

Rackspace Technology Certified as a Most Loved Workplace

June 14, 2022

Most Loved Workplaces employees are happiest and most satisfied at work

SAN ANTONIO, June 14, 2022 (GLOBE NEWSWIRE) -- [Rackspace Technology](#)® (NASDAQ: RXT), a leading end-to-end, multicloud technology solutions company, today announced has become certified as a Most Loved Workplace®, backed by Best Practice Institute (BPI) research and analysis. Most Loved Workplace® validation provides the most comprehensive look at workplace sentiment for organizations today.

Rackspace Technology has been certified as a certified Most Loved Workplace® because of its commitment to fostering a workplace where employees develop and sharpen their skills, grow in their careers, and feel valued for their expertise, innovative ideas, and a shared approach to solving customer problems.

Most Loved Workplaces® certify companies where employees are the happiest and most satisfied at work. Rackspace Technology became certified as a Most Loved Workplace based on its scores on the Love of Workplace Index™, which surveyed employees on various elements around employee satisfaction and sentiment, including the level of respect, collaboration, support, and sense of belonging they feel inside the Company.

"I started Most Loved Workplaces out of inspiration from my community of people who consciously place love for their employees at the center of their business model," said Louis Carter, the founder, and CEO of BPI and a social/organizational psychologist, thought leader, entrepreneur, and author. Carter's book, "In Great Company: How to Spark Peak Performance by Creating an Emotionally Connected Workplace," identifies the specific areas needed to become a highly respected, reputable organization where people love to work with each other – a Most Loved Workplace.

In its original research that created MLW criteria, Backed by BPI, Most Loved Workplaces surveyed more than 175 companies and more than 3,000 executives across the United States, the Middle East/Northern Africa, and Southeast Asia. They found that productivity rises as employee sentiment increases, with 94 percent of responders saying they did three to four times more work for a company they loved and 95 percent saying they stayed at companies they loved three to four times longer. Most Loved Workplaces certification is the most valid method to determine employee experience and recognize a great workplace.
