans with external creditors. Current transfers increased by \$33.6mn due to a one-off judgment award payment under the Port Acquisition and Settlement Deeds Bill. Meanwhile, spending on personal emoluments increased by \$31.2mn, reflecting the base effect from the restoration of public officers’ emoluments and allowances in July 2022 and increments in April 2023.

Furthermore, capital expenditure and net lending grew by \$36.4mn to \$383.2mn. Outlays on locally funded projects increased by 19.1% or \$49.4mn, while spending on

externally funded projects fell by 15.0% or \$13.2mn. Spending on infrastructural projects accounted for the largest share of total capital outlays (36.8%). Other significant spending shares were allocated to general public services (21.4%), economic sectors (12.8%), environmental protection and land management (8.9%), and health (7.9%).

Central Government Domestic Debt

The Central Government's outstanding domestic debt remained unchanged at \$1,507.9mn (22.8% of GDP) during the first quarter of 2024 relative to December 2023.

However, there were changes in the composition of the Central Government's domestic debt due to the outcomes of several rollover auctions. Specifically, the Central Bank’s holdings of Treasury bills (T-bills) decreased by \$51.5mn to \$167.3mn, while the domestic banks increased their

Chart 3.4: Major Categories of Development Expenditure

Source: MOF

holdings by \$51.0mn to \$158.0mn. Other non-bank entities also acquired \$0.5mn in T-bills, raising their holdings to \$9.7mn. Additionally, the Central Bank acquired \$2.4mn in Treasury notes (T-notes) from an institutional entity on the secondary market. There were no new borrowings or amortisation payments during the quarter.

Central Government’s interest payments for the quarter amounted to \$8.8mn. The Central Bank received the largest portion of \$4.9mn, followed by non-bank entities with \$2.8mn, then domestic banks with \$1.0mn on their portfolio of Treasury securities.

The Central Bank remained Central Government’s largest creditor, holding 48.7% of the total outstanding domestic debt at the end of the quarter after a 3.3 percentage-point drop during the period. Domestic banks’ portion rose by 3.4 percentage points to 32.3%, while non-bank entities’ share dipped by 0.1 percentage points to 19.0%.

Public Sector External Debt

During the first three months of the year, the public sector external debt increased by \$8.8mn (0.3%) to \$2,840.5mn (43.0% of GDP) as loan disbursements exceeded amortisation payments. The Central Government was responsible for 90.7% of the outstanding debt, while the financial and non-financial public sectors held 7.2% and 2.1%, respectively.

Total loan disbursements amounted to \$30.8mn, with Central Government receiving \$18.9mn (61.3%) and the

Chart 3.5: Distribution of Central Government's Domestic Debt

financial public sector obtaining \$11.9mn (38.7%). Central Government got new disbursements from both multilateral (\$18.0mn) and bilateral (\$0.9mn) creditors. Multilateral lenders included the Central American Bank for Economic Integration (\$8.4mn) and the Caribbean Development Bank (\$5.7mn) for various development projects. The capital projects comprised the Integral Security Programme (\$8.4mn) and the Philip Goldson Highway and Remate Bypass Upgrading Project (\$5.2mn)

Chart 3.6: Distribution of Interest Payments on Central Government's Domestic Debt

Chart 3.7: External Disbursements to Central Government by Creditor Type

Disbursements to the financial public sector summed to \$11.9mn, all of which went to the Development Finance Corporation. The loan proceeds supported education and employment initiatives, and women engaged in micro, small, and medium enterprises.

Principal repayments in this quarter totalled \$20.4mn. Central Government repaid \$16.0mn on its outstanding debt, with \$8.4mn allotted to bilateral partners and \$7.7mn to multilateral creditors. Meanwhile, the public non-financial and

financial sectors repaid \$3.3mn and \$1.1mn on their debt obligations, respectively.

Interest and other payments amounted to \$17.3mn. Central Government’s interest expenses summed to \$14.8mn, representing 86.0% of the total. Most of the interest payments went to bilateral partners (\$8.6mn), followed by multilateral partners (\$6.2mn). The public financial and non-financial sectors also paid \$1.3mn and \$1.1mn, respectively, to their creditors.

⁽¹⁾ Caribbean Court of Justice award in November 2017 against the Government of Belize in favour of Belize Bank relating to the loan guarantee. Since the first quarter of 2018, the Belize Bank has been offsetting its business tax against the Universal Health Services (UHS) debt. At March-end 2024, the Belize Bank set-off approximately \$84.6mn in taxes against the debt, split between principal payments (\$58.2mn) and interest payments (\$26.4mn).

⁽²⁾ Government has outstanding loan with Social Security Board for Hopeville Housing Project.
