**STRATEGIC REPORT
FOR THE YEAR ENDED 31 DECEMBER 2023**

The directors present their Strategic Report for Merrill Lynch International ("MLI", the "Company") for the year ended 31 December 2023.

NATURE OF BUSINESS ACTIVITIES

The principal activities of the Company are to provide a wide range of financial services globally for business originated in Europe, the Middle East and Africa ("EMEA"), Asia Pacific ("APAC") and the Americas, to act as a broker and dealer in financial instruments and to provide corporate financial services. The Company also provides a number of post trade related services to third party clients, including settlement and clearing services.

On 01 November 2023, the Company's immediate parent, ML UK Capital Holdings Limited ("MLUKCH"), distributed all of its holdings in the Company to MLUKCH's shareholders, BofAML EMEA Holdings 2 Limited and BofAML Jersey Holdings Limited (together, the Jersey Intermediate Holding Companies, or "Jersey IHCs"), and the Jersey IHCs became the shareholders of MLI. At the same time, the Jersey IHCs contributed MLUKCH to become a fully owned subsidiary of MLI.

The ultimate parent of the Company is Bank of America Corporation (NYSE: BAC) ("BAC" or the "Corporation"). The Company is BAC's largest entity outside the United States ("US") and helps serve the core financial needs of global corporations and institutional investors. Hereafter, "affiliate" means BAC or any of its subsidiaries. BAC together with its consolidated subsidiaries, form the "BAC Group" (or "Enterprise").

The Company's head office is in the United Kingdom ("UK") with branches in Dubai and Qatar, along with a representative office in Zurich.

The Company is authorised and regulated by the Prudential Regulation Authority ("PRA") and regulated by the Financial Conduct Authority ("FCA").

As at 31 December 2023, the Company was rated by Fitch (AA/F1+) (2022: AA/F1+) and Standard & Poor's (A+/A-1) (2022: A+/A-1).

MARKET ENVIRONMENT

Geopolitical and macroeconomic factors

The 2023 market environment was characterised by turbulence in the banking system, as bank failures early in the year caused stress through the banking system that significantly impacted asset prices and volatility. The situation drove investor caution, and 2023 saw record annual inflows into money market funds and Treasuries.

2023 was also dominated by the direction of interest rates, as central banks hiked policy rates in an effort to reduce inflation. Data from BAC Research shows that the sharp increase in inflation in the Eurozone/ European Economic Area and UK started to stabilise towards the end of the year, but remained above central bank targets. Looking ahead to 2024, market expectations are that inflation will reduce and central banks will start cutting rates.

From a macroeconomic standpoint, the main global economic blocks gradually began to decouple, both in terms of growth and inflation. There was a divergence in outlook as the US economy remained strong, growth in Europe stagnated, and weak growth in China proved to be a key concern for investors and corporates.

Geopolitical risk continued to rise in 2023, driven by the continued conflict between Russia and Ukraine, tensions between China and Hong Kong/Taiwan, and relations between the US and China. Additionally, instability in the Middle East, instigated by the conflict between Israel and Hamas, continues to develop and has the potential to broaden in scope.

The macroeconomic and geopolitical environment has suppressed deal activity in primary markets, where full year Investment Banking ("IBK") market fees ended the year at the lowest in over a decade. In EMEA markets, Mergers & Acquisitions ("M&A") activity was down, and the year ended with the lowest announced

**STRATEGIC REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

MARKET ENVIRONMENT (continued)

Geopolitical and macroeconomic factors (continued)

M&A volumes since 2009. However, there were signs of reopening in capital markets – EMEA equity and debt capital markets volumes were up versus the prior year, but still remained below historical levels.

In secondary markets, though global equity market capitalisation rebounded after a sharp decline in 2022, trading volumes and volatility were down. In Fixed Income, rising yields revived debt-sustainability concerns in the Eurozone. Widening deficits and debt-servicing costs gained attention more broadly and will likely remain a theme looking ahead.

The Company's branches in Dubai and Qatar do not trigger specific geopolitical considerations for that region due to the immaterial size of those branches to the Company's operations.

The Company is subject to numerous geopolitical, economic, and other risks in the jurisdictions in which it operates. The Company does business throughout the world including emerging markets. Economic or geopolitical stress in one or more countries could have a negative global impact, resulting in reduced market activity and economic output. The Company's businesses and revenue are also at risk of losses from multiple factors: currency fluctuations, financial, social or judicial instability, electoral outcomes, changes in governmental policies or policies of central banks, price controls, high inflation, protectionist trade policies, continued trade tensions and changes in legislation. The businesses and revenue of the Company are also at risk of losses as tariffs continue to rise and other restrictive actions are taken that weigh heavily on regional trade volumes and domestic demand through falling business sentiment and lower consumer confidence. These risks are especially elevated in the emerging markets.

LIBOR and Other Benchmark Rates

Immediately after 30 June 2023, the remaining U.S. dollar London Interbank Offered Rate ("LIBOR") settings (i.e., overnight, one-month, three-month, six-month and twelve-month) ceased or became non-representative (LIBOR Cessation), although the Financial Conduct Authority ("FCA") is requiring LIBOR's administrator, ICE Benchmark Administration Limited, to continue publication of the one-month, three-month and six-month USD LIBOR settings on a "synthetic" basis (calculated using the relevant CME Term Secured Overnight Financing Rate ("SOFR") Reference Rate plus the respective International Swaps and Derivatives Association fixed spread adjustment) for use in legacy contracts, which the FCA intends to continue to publish until 30 September 2024. Additionally, certain central counterparties completed processes to convert outstanding USD LIBOR-cleared derivatives to alternative reference rates ("ARR").

In connection with LIBOR Cessation, the Company has substantially completed the transition process for its products and contracts referencing USD LIBOR to ARRs. For the remaining products and contracts that have temporarily transitioned to synthetic USD LIBOR, the Company expects to transition these exposures to ARRs.

On 20 December 2022, Banco de Mexico announced its plan for the transition of Tasa de Interés Interbancario de Equilibrio ("TIIE") with tenors greater than one business day to the overnight TIIE Funding Rate ("TIIE de Fondo"). This was approved by the Board of Governors of Banco de Mexico on 31 March 2023 and was subsequently published in the Official Journal of the Federation on 13 April 2023.

In October 2023, the Steering Committee of the National Working Group for Benchmark Reform in Poland postponed the cessation of Warsaw Interbank Offered/Bid Rate ("WIBOR"/"WIBID") benchmarks to the end of 2027.

For further information on the status of the Company's IBOR transition, see note 35 Interest Rate Benchmark Reform.

**STRATEGIC REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

SECTION 172 (1) STATEMENT

The Board of Directors of the Company (the "Board") acts and takes decisions in accordance with their statutory duties under Section 172 of the Companies Act 2006 (the "Act").

The following, as well as relevant information provided in the "Statement on Corporate Governance" in the Directors' Report, details the way in which the Board has regard to the matters set out in Section 172 (1) (a) to (f) of the Act in overseeing and promoting the success of the Company.

As required by relevant corporate law, financial regulation and internal governing policies and procedures, the Board is responsible for defining, overseeing, making decisions where relevant and being accountable for the implementation of the Company's governance arrangements to ensure effective, prudent and ethical management and oversight of the Company.

As a wholly-owned subsidiary of BAC, the interests of the Company are substantially aligned with those of BAC and during the year the Board considered and adopted relevant BAC level (also "BAC Group" or "Enterprise") policies and standards, including the BAC Risk Framework.

Further, the Company's staff are subject to relevant conduct of business policies specific to the Lines of Business ("LOBs") and Control Functions ("CFs") where they are employed as well as the regulatory UK Senior Managers and Certification Regime ("SMCR") and Conduct Rules.

The Board sets operational resilience and overall risk appetite for MLI and has delegated authority for the day-to-day management of MLI and key business decisions to appropriate Senior Management, in accordance with the MLI Corporate Governance Guidelines and the SMCR.

The Board and its Committees monitor and receive regular reporting on and oversee financial performance including ensuring that capital and liquidity are appropriately managed; risk management; regulatory compliance; employee matters including remuneration; inter-affiliate and vendor outsourcing and business conduct. They also ensure that MLI's organisational structure and internal control framework remain effective, while considering the interests of key stakeholders, including the Company's shareholders.

The "Statement on Corporate Governance", "Employee Engagement" and "Stakeholder Engagement" sections of the Directors' Report on pages 12 - 18 provide further information on the manner in which the Board has had regard to the matters set out in Section 172 (1) (a) to (f) of the Act.

During 2023, in addition to the above, the Board and its Committees have overseen and received regular reporting from LOB, CF and other support representatives on matters which could have an adverse impact to the Company.

PRINCIPAL RISKS AND UNCERTAINTIES

The Company's risk management objectives and policies, as well as exposures in relation to the seven key risk types (market, credit, compliance, operational, liquidity, reputational and strategic risks), are described in the notes to the financial statements.

For details of the Company's risk management policies see note 31 Risk Management.

RISK GOVERNANCE

The Board ensures suitable risk management and controls through its Committees. The Company has its own Board Risk Committee ("BRC"), Management Risk Committee ("MRC"), Audit Committee, and Governance Committee as outlined below.

The BRC assists the Board in fulfilling its responsibility for reviewing all Company-wide risk-creating activities and ensuring that they are restricted to those activities that can be prudently managed.

**STRATEGIC REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

RISK GOVERNANCE (continued)

The MRC reports to the BRC and is appointed by the Board. The MRC is responsible for providing management oversight of key risks facing the Company, including strategic, credit, market, liquidity, operational, compliance and reputational risks, in addition to balance sheet, capital, and liquidity management and stress testing activities.

The Audit Committee assists the Board in fulfilling its oversight responsibility relating to the following areas: oversight of the Company's internal financial controls; the preparation and integrity of the Company's financial statements and other related disclosure matters; and the performance and independence of the Company's Internal Audit and Compliance functions. The Audit Committee also assists with oversight of the qualifications, independence and performance of the independent auditors as well as the Company's relationship with them, and the scope and terms of the audit engagement.

The Governance Committee assists the Board in fulfilling its oversight responsibility relating to the governance of the Board, including nominations to the Board, as well as reviewing and reporting to the Board on matters of corporate governance principles applicable to the Company and on senior management talent planning and succession including leading the Board and its committees in their assessments of their performance. The Governance Committee reviews reports on the operation and effectiveness of the Company's systems and controls in relation to whistleblowing, and regular reports from the Conduct Risk Council. The Governance Committee is also charged with the oversight, development and implementation of the firm's remuneration policies and practices. This committee also acts as the Nomination Committee and the Remuneration Committee of the Company.

NON-FINANCIAL AND SUSTAINABILITY INFORMATION STATEMENT

BAC Group's Environmental and Social Risk Policy Framework ("ESRPF") aligns with the Company's Risk Framework and provides additional clarity and transparency regarding the Company's approach to environmental and social risks, inclusive of climate-related financial risk ("climate risk") and each employee's responsibilities for risk management. Like all risks, environmental and social risks require coordinated governance, clearly defined roles and responsibilities, and well-developed processes to ensure they are identified, measured, monitored and managed appropriately and in a timely manner. Recognising that certain sectors are more sensitive to these types of risk, the Company evaluates the associated risks as appropriate.

Further information about BAC Group's approach to sustainability matters can be accessed via the ESRPF at www.bankofamerica.com/ESRPF, Bank of America's Task Force on Climate-related Financial Disclosures Report (the "TCFD Report") available at www.bankofamerica.com/TCFD, and Bank of America's Annual Report available at investor.bankofamerica.com/annual-reports-and-proxy-statements.

Set out below is a summary of the Company's approach to management of climate risk.

Climate risk is the risk that climate change or actions taken to mitigate climate change expose the Company to economic, operational or reputational harm. Climate-related risks are divided into two major categories, both of which span across the seven key risk types:

- **Physical Risk:** Risks related to the physical impacts of climate change, driven by extreme weather events such as hurricanes and floods, as well as chronic longer-term shifts such as rising average global temperatures and sea levels, and
- **Transition Risk:** Risks related to the transition to a low-carbon economy, which may entail extensive policy, legal, technology and market changes.

Physical risks of climate change, such as more frequent and severe extreme weather events, can increase the Company's risks, including credit risk by diminishing counterparties' repayment capacity or collateral values, and operational risk by negatively impacting the Company's facilities, employees, or vendors.

**STRATEGIC REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

NON-FINANCIAL AND SUSTAINABILITY INFORMATION STATEMENT (continued)

Transition risks of climate change may amplify credit risks through the financial impacts of changes in policy, technology or the market on the Company or its counterparties. Unanticipated market changes can lead to sudden price adjustments and give rise to heightened market risk. Reputational risk can arise for the Company, if BAC does not meet its climate-related commitments and/or goals, or is perceived to be inadequately responsive to climate change.

No material climate-related risk variables impacting the financial position of the Company as at 31 December 2023 have been identified. For financial instruments held at fair value, there have not been any adjustments to fair value specifically for climate risks. For financial assets held at amortised cost, there has been no material impact of climate risks on the Company's loss allowances for expected credit losses.

The following sections provide more details on climate strategy, governance, and risk management.

Climate Strategy

The Company, as part of BAC, is aligned to BAC's strategy. The tenets of Responsible Growth serve as the foundation for BAC's performance and progress. BAC adopted Responsible Growth in 2014 and has disclosed BAC's progress on its core tenets in BAC's Annual Report to shareholders ever since. In keeping with these core tenets, it is BAC's responsibility to guide BAC's clients through times of economic stability and times of stress.

In 2021, BAC committed to achieving Net Zero before 2050 in our financing activities, operations and supply chain (Net Zero goal), and in 2022, BAC released BAC's Approach to Zero™, a framework for how BAC will achieve its Net Zero goal. In line with this approach, BAC has set and will continue to set interim 2030 targets across BAC's financing activities (2030 Financing Activity Targets), operations and supply chain, all of which are further supported and complemented by BAC's \$1.5 trillion by 2030 sustainable finance goal.

Further details on the strategy including BAC's commitment to achieving Net Zero before 2050 can be found in BAC's TCFD Report. The report also provides details on BAC's opportunities to mobilise and deploy capital through its 2030 \$1.5 trillion sustainable finance goal (including \$1 trillion to accelerate the transition towards a low-carbon economy), how global teams manage opportunities, and its delivery towards that goal through its Lines of Business. The climate strategy and opportunities are managed at an Enterprise level with MLI contributing to these goals rather than setting its own. The Company's approach to managing climate-related risks is detailed within the "Climate Risk Management" section below.

Climate Governance

The Company has adopted the BAC Risk Framework which establishes clear ownership and accountability for managing risk across the three lines of defence (i.e., LOBs, independent risk management and Internal Audit). Building off BAC's Risk Framework, an internal BAC Climate Risk Framework was created in 2023. The BAC Climate Risk Framework addresses how climate risk is identified, measured, monitored and controlled, and includes examples of how climate risk manifests across different risk types, as well as detailing the roles and responsibilities for climate risk management across the aforementioned three lines of defence. It is expected that the Climate Risk Framework will evolve over time as best practices in climate risk management continue to mature.

BAC manages its climate strategy through the BAC Board and its management committees as well as through sustainability-related strategic, risk and regulatory governance routines which operate in each region: US, EMEA, Latin America and APAC.

The Company participates in an EMEA regional strategic council covering sustainability matters. The objective of the forum is to provide strategic oversight, capitalising on business opportunities by bringing senior leaders together while driving long-term responsible and sustainable growth.

The EMEA Sustainability Risk and Regulatory Steering Group ("Steering Group") is a regional governance group responsible for providing management oversight of activities related to the financial risks from climate change and sustainability-related regulatory requirements impacting BAC's EMEA legal entities, including the

**STRATEGIC REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

Climate Governance (continued)

Company. The Steering Group is attended by senior leaders from across the EMEA region. The Steering Group meets at least quarterly and is co-chaired by the Chief Risk Officer of the Company.

The Company Board's responsibilities include consideration of climate risks and opportunities. The Board and the committees that report to it regularly discuss climate-related topics. For example:

- The Board receives periodic presentations from management on the Company's climate-related strategy, activities and opportunities.
- BRC oversees climate risk. The Company BRC receives a quarterly climate risk report as well as briefings on the topic of climate risk.

Key topics covered by the Board or its committees during 2023 included updates on progress against climate-related strategy, business updates, climate metrics, climate scenario analysis, a framework to avoid actual or perceived misrepresentation of the climate-related benefits of products and services, the regulatory landscape and the continued enhancement to and evolution of climate risk management.

Supporting the Board in its oversight of climate-related strategy and activities are management-level routines comprised of senior leaders across LOBs and CFs. Among these, the MLI MRC is responsible for providing management review and assessment of exposure to climate risk and overseeing the approach and processes implemented to manage climate risk. The MLI MRC receives updates on the progress being made to further embed climate into the risk management framework and to meet regulatory expectations. To support the Board and committees in overseeing the management of climate risk, MLI developed and continues to enhance reporting capabilities, including regular reporting to the MLI MRC and quarterly reporting to the MLI BRC. This reporting includes a climate risk report that consolidates information on how climate risk manifests across the key risk types.

The Chief Risk Officer of the Company has been appointed as the Senior Manager responsible for the financial risk of climate change under the PRA/FCA SMCR. Within the Company, the Chief Risk Officer reports to the Board and the BRC and provides updates to the MRC on matters related to climate risk.

Climate Risk Management

As climate risk spans across multiple risk types, the Company has developed and continues to enhance processes to embed climate risk considerations into risk management programmes.

Effective management of climate risk requires coordinated governance, clearly defined roles and responsibilities and well-developed processes aimed at climate risk identification, measurement and monitoring and related controls.

Climate Risk Identification

To be effectively managed, climate risk must be proactively identified and well understood. The Company's risk identification is an ongoing process that incorporates input from stakeholders across LOBs and CFs with relevant expertise. It is designed to be forward-looking and to capture relevant risk factors to which the Company is or may be exposed. Risks are assessed and classified across short-term, medium-term or long-term time horizons. LOBs and CFs identify risks that are captured consistently in a risk inventory and reviewed quarterly.

Climate Risk Measurement

Measurement of climate risk is conducted using a range of qualitative and quantitative methods across the LOBs and CFs using tools, such as industry, country and counterparty-level assessments as well as scenario analysis, to better understand the climate risks posed to the Company's business, operations, clients and counterparties.

**STRATEGIC REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

Climate Risk Management (continued)

Climate Risk Monitoring

To monitor physical and transition risk exposure across all seven risk types, climate risk has been embedded into existing risk management processes and integrated into climate risk metrics and reporting. This includes the delivery of both detailed metrics at the individual risk level as well as an aggregated, cross-risk report which is provided to the Company's BRC and management via established governance routines.

Climate Risk Controls

Climate-related risks are controlled using the risk identification, measurement, and monitoring tools to drive governance, policies, processes and testing efforts to manage and mitigate exposure to climate-related risk. Risk management policies have been updated to incorporate, where applicable, climate risk considerations to ensure appropriate controls across risk categories.

The Company continues to build out and enhance its climate-related and environmental risk management capabilities in a proportionate way and in line with regulatory expectations.

Climate Risk Management by Risk Type

Examples of how potential climate risks to the Company are managed are outlined below:

Credit Risk

An industry climate risk framework is used to classify the possible financial risks of climate change at the industry level. In 2023 these industry risk ratings were expanded from three to five categories. Additionally, potential risks faced and possible mitigations (such as emission reduction capabilities) to a 2030 time horizon were considered, in line with BAC's milestone 2030 Financing Activity Targets.

The industry risk ratings are reviewed annually and integrated into the credit risk management processes, including the Industry Risk Guidance documents, which are a tool for client selection, onboarding and underwriting. In addition, a framework has been developed to assess climate-related risks to countries in which the Company does business.

Given the complexities of assessing climate-related risk at a client level, a Centre of Excellence has been created to steer the ongoing implementation of client-level climate and environmental risk assessments. The Climate and Environmental Risk Assessments ("CERAs"). The CERAs consider both industry, physical and transition risk ratings and country climate risk classifications, where relevant, and provide additional insight into a counterparty's response to climate and environmental risks, including the incorporation of mitigating factors such as insurance and management plans and expertise. CERA scores are then integrated into the underwriting and credit risk lifecycle.

Market and Liquidity Risk

Climate-related impacts to the Company's Market and Liquidity Risk are measured and monitored at the issuer and portfolio level. Market risk sensitivities and price impacts are aggregated by sector and geographies across various asset classes to identify and monitor climate-sensitive concentrations which leverage both industry and country climate risk classifications.

In Market Risk, the Company deploys daily climate risk reporting that provides information on the concentration of exposure to higher risk industries and countries; a monthly dashboard that leverages a common enterprise taxonomy to consider the issuer's industry and country to track Key Risk Indicators ("KRIs"); and a monthly stress run for the purpose of risk identification. Stress tests are used to understand the impact of climate risks on trading portfolios, with a particular focus on identifying concentrations of risk within a portfolio. Metrics continue to be developed to take advantage of improved industry data and modelling for the measurement of both transition and physical risks.

**STRATEGIC REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

Climate Risk Management by Risk Type (continued)

Market and Liquidity Risk (continued)

Liquidity Risk undertakes climate risk assessments for key drivers of the Company's liquidity. Reporting includes metrics to track climate sensitive industry concentration in funding sources and uses.

Compliance and Operational Risk

For climate-related operational and compliance risk, a specialised team is in place to assess risk, monitor business activities and processes, and report on the state of the control environment based on Enterprise policies and standards established by Global Compliance and Operational Risk ("GCOR").

The Company considers the risks posed by physical climate events and the chronic impacts of climate change in business continuity and resilience planning. Global Risk Management independently monitors business continuity controls in countries identified as having high climate risk and also provides independent oversight of certain other climate-related risks, such as reputational risks and risks associated with improper conduct.

Reputational and Strategic Risk

The Company proactively identifies and monitors reputational risk arising from climate and broader sustainability risks through regional and reputational risk committees.

Additionally, LOBs and CFs leverage BAC's ESRPF, which provides clarity and transparency around how environmental and social risks are managed, to assess potential climate-related and environmental risks associated with transactions and business decisions more likely to result in reputational risk.

The Company's Strategic Plan is aligned with the capital, liquidity, and financial planning processes. It is also aligned with the Responsible Growth Strategy and realisation of BAC's \$1.5 trillion sustainable finance goal and so considers climate-related risks and opportunities identified by LOBs and CFs.

Assessing Climate-related Risk through Scenario Analysis

Scenario analysis is an important tool to understand how various risks and opportunities may manifest. The Company's scenario analysis considers both transition and physical risk, their impact on the Company's key risk types (such as market risk and operational risk) and across different time horizons.

The main climate risk for the Company is transition risk which primarily manifests through counterparty credit risk and market risk in the trading portfolio. The Company assessed climate-related risks through the development and implementation of a short-term scenario, reflecting unforeseen announcements of upcoming regulatory climate policies, such as punitive carbon taxes, to meet climate challenges. In the scenario, market participants re-priced expected future cash flows for both traditional and green businesses, as they expect a rapid and disorderly transition to a low-carbon economy. Market Risk managers used expert judgment to provide shocks by asset categories, informed by the Network for Greening the Financial System ("NGFS") Disorderly Delayed Transition Scenario. Counterparty risk was assessed with a series of defaults of counterparties in industries identified as having elevated climate risk. Targeted assessments were also conducted to assess liquidity impacts based on changes in derivative collateral requirements.

The climate scenario analysis to date has not highlighted any significant concentrations of highly climate sensitive exposures in the portfolio or vulnerabilities to the Company's current business model which would require any additional mitigating actions to be put in place. The Company expects to continue its scenario analysis efforts in the future through continuing to invest in people, data, models and methodologies as part of overall strong risk management practices.

**STRATEGIC REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

BUSINESS REVIEW AND FUTURE DEVELOPMENTS

The Company's profit before taxation was \$1,538 million, an increase of \$316 million compared with the year ended 31 December 2022.

Net operating revenue was \$6,592 million, an increase of \$327 million compared with the year ended 31 December 2022.

The directors expect the principal activities of the Company will continue throughout 2024.

Divisional performance

The Company's results are derived from the Global Banking and Markets ("GBAM") business which represent a single class of business. Within GBAM business activities, there are three principal business divisions being Fixed Income, Currencies and Commodities ("FICC"), Equities and Investment Banking ("IBK"), supported by the Treasury business.

Profit before tax for the year increased by \$316 million as compared to 2022 driven by higher Treasury revenues.

FICC revenues were lower by \$20 million (1% lower) as compared to 2022, as Foreign Exchange and Local Currency Trading ("FX & LCT") and Commodities revenues normalised after a strong 2022 in a volatile trading environment as central banks increased interest rates at record paces and the war in Ukraine created uncertainty in Commodities markets. This was offset by improvement in Global Credit as compared to 2022 as market conditions improved with generally tightening credit spreads.

Equities revenues were lower by \$109 million (4% lower) as compared to 2022 with strength in financing activity offset by lower market making activity as low market volatility was prevalent through most of 2023. IBK revenues decreased by \$39 million (12% lower) as M&A activity fell back from a strong 2022 partially offset by a modest improvement in debt underwriting.

The Company has seen Treasury revenues increase by \$529 million (27% higher) as compared to 2022 due to a higher return on MLI's strong capital base, with a full year impact of increased interest rates.

Administrative expenses were relatively unchanged compared to 2022.

Capital

The Company makes "Pillar 3" disclosures as required under the PRA Rulebook Disclosure (Capital Requirements Regulation "CRR"). Company information is included as part of the respective Pillar 3 disclosures as required under local laws, rules and regulations and made available on the firm's website in accordance with the aforementioned PRA Rules. This can be obtained via <https://investor.bankofamerica.com/regulatory-and-other-filings/basel-pillar-3-disclosures>. As at 31 December 2023, the Company was adequately capitalised and met all external capital requirements. The Company's capital resources were \$33,878 million as at 31 December 2023 (2022: \$33,521 million).

Liquidity

The Company is subject to the UK onshored requirements originally implemented in the European Union ("EU") via the Capital Requirements Directive ("CRD") and the CRR, alongside associated binding technical standards that were created by the European Union (Withdrawal) Act 2018, and the relevant PRA rules, through which it must demonstrate self-sufficiency for liquidity purposes. The EU Withdrawal Act (2018) acts as the facilitator through which EU rules, as at the time of onshoring, continue to apply.

The Company must maintain a minimum portfolio of unencumbered High Quality Liquid Assets as defined by the Delegated Act on the Liquidity Coverage Ratio ("LCR"). The Company was in excess of its regulatory liquidity requirement throughout 2023 and 2022.

STRATEGIC REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023

KEY PERFORMANCE INDICATORS

The results of the Company were as follows:

Profit before taxation amounted to \$1,538 million (2022: \$1,222 million).

Net operating revenue for the year amounted to \$6,592 million (2022: \$6,265 million).

Return on Assets ("RoA") was 0.36% (2022: 0.28%). RoA is calculated as profit after tax ("PAT") divided by total assets. Return on Equity ("RoE") was 3.5% (2022: 3.0%). RoE is calculated as PAT divided by total equity.

Administrative expenses for the year amounted to \$5,054 million (2022: \$5,043 million).

Net assets as at 31 December 2023 were \$36,916 million (2022: \$36,559 million).

The Company's capital resources were \$33,878 million as at 31 December 2023 (2022: \$33,521 million).

As the Company adopts BAC's global approach to sustainability matters, some related non-financial key performance indicators are typically measured on a global basis and can be found in the ESG Performance Data Summary online at www.bankofamerica.com/ESGdata2022. Certain Company-specific non-financial climate indicators are included in the "Streamlined Energy and Carbon Reporting" section in the Directors' report.

This report was approved by the Board on 19 March 2024 and signed on its behalf.

B.A. Mensah
Chief Executive Officer
Director

**DIRECTORS' REPORT
FOR THE YEAR ENDED 31 DECEMBER 2023**

The directors present their report and the audited financial statements for the year ended 31 December 2023.

STATEMENT OF DIRECTORS' RESPONSIBILITIES IN RESPECT OF THE FINANCIAL STATEMENTS

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulation.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have prepared the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 101 "Reduced Disclosure Framework", and applicable law). Under company law, directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period.

In preparing the financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- state whether applicable United Kingdom Accounting Standards, comprising FRS 101 have been followed, subject to any material departures disclosed and explained in the financial statements;
- make judgements and accounting estimates that are reasonable and prudent; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are also responsible for keeping adequate accounting records that are sufficient to show and explain the Company's transactions, and disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 2006.

The directors are responsible for the maintenance and integrity of the Company's financial statements published on the ultimate parent company's website. Legislation in the United Kingdom governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

DIRECTORS' CONFIRMATION

In the case of each director in office at the date the directors' report is approved:

- so far as the director is aware, there is no relevant audit information of which the Company's auditors are unaware; and
- they have taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

**DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

The directors of the Company who were in office during the year and up to the date of signing the financial statements, except where noted, were:

R.J. Keys
B.A. Mensah
H.J. O'Neil
M. Slowey
R.P. Thorne
P.J.P. de Weck
T.D. Woods
M. Butler (resigned on 21 April 2023)

DIRECTORS' THIRD PARTY INDEMNITY PROVISIONS

The directors have the benefit of an indemnity which is a qualifying third party indemnity provision as defined by Section 234 of the Companies Act 2006. The indemnity was in force throughout the last financial year and remains in force.

MATTERS COVERED IN THE STRATEGIC REPORT

Details regarding a review of the business, including future developments, existence of branches outside of the UK, group reorganisation, and principal risks and uncertainties are provided in the Strategic Report on pages 1 - 10.

STATEMENT ON CORPORATE GOVERNANCE

In accordance with The Companies (Miscellaneous Reporting) Regulations 2018, the Board has adopted the FRC Wates Corporate Governance Principles for Large Private Companies (the "Wates Principles"). The following provides details on how the Board has followed the Wates Principles over the course of the year.

Principle One - Purpose and Leadership

As noted in the Strategic Report, the Company is BAC's largest entity outside the US and helps serve the core financial needs of global corporations and institutional investors. The Company's head office is in the UK with branches in Dubai and Qatar, and a representative office in Zurich, and is licensed to undertake business in a number of other countries or territories around the world.

The Board develops and promotes the purpose of the Company and ensures that its values, strategy and culture are aligned to it. The Board also approves the strategy for the Company on an annual basis. The 2023 MLI Strategy, in keeping with the broad BAC strategy of "Responsible Growth", was developed taking into account the impact of the Company's activities on its clients, employees, regulators, vendors and the wider community, and ensuring any decisions take the following into account:

- **Responsible Growth:** Grow and win in the market, within both our client-focused strategy and our risk framework, and in a sustainable manner.
- **Operational Excellence:** Work smarter for our clients and optimise the way we do business.
- **Culture:** Make MLI the best place to work by driving diversity, respect and meritocracy, maintaining and continuing to progress an inclusive environment for all, and giving back to the communities in which we work.

**DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

STATEMENT ON CORPORATE GOVERNANCE (continued)**Principle One - Purpose and Leadership (continued)**

The Board also formally adopted the BAC Code of Conduct, to which all employees are required to adhere and which defines the culture of the organisation as follows: "Our culture comes from how we run the company every day, by acting responsibly and managing risk well, which includes our commitments to honest and ethical behaviour, acting with integrity, and complying with applicable laws, rules, regulations and policies. We recognise that cultivating a strong culture is an ongoing effort, fostered day after day in both formal and informal ways. Building a unified culture requires thoughtful, purposeful action, and we do this by ensuring all of our employees from different businesses, companies, and countries are aligned to our purpose of making financial lives better through the power of every connection."

The Code of Conduct contains detailed requirements to ensure that employees abide by the principles of managing risk well, acting ethically, being fair and honest in communications, safeguarding and not misusing information, protecting the Company's assets, conducting financial affairs responsibly, complying with all applicable laws and regulations, valuing each and every teammate and growing the business responsibly.

The Code of Conduct also details the Company's approach to discrimination and harassment. It confirms that MLI is committed to promoting an inclusive and respectful work environment. Discrimination and harassment are unacceptable and contrary to the Company's values. The Company does not tolerate unlawful discrimination or harassment of any kind, including but not limited to verbal, physical, visual, sexual and abusive conduct (bullying) as outlined in our Harassment and Discrimination Prevention Policy.

See the "Employee Engagement" section for further details of how the Board engages with employees on matters related to the purpose and culture of the Company.

Principle Two - Board Composition

The Board comprises of executive, and also independent non-executive directors, who bring extensive experience and the ability to challenge and be fully independent of the executive directors. The independent non-executive Board Chair provides a level of independent oversight to the proper execution of the governance activities of the Company and the Board. As required under relevant regulation, the Chairs of the Board and each of its Committees are independent non-executive directors. The Chair of the Board has responsibility of chairing and overseeing the role of the Board and is responsible for leading the development of and monitoring the effective implementation of policies and procedures for the induction, training and professional development of all members of the Board, for leading the development of the Company's culture by the Board as a whole and is responsible for ensuring that the Company's non-executive directors maintain their obligations with respect to applicable Fitness and Propriety regulations.

The Board delegates to the Chief Executive Officer ("CEO") and Senior Management Function 1 ("SMF1" for the purposes of the UK SMCR) management of the Company. The CEO may exercise all the powers of the Board except for those matters reserved to the Board or any other matter specifically delegated to any committee of the Board. The CEO is authorised to delegate a further proportion of his authority to other senior executives as considered consistent with the roles and responsibilities attributed to those individuals and as defined through the Company's responsibilities map, which is shared with the Board periodically, or following significant changes.

MLI is subject to requirements under UK regulation regarding Board composition and director suitability. The MLI Governance Committee, in consultation with the Company's shareholders, the Company's CEO and the Chair of the Board, identifies and evaluates individual candidates for their qualifications to become directors and recommends qualified candidates to the Board to fill vacancies as the need arises. Before any appointment is made by the Board, the MLI Governance Committee considers the overall knowledge, skills, experience and expertise represented on the Board, as well as the qualifications and suitability of each candidate, taking care that appointees have sufficient time available to devote to the position.

**DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

STATEMENT ON CORPORATE GOVERNANCE (continued)

Principle Two - Board Composition (continued)

Furthermore, the MLI Governance Committee considers candidates from a wide range of backgrounds and considers candidates on merit and against objective criteria and with due regard for the benefits of diversity on the Board, including, but not limited to, gender. In addition, pursuant to the terms of its charter, the MLI Governance Committee is responsible for deciding on a target for the representation of the underrepresented gender on the Board and how to meet it.

All Board members, including the independent non-executive directors participate in regular training and development activities appropriate to their roles. The effectiveness of the Board is regularly assessed by way of a formal review, and output from such reviews is used to develop actions to further enhance governance processes. In light of the above processes, the current directors collectively possess a broad range of skills, backgrounds, experience and knowledge appropriate for the effective oversight of the Company's business.

Principle Three - Director Responsibilities

MLI's directors execute their responsibilities by way of appropriate governance structures including the Board and its Committees, in order to hold management to account.

Examples of key activities performed by the directors through the Board and its Committees include annual review and approval of MLI's strategic plan, consideration of the capital plan, financial operating plan, liquidity requirements and risk appetite.

Strategic decisions relating to the Company are presented and discussed at the MLI BRC and the Board. The Board ensures suitable risk management and controls through the MLI BRC, the MLI Audit Committee, the MLI Governance Committee and the MLI MRC, also conducting periodic reviews of risk management strategies to ensure their continuing effectiveness. The Risk Governance section of the Strategic Report on pages 3 - 4 contains further details.

Principle Four - Opportunity and Risk

The Board is annually asked to consider and, if it sees fit, adopt the BAC Risk Framework, which sets out the responsibility of the Board and its Committees for managing risk across the seven defined risk types: strategic, credit, market, liquidity, operational, compliance and reputational risk. This also includes climate risk, which can span across the seven key risk types. Compliance with the Risk Framework is required to be assessed annually. The Board through the MLI BRC has a risk identification process, which through the application of the Risk Framework, guides the development of the risk appetite for the Company and the setting of risk limits which provide a structure for setting direction for the Company. The Board is responsible for approving the Company's Risk Appetite Statement on an annual basis and monitors compliance with it on an ongoing basis. The Company's Risk Appetite Statement is developed in consideration with the BAC Risk Appetite, BAC Risk Framework and the principles of Responsible Growth. This overall Risk Framework enables the Board and its Committees to be able to identify the impact of decision-making on its stakeholders over the longer term.

The main strategic opportunity for MLI is to continue to serve the core financial needs of global corporations and institutional investors and operate to grow and win in the market, with a client-focused strategy, within the Risk Framework and Risk Appetite, and in a sustainable manner, to provide long-term value to stakeholders.

A culture of managing risk well is fundamental to the Company's core values and operating principles. It requires focus on risk in all activities and encourages the necessary mindset and behaviour to enable effective risk management and promote sound risk-taking within the Company's risk appetite. Sustaining a culture of managing risk well throughout the organisation is critical to the success of the Company and is a clear expectation of the Company's senior management team and Board. For details of the principal risks and uncertainties and how the risk environment is managed, see the Strategic Report and note 31 Risk Management.

**DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

STATEMENT ON CORPORATE GOVERNANCE (continued)

Principle Five - Remuneration

As a wholly owned subsidiary of BAC, MLI's remuneration policies are aligned to BAC's policies, while being fully compliant with applicable remuneration regulation. The MLI Governance Committee is charged with oversight of the development, and implementation of the Company's remuneration policies and practices to support risk management goals and also to encourage alignment with shareholder interests and the achievement of long-term, sustainable results in an appropriate manner.

The cornerstone of MLI's remuneration philosophy across all lines of business is to pay for performance – BAC Group, MLI, line of business and individual performance. Through the Company's performance management process, employees understand performance expectations for their role through ongoing dialogue with their manager. The performance management process is designed and monitored by the Leadership Development function in Human Resources ("HR"). This process is reviewed periodically so that it meets the needs of managers to assess and communicate performance expectations. Throughout the year, employees receive coaching on their performance and ultimately receive a rating for their full year of performance based upon their achievement of goals for their job. Each employee's performance is assessed on quantitative and qualitative objectives as well as specific behaviours, and performance is factored into each employee's incentive remuneration award. Depending on the employee, quantitative performance objectives may be focused on BAC Group-wide, line of business, or product results. Qualitative performance objectives may include quality and sustainability of earnings, successful implementation of strategic initiatives, adoption of risk culture/ adherence to risk framework and operating principles in relation to conduct risk, adherence to the BAC Code of Conduct and other core values of the Company. The Company does not remunerate or assess employees' performance in a way that encourages employees to act in a manner that conflicts with the duties owed to the Company's clients.

Refer to the "Employee Engagement" section on the next page for further information.

Principle Six - Stakeholder Relationships and Engagement

The Company considers its key stakeholders to be its clients, shareholders, employees, regulators, tax authorities, vendors and the wider community.

Stakeholders are apprised of the Company's position and prospects by structured reporting and communications (i.e., public filings and disclosures including Pillar 3 information, specific filings to regulators and tax authorities, and internal updates and meetings for employees). The Board is kept apprised of stakeholder communication.

The Board reviews metrics associated with stakeholder interests including, for example, business results, risk and control metrics, employee engagement, client complaints and compliance reports. The Board also receives updates on wider community engagement.

Refer to the "Section 172 (1) Statement" in the Strategic Report on page 3 and the sections titled "Employee Engagement" and "Stakeholder Engagement" below and on pages 16 - 18 for further information.

**DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

EMPLOYEE ENGAGEMENT

The employees of the Company are fundamental to its success, and the Board is responsible for overseeing meaningful engagement with the workforce. Activities are underpinned by policies with training, monitoring and evaluation processes in place to ensure that employees are paid in an effective and consistent manner and in compliance with all applicable regulatory and legal requirements. In addition, the Board and its Committees have a key role in the oversight of the Company's culture, setting the tone at the top and holding management accountable for maintaining high ethical standards. They do this in a number of ways, including:

- Requesting and receiving quarterly updates from senior management on matters related to how the Company manages conduct risk, such as regular reporting on the workings and findings of the Conduct Risk Council including its Front Line Units ("FLU") and Enterprise Control Function ("ECF") conduct task forces and thematic conduct working groups, employee training and issue prevention, detection, escalation, management and reporting;
- Overseeing the Company's incentive plan design and governance to provide for an appropriate balance of risk and compensation outcomes;
- Evaluating performance for senior management across a range of factors, such as the manner in which results are achieved and accountability in driving a strong risk-management culture;
- Meeting with key managers below the senior-most management level to assess for themselves how conduct and culture expectations are cascaded throughout the organisation; and
- Reviewing on an annual basis the results of the global Employee Engagement Survey that are relevant to MLI, including the Engagement and Diversity and Inclusion data. In addition, the Board and its Committees are routinely briefed on the metrics, benefits, programmes and policies designed to support the MLI workforce.

The Company is committed to creating an inclusive workplace where everyone can bring their whole self to work regardless of race, colour, creed (including religious creed), religion, sex (including pregnancy, childbirth or related medical condition), genetic information, gender, gender identity, gender expression, sexual orientation, national origin, citizenship status, age, ancestry, marital status, medical condition, disability (including physical or mental disability), military and veteran status or any other factor that is irrelevant to employment and advancement or prohibited by law.

This is reflected in the Company's HR policies, guidelines and procedures. LOB leaders are engaged in, and accountable for, driving diversity and inclusion. The Company provides applicants and employees with equal opportunity under the Company's human resources practices, including, but not limited to, recruiting, hiring, training, compensation, promotion and facilities access. The Company focuses on eliminating artificial barriers to employment or advancement and fostering a diverse environment. In addition, the Company also promotes ongoing development and implementation of programmes and services that anticipate and respond to the needs of individuals with disabilities. The applications for employment by disabled persons are fully and fairly considered having regard to the aptitudes and abilities of each applicant. Efforts are made to enable any employees who become disabled during employment to continue their careers with the Company. Training, career development and promotion of disabled persons is, as far as possible, identical to that of employees who are not disabled.

The Company has seven employee networks which encourage advocacy and learning and provide development and networking opportunities for its employee population. The Company has signed up to the HM Treasury Women in Finance Charter, signalling its commitment to increasing the number of women at senior levels, and complies with disclosure requirements under the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017. There are a number of initiatives in the Company to support this outcome, including development programmes, councils and networks in order to drive our progress. The MLI Governance Committee receives regular information on these programmes and initiatives.

**DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

EMPLOYEE ENGAGEMENT (continued)

The Company maintains an annual mandatory training programme, underpinned by a standard operating procedure and process, which is owned and monitored by the Compliance team. This includes training on, amongst other things, the Company's Code of Conduct, whistleblowing, anti-money laundering, and market abuse. In addition, other training courses are made available to individuals to support applicable development in their individual roles. A further suite of training is provided to managers to ensure they are appropriately trained on how to communicate and have workplace conversations, effective delegation, giving feedback and coaching, promoting teamwork and inclusion and managing risk responsibly.

See also "Principle Five - Remuneration", in the "Statement on Corporate Governance".

STAKEHOLDER ENGAGEMENT

As set out in "Principle Six – Stakeholder Relationships and Engagement" in the "Statement on Corporate Governance" above, the Company considers its key stakeholders to be its clients, shareholders, employees, regulators, vendors and the wider community.

There is regular engagement with clients from executive directors and management, with reporting to the Board on key aspects of client engagement and compliance with regulatory requirements regarding treating customers fairly and other matters. Furthermore, as required under relevant legislation, the Company has a client complaints procedure, and there is reporting to the Board regarding client complaints. The Company's ultimate shareholder is represented by independent non-executive directors of the Company who are also directors of BAC, as well as by management's engagement with BAC senior management. The Board engages with employees through the employee engagement processes discussed in more detail in the "Employee Engagement" section above. Regulators have regular communication and dialogue with the Board to discuss their views on risks to the Company and the industry.

The Board also reviews reports on vendor management programmes. MLI, as a wholly-owned subsidiary of BAC, participates in BAC's global third party and inter-affiliate outsourcing programmes. On behalf of the Board, there are MLI senior management routines in place to provide governance and oversight of outsourcing programmes, both third party and inter-affiliate, ensuring a comprehensive approach for service monitoring and the identification, mitigation and escalation of risk. Furthermore, the International Head of Technology provides monitoring and enforces adherence to the firm's third party policies and inter-affiliate policies.

BAC has established a broad sustainability programme to deliver on its purpose to help make financial lives better through the power of every connection and through Responsible Growth. It also uses this programme to drive its interaction with the community.

MLI, as a wholly-owned subsidiary of BAC, participates and actively engages in the BAC principles of Responsible Growth, including:

- Investing in the transition to a low carbon economy
- Financing sustainable projects that, for example, increase energy efficiency or decrease greenhouse gas emissions
- Reducing our environmental footprint in part through BAC's goal to achieve net zero greenhouse gas emissions in financing, operations and supply chain before 2050
- Advancing racial equality, economic mobility and social progress
- Offering responsible products and services
- Creating a supportive and inclusive workplace
- Holding ourselves accountable
- Managing risk well
- Providing transparency

DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023

STAKEHOLDER ENGAGEMENT (continued)

BAC develops business opportunities and manages risks associated with addressing the world's biggest environmental and social challenges. BAC's focus on Responsible Growth helps define how BAC deploys its capital and resources, inform its business practices, and help determine how and when BAC uses its voice in support of its values. Integrated across BAC's LOBs, this focus reflects how BAC is held accountable and is allowed to create shared success with its clients and communities.

These efforts underscore how BAC seeks growth within its Risk Framework, including how it engages external stakeholders and provides strong oversight of environmental and social risks that present themselves through its business activities. This includes the responsible products and services delivered to clients, how business opportunities are evaluated, and how BAC helps enable social progress and economic mobility in local communities around the world. Ultimately, BAC's commitment to Responsible Growth helps build trust and credibility as a company people want to work for, invest in, and do business with.

BAC consistently engages external stakeholders for advice and guidance in shaping certain practices and priorities. This process includes formal and informal engagement with both internal and external stakeholders, including clients, its shareholders, socially responsible investment firms, and experts from civil rights, consumer, community development and environmental organisations. BAC weighs the importance of risk issues in relation to its stakeholders and to its business success.

BAC engages with other key stakeholders, including governments, regulators, and trade bodies to help promote a consistent regulatory framework that will enable a just and smooth transition to a low carbon economy.

Reporting of the ESG metrics aligned with external frameworks and the ESG Performance Data Summary can be found online at www.bankofamerica.com/ESGdata2022.

STREAMLINED ENERGY AND CARBON REPORTING ("SECR")

The UK government's Streamlined Energy and Carbon Reporting ("SECR") policy was implemented on 1 April 2019, when the Companies (Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018 came into force. The Company meets the criteria of a "large, unquoted company" under the scheme and is therefore required to include UK energy use and carbon emissions within the Directors' Report.

The Company, as one of BAC's principal European entities, is committed to improving energy efficiency and reducing greenhouse gas ("GHG") emissions associated with its operations. Under the SECR requirements, the Company makes disclosure in the tables below of the energy and greenhouse gas emissions information attributable to BAC activities in the UK.

**DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023**

STREAMLINED ENERGY AND CARBON REPORTING ("SECR") (continued)

Energy Consumption

	2023	As restated 2022
	kWh	kWh
Energy use impacting Scope 1 GHG emissions^(a)		
Natural gas consumption*	9,291,048	10,166,192
Gas oil consumption	1,351,426	1,526,531
Total impacting scope 1 GHG emissions	10,642,474	11,692,723
Energy use impacting Scope 2 GHG emissions^(b)		
Electricity	81,019,834	76,808,450
Energy use impacting Scope 3 GHG emissions^(c)		
Business travel*	884,366	812,218
Total energy consumption	92,546,674	89,313,391

^(a) Energy use impacting Scope 1 GHG emissions relates to sources (consumption) that are owned or controlled by BAC activities in the UK and which result in direct emissions from those activities. Under the SECR requirements, such sources and related emissions required to be disclosed are restricted to natural gas usage for heating purposes and gas oil for back-up generators.

^(b) Energy use impacting Scope 2 GHG emissions relates to purchased electricity consumed by BAC activities in the UK. Scope 2 GHG emissions physically occur at the facility where the energy is generated.

^(c) Energy use impacting Scope 3 GHG emissions required to be disclosed under the SECR requirements are solely in respect of business travel emissions related to rental cars or employee-owned vehicles where the company reimburses employees for business mileage expenses. Other sources of Scope 3 emissions are not in scope for this reporting and are not therefore reported. Scope 3 business travel emissions include emissions from all of EMEA.

*Prior period restated in accordance with SECR requirements. This was due to the omission of a UK building and incorrect reporting of business travel. Natural gas consumption for 2022 has been increased by 1,114,660 kWh. Business travel for 2022 has been increased by 209,073 kWh.

Energy data is based on utility invoices, generator run times, business travel mileage records, data centre IT loads and power usage effectiveness. Where actual data is not available, estimates are made based on actual data collected in the previous year or energy use intensity of similar building types.

The GHG emissions in the table below have been produced in line with the World Resources Institute's "Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard".

DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023

STREAMLINED ENERGY AND CARBON REPORTING (continued)

Greenhouse gas emissions^(a)

	2023	2023	As restated 2022	As restated 2022
	Gross Location based ^(b)	Gross Market based ^(c)	Gross Location based ^(b)	Gross Market based ^(c)
Scope 1 direct emissions (tCO₂e)				
Natural gas consumption*	1,684	1,684	1,843	1,843
Gas oil consumption	342	342	387	387
Total scope 1	2,026	2,026	2,230	2,230
Scope 2 indirect emissions (tCO₂e)				
Electricity	16,782	—	14,853	—
Scope 3 indirect emissions (tCO₂e)				
Business Travel	213	213	199	199
Total	19,021	2,239	17,282	2,429
Intensity ratio tonnes of CO ₂ e per m ² floor area (tCO ₂ e/m ²)*	0.250	0.029	0.205	0.029

^(a) The intensity ratio represents the metric tonnes of GHG emissions produced per m² of occupied space.

^(b) A location-based method reflects the average emissions intensity of the UK electricity grid.

^(c) A market-based method reflects emissions from electricity that the Company has purposefully chosen and takes into account the impact of green contracts or other renewable energy products. The Company is able to report zero emissions under Scope 2 using the GHG Protocol Corporate Standards' market-based approach due to executed contracts that confirms 100% renewable electricity.

*Prior period restated to increase natural gas consumption by 202 tCO₂e and to increase the location and market-based intensity ratio by 0.009 and 0.003 tCO₂e/m² respectively. This is due to a change in treatment of certain UK buildings and a methodology enhancement.

The annual Defra Government Emission Conversion Factors for Company Reporting produced by the Department for Energy Security and Net Zero (previously the Department of Business, Energy and Industrial Strategy) have been used to calculate location-based emissions from electricity and GHG emissions related to the use of personal vehicles for business travel. The United States Environmental Protection Agency emission factors have been used for natural gas, gas oil and rental cars which is consistent with BAC's global GHG inventory. Global warming potentials from the Intergovernmental Panel on Climate Change 4th Assessment Report were used to convert CH₄ and N₂O to CO₂e.

The Company considers that the most appropriate intensity metric to reflect performance is gross emissions in tonnes of CO₂e per m² of building floor area as BAC's energy consumption and associated GHG emissions in the UK are primarily driven by its real estate portfolio.

In 2023, the Company's total location-based greenhouse gas emissions increased driven by increased usage of technology equipment.

Scope 1 and Scope 2 greenhouse gas emissions were independently assured to a reasonable level, and Scope 3 emissions were assured to a limited level. The third-party assurance was carried out by an independent consultant, Apex Companies.

DIRECTORS' REPORT (CONTINUED)
FOR THE YEAR ENDED 31 DECEMBER 2023

Energy Efficiency Measures and Renewable Energy

The Company's environmental objectives are aligned with BAC Group's operational goals. In line with these objectives BAC actively pursues energy and GHG emission reductions, primarily through energy efficiency initiatives and office consolidation projects. In 2023, BAC Group commenced an infrastructure project in London that includes upgrading legacy chillers with heat recovery chillers.

BAC continues to purchase renewable energy through a green contract with a utility supplier. The contract is covered by the UK Renewable Energy Guarantees of Origin ("REGO") scheme administered by Office of the Gas and Electricity Markets ("OFGEM"). The programme provides transparency to consumers about the proportion of electricity that suppliers source from renewable generation. OFGEM issues a REGO certificate for each MWh of electricity generated from eligible generation sources.

For facilities not covered by these green contracts (primarily leased Data Centres space in the UK) BAC annually purchases unbundled REGOs, which are reflected in scope 2 market-based emissions above. Carbon credits are purchased for other residual emissions and are applied to BAC's gross Scope 1 and market-based Scope 2 emissions.

DONATIONS

The Company made no political donations for the year ended 31 December 2023 (2022: \$0).

EVENTS AFTER THE END OF THE REPORTING PERIOD

The Company evaluates whether events occurring after the balance sheet date but before the date the consolidated financial statements are available to be issued, require accounting as of the balance sheet date, or disclosure in the financial statements. The Company has evaluated such subsequent events through 19 March 2024 which is the issuance date of the financial statements.

Refer to note 37 Events Occurring After the Reporting Date for events which occurred after the end of the reporting period.

DIVIDEND

A final dividend of \$948 million (2022: \$375 million) recommended on 16 March 2023 was paid in respect of the year ended 31 December 2022.

On 19 March 2024 the directors recommended the payment of a final dividend for the year ended 31 December 2023 of \$1,186 million (\$0.15 per share).

This report was approved by the Board on 19 March 2024 and signed on its behalf.

B.A. Mensah
Chief Executive Officer
Director

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MERRILL LYNCH
INTERNATIONAL

REPORT ON THE AUDIT OF THE FINANCIAL STATEMENTS

Opinion

In our opinion, Merrill Lynch International's financial statements:

- give a true and fair view of the state of the Company's affairs as at 31 December 2023 and of its profit for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, including FRS 101 "Reduced Disclosure Framework", and applicable law); and
- have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements, included within the Annual Report and Financial Statements (the "Annual Report"), which comprise: the statement of financial position as at 31 December 2023; the income statement, the statement of comprehensive income and the statement of changes in equity for the year then ended; and the notes to the financial statements, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) ("ISAs (UK)") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC's Ethical Standard, as applicable to other entities of public interest, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

To the best of our knowledge and belief, we declare that non-audit services prohibited by the FRC's Ethical Standard were not provided.

Other than those disclosed in Note 8, we have provided no non-audit services to the Company or its controlled undertakings in the period under audit.

Conclusions relating to going concern

Our evaluation of the directors' assessment of the Company's ability to continue to adopt the going concern basis of accounting included:

- Performing a risk assessment to identify factors that could impact the going concern basis of accounting;
- Understanding and evaluating the Company's current financial position and financial forecasts;
- Understanding and reviewing the Company's current and forecast capital and liquidity position. This included reviewing the results of stress testing performed by management of both liquidity and regulatory capital, including considering the severity of the stress scenarios that were used; and
- Reading and evaluating the adequacy of the disclosures made in the financial statements in relation to going concern.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a

**INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MERRILL LYNCH
INTERNATIONAL**

going concern for a period of at least twelve months from when the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Strategic report and Directors' report, we also considered whether the disclosures required by the UK Companies Act 2006 have been included.

Based on our work undertaken in the course of the audit, the Companies Act 2006 requires us also to report certain opinions and matters as described below.

Strategic report and Directors' report

In our opinion, based on the work undertaken in the course of the audit, the information given in the Strategic report and Directors' report for the year ended 31 December 2023 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.

In light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we did not identify any material misstatements in the Strategic report and Directors' report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of directors' responsibilities in respect of the financial statements, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

**INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MERRILL LYNCH
INTERNATIONAL**

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company and industry, we identified that the principal risks of non-compliance with laws and regulations related to the rules of the Prudential Regulation Authority ("PRA") and the Financial Conduct Authority ("FCA"), and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the financial statements such as the Companies Act 2006 and United Kingdom tax legislation. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to the posting of inappropriate journal entries and management bias in accounting estimates. Audit procedures performed by the engagement team included:

- Enquiring with management, including Internal Audit, and those charged with governance in relation to known or suspected instances of non-compliance with laws and regulations and fraud;
- Review of Board, Audit Committee and Risk Committee meeting minutes;
- Review of Internal Audit reports in so far as they related to the financial statements;
- Review of key correspondence with the regulators, in particular the PRA and FCA;
- Challenging assumptions and judgements made by management in their significant accounting estimates, in particular those related to the valuation of certain complex level 3 financial instrument portfolios;
- Identifying and testing journal entries meeting specific fraud criteria, including unusual account combinations and those journal entries posted by seldom users or with other unusual characteristics;
- Testing of information security controls relating to system access and change management; and
- Incorporating unpredictability into the nature, timing and extent of audit procedures performed.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the FRC's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with Chapter 3 of Part 16 of the Companies Act 2006 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF MERRILL LYNCH
INTERNATIONAL

OTHER REQUIRED REPORTING

Companies Act 2006 exception reporting

Under the Companies Act 2006 we are required to report to you if, in our opinion:

- we have not obtained all the information and explanations we require for our audit; or
- adequate accounting records have not been kept by the Company, or returns adequate for our audit have not been received from branches not visited by us; or
- certain disclosures of directors' remuneration specified by law are not made; or
- the financial statements are not in agreement with the accounting records and returns.

We have no exceptions to report arising from this responsibility.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

1. CORPORATE INFORMATION AND BASIS OF PREPARATION

Merrill Lynch International is a private unlimited company incorporated and domiciled in England and Wales, with branches in Dubai and Qatar along with a representative office in Zurich. The Company's registered office is at 2 King Edward Street London EC1A 1HQ.

The principal activities of the Company are to provide a wide range of financial services globally for business originated in EMEA, APAC and the Americas, to act as a broker and dealer in financial instruments and to provide corporate financial services. The Company also provides a number of post trade related services to third party clients, including settlement and clearing services.

The Company is owned by BofAML EMEA Holdings 2 Limited and BofAML Jersey Holdings Limited, the registered private companies incorporated in Jersey and registered at: Level 1, IFC1, The Esplanade, St Helier, JE2 3BX. BofAML EMEA Holdings 2 Limited holds 80,1% of the ordinary shares in the Company and BofAML Jersey Holdings Limited holds 19.9% of the ordinary shares in the Company. The Company's ultimate parent company and controlling party is BAC, a company organised and existing under the laws of the State of Delaware in the US, which produces consolidated financial statements available for public use. The principal executive offices of BAC is as follows: Bank of America Corporate Center, 100 North Tryon Street, NC1-007-56-06, Charlotte, North Carolina 28255.

The parent company of the largest and smallest group into which the Company's financial statements are consolidated is BAC (NYSE: BAC). Copies of BAC's financial statements can be obtained from either of the following website locations: <http://investor.bankofamerica.com> or www.sec.gov/.

These financial statements are the separate financial statements of the Company, prepared in accordance with Financial Reporting Standard 101, 'Reduced Disclosure Framework' (FRS 101). The financial statements have been prepared on a historical cost basis, modified to include the measurement of certain financial assets and liabilities at fair value, and in accordance with the Companies Act of 2006. The Company does not maintain historical cost information on items held at fair value as this is not relevant to the operation of the business.

FRS 101 set out the disclosure exemptions for the individual financial statements of entities that otherwise apply the recognition, measurement and disclosure requirements of UK adopted International Accounting Standards. References to accounting standards in these financial statements will accordingly relate to applicable International Financial Reporting Standards ("IFRS") and International Accounting Standards ("IAS") as adopted by the UK.

The preparation of financial statements in conformity with FRS 101 requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in note 3 Critical Accounting Estimates and Judgements.

The financial statements have been presented in US dollars, which is also the functional currency of the Company, and all values are rounded to the nearest million, except as otherwise indicated. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

The directors have a reasonable expectation, based on current and anticipated future performance, that the Company will continue in operational existence and has sufficient resources to meet its liabilities as they fall due for a period of 12 months from the date of approval of the annual report and financial statements. The financial statements of the Company have, therefore, been prepared on a going concern basis. Disclosures in respect of liquidity risk and capital management are set out in note 31 Risk Management.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

1. CORPORATE INFORMATION AND BASIS OF PREPARATION (continued)

These financial statements have been approved and authorised for issue by the Board on 19 March 2024. The directors have the power to amend and reissue the financial statements.

The Company has taken advantage of the exemption in Section 401 of the Companies Act 2006 from the obligation to prepare and deliver consolidated financial statements as the Company is a wholly owned subsidiary of BAC, which prepares consolidated financial statements that include the Company. Accordingly, these financial statements present information about the Company as an individual undertaking and not about its group.

The Company has taken advantage of the following disclosure exemptions under FRS 101:

- the requirements of paragraphs 45(b) and 46-52 of IFRS 2 Share based payment
- the requirements of paragraphs 40 (A-D) of IAS 1 Presentation of Financial Statements to disclose a third balance sheet on retrospective accounting policy changes, restatements, or reclassifications
- the requirements of IAS 7 Statement of Cash Flows
- the requirements of paragraphs 30 and 31 of IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors
- the requirements in IAS 24 Related Party Disclosures to disclose related party transactions entered into between two or more members of a group, provided that any subsidiary which is a party to the transaction is wholly owned by such a member.

2. ACCOUNTING POLICIES

The principal accounting policies, which have been applied consistently throughout the current and prior year, except where noted, are set out below.

2.1 NEW AND AMENDED ACCOUNTING STANDARDS AND POLICIES

In the current year, the Company has applied a number of amendments to IFRS Accounting Standards issued by the International Accounting Standards Board (IASB) that are mandatorily effective for an accounting period that begins on or after 1 January 2023. Their adoption has not had any material impact on the disclosures or on the amounts reported in these financial statements.

Amendments to IAS 12, Income Taxes: International Tax Reform Pillar Two Model Rules

In December 2021, the Organisation for Economic Co-operation and Development ("OECD") issued model rules for a new global minimum tax framework, also known as the 'Pillar Two' rules. On 23 May 2023, the IASB published International Tax Reform—Pillar Two Model Rules – Amendments to IAS 12. The standard introduced a mandatory temporary exception to the accounting for deferred taxes arising from the jurisdictional implementation of the Pillar Two model rules, which was effective immediately. The Company has adopted the mandatory temporary exception.

Pillar Two legislation was enacted in the UK, the jurisdiction in which the Company is incorporated, and will come into effect from 1 January 2024. Since the Pillar Two legislation was not effective at the reporting date, the Company has no related current tax exposure.

Under the Pillar Two legislation, the Company is liable to pay its allocation of top-up tax for the difference between the Group's Global Anti-Base Erosion ("GloBE") effective tax rate in the UK and the 15% minimum rate.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.1 NEW AND AMENDED ACCOUNTING STANDARDS AND POLICIES (continued)

The Company does not anticipate recording material top-up taxes in respect of Pillar Two given it is expected that the Group is expected to have a GloBE effective tax rate above the 15% minimum tax rate in the UK. Future guidance and enacted legislation could change this evaluation.

IFRS 17, Insurance Contracts

IFRS 17 replaces IFRS 4 "Accounting for insurance contracts" and provides the first comprehensive guidance on accounting for insurance contracts, defining such contract as one that transfers material insurance risk. The Company has performed an assessment of the potential impact and have not identified any material insurance risk within the Company's portfolios that would fall under the new standard. The Company continues to monitor contracts on an ongoing basis.

Foreign exchange ("FX") gains and loss

As allowed by IAS 1, the Company has changed its policy for reporting FX losses to present them in the same line as its FX gains, as it believes this is a better presentation of the net activities, as it aligns the FX gains and losses with the gains and losses of the instruments to which they relate. As part of the change, the Company reclassified \$10 million for 2023 and \$167 million for 2022 from administrative expenses to other operating revenue.

The foreign exchange losses for 2022 of \$167 million have been restated. The restatement impacted the following notes:

- Income Statement and notes to the Income statement:
 - Administrative expense decreased by \$167 million.
 - Other operating revenue decreased by \$167 million.
- Segmental reporting:
 - Net operating revenue decreased by \$167 million.

Standards issued but not yet effective

There are several new standards and amendments to standards published but not yet mandatory for the current reporting period. To the extent, which is known or reasonably estimable, none of these developments is expected to have a material impact on the Company's financial statements in the period of initial application.

2.2 FOREIGN CURRENCIES

Monetary assets and liabilities denominated in foreign currencies are subsequently re-translated into the functional currency using the exchange rates prevailing at the reporting date. Exchange gains and losses on monetary assets and liabilities are recognised in the income statement.

Changes in the fair value of monetary securities denominated in foreign currency classified as FVOCI are analysed between exchange gains and losses resulting from changes in the amortised cost of the security and other changes in the carrying amount of the security.

Exchange gains and losses related to changes in amortised cost are recognised in profit or loss, and other changes in carrying amount are recognised in other comprehensive income.

Non-monetary assets and liabilities in a foreign currency that are not measured at fair value are not subsequently re-translated for movements in prevailing exchange rates. Exchange gains and

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.2 FOREIGN CURRENCIES (continued)

losses on non-monetary financial assets and liabilities held at Fair value through profit or loss ("FVPL") are recognised in the income statement as part of the fair value gain or loss. Exchange gains and losses on non-monetary financial assets measured at fair value through other comprehensive income are included in other comprehensive income.

2.3 INTEREST INCOME AND EXPENSE

Amortised cost and effective interest rate

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured on initial recognition less the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount and, for financial assets, adjusted for any expected credit loss allowance.

The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (that is to say, the amortised cost before any impairment allowance) or to the amortised cost of a financial liability.

When calculating the effective interest rate for financial instruments other than credit-impaired assets, the Company estimates cash flows considering all contractual terms of the financial instrument, but does not consider expected credit losses. For financial assets that are credit-impaired at initial recognition, a credit-adjusted effective interest rate is calculated using estimated future cash flows including expected credit losses.

The calculation of the effective interest rate includes all amounts received or paid by the Company that are an integral part of the overall return, direct incremental transaction costs related to the acquisition or issue of a financial instrument and all other premiums and discounts.

Calculation of interest income and expense

Interest income and expense for all financial instruments measured at amortised cost are recognised on an accrual basis using the effective interest method. Interest income on interest bearing financial assets measured at fair value through other comprehensive income ("FVOCI") under IFRS 9 'Financial instruments' is also recorded using the effective interest rate method.

The effective interest rate is applied to the gross carrying amount of the financial asset (for non-credit impaired assets) or to the amortised cost of the liability.

For financial assets that have become credit-impaired subsequent to initial recognition, the effective interest rate is applied to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

For financial assets that were credit-impaired on initial recognition, the credit-adjusted effective interest rate is applied to the amortised cost of the financial asset. The calculation of interest income does not revert to a gross basis, even if the credit risk of the asset improves.

Interest income and expense on all trading assets and liabilities, and other financial instruments measured at FVPL, are recognised using the contractual interest rate in net trading revenues and net gains and losses on other financial instruments at FVPL, respectively.

Negative interest on financial assets measured at amortised cost or FVOCI is recognised through

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.3 INTEREST INCOME AND EXPENSE (continued)

interest expense, and negative interest on financial liabilities measured at amortised cost is recognised through interest income.

2.4 OPERATING REVENUES

The Company has disclosed operating revenues instead of turnover as this more accurately reflects the results and nature of the Company's activities.

Net trading revenues

Trading revenue comprises realised and unrealised gains and losses on trading, interest income and expense on FVPL investments, dividends, and gains and losses on derivatives held for the purpose of hedging foreign currency exposure and gains and losses on commodities. Unrealised gains and losses, which represent changes in fair value of inventories are also recognised within trading revenue as they arise.

Net gains and losses from other financial instruments at FVPL

Net income from other financial instruments at FVPL relates to financial assets and financial liabilities designated as FVPL, non-trading assets and liabilities measured mandatorily at fair value through profit or loss. The net income includes fair value changes and interest.

The company's revenue recognition accounting policies for activities included in other operating revenues are below.

Investment and brokerage services

Brokerage fees include income earned from transaction-based services that are performed as part of investment management services and are based on a fixed price per unit or as a percentage of the total transaction amount. Brokerage fees are earned when the Company fills customer orders to buy or sell various financial products or when it acknowledges, affirms, settles and clears transactions and/or submits trade information to the appropriate clearing broker.

Certain customers pay brokerage, clearing and/or exchange fees imposed by relevant regulatory bodies or exchanges in order to execute or clear trades. These fees are recorded net and are not reflected in the transaction price, as the Company is an agent for those services.

Investment banking income

Investment banking income includes underwriting, financial advisory services, and syndication fee income. In accordance with IFRS 15 Revenue from contracts with customers, revenues from these services are recognised when the performance obligations related to the underlying transactions are completed, as detailed below.

Underwriting income consists of fees earned for the placement of a customer's debt or equity securities. The revenue is generally earned based on a percentage of the fixed number of shares or principal placed. Once the number of shares or notes is determined and the service is completed, the underwriting fees are recognised.

Financial advisory services income consists of fees earned for advising customers with transactions related to mergers and acquisitions and financial restructuring. Revenue varies depending on the size and number of services performed for each contract and is generally contingent on successful execution of the transaction. Revenue is typically recognised once the transaction is completed and all services have been rendered. Additionally, the Company may

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.4 OPERATING REVENUES (continued)

earn a fixed fee in merger and acquisition transactions to provide a fair opinion, with the fees recognised when the opinion is delivered to the customer.

Syndication fee income represents fees earned as the agent responsible for structuring, arranging and administering a loan syndication. Revenue is typically recognised once the transaction is completed and all services have been rendered.

Practical expedient

The Company applied the practical expedient under IFRS 15 and did not disclose the value of any open performance obligations at 31 December 2023, as its contracts with customers generally have a fixed term that is less than one year, an open term with a cancellation period that is less than one year, or provisions that allow the Company to recognise revenue at the amount it has the right to invoice.

Other operating gains and losses

Other operating income includes foreign exchange gains and losses and items not determined to be part of normal trading activities.

Service fee income from affiliates

Service fee income consists of charges made to affiliated undertakings to remunerate the Company for services provided or to reimburse the Company for expenditure incurred. Service fees are recognised as the performance obligation is satisfied which is generally aligned with when the Company is entitled to the compensation, which may be on completion of an individual performance obligation or over time as the performance obligation is performed. Service fee income is computed under arm's length principles in accordance with BAC's Global Transfer Pricing Policy.

2.5 RETIREMENT BENEFIT SCHEMES

The Company participates in defined benefit and defined contribution pension schemes in the UK.

For the defined benefit scheme, the Company recognises a net asset or liability, being the difference between the present value of the defined benefit obligation at the end of the reporting period and the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality UK corporate bonds that have terms to maturity approximating to the terms of the related pension obligation.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to shareholders' funds in other comprehensive income ("OCI") in the period in which they arise.

The income statement includes interest charged or credited on the defined benefit assets and liabilities, the impact of foreign currency revaluation and service costs. This cost is included in administrative expenses in the income statement.

The Company also operates defined contribution plans which receive contributions calculated as a percentage of each employee's plan salary based on their length of service. The Company's legal or constructive obligation for these plans is limited to the contributions. The contributions are recognised as staff costs when they are due.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.6 INVESTMENTS

Investments in subsidiary companies

A subsidiary is defined as an entity that is controlled by another entity. An investor controls an investee when it is exposed or has rights to variable returns from its involvement with the investee and/or has the ability to affect those returns through its power over the investee. Where the Company holds equity or equity-like instruments in a subsidiary, the balance is held within investments in subsidiaries. Investments in subsidiaries are held at cost less provision for impairment. Other non-equity holdings in special purpose entities are recognised at fair value within trading assets.

At each reporting date, the Company reviews the carrying amounts of its investments in subsidiary companies to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. The recoverable amount is the higher of the fair value less costs to sell and the value in use. In the event of impairment, the carrying amount of the asset is reduced to its recoverable amount and the amount of the impairment loss is recognised in the income statement.

Other investments

Other investments represent investments in unlisted equity investments which are mandatorily classified at FVPL in accordance with IFRS 9 Financial Instruments. Profit or loss on disposal of investments and dividends received from investments are disclosed in the income statement within net gains and losses from other financial instruments at FVPL.

2.7 FINANCIAL ASSETS

The Company recognises financial assets in the statement of financial position when it becomes a party to the contractual provisions of the instrument. Management determines the classification of the Company's financial assets at initial recognition. The Company classifies its financial assets as measured at: amortised cost, FVOCI or FVPL.

A financial asset is classified as measured at amortised cost if it meets both of the following conditions and is not designated as at FVPL:

1. The asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and,
2. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument is classified as measured at FVOCI only if it meets both of the following conditions and is not designated as at FVPL:

1. The asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and,
2. The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Company's cash and debtors, securities borrowed for cash, and reverse repurchase agreements that are not considered to be managed on a fair value basis, meet the requirements to be measured at amortised cost. In addition, investments in debt securities held to meet every day and regulatory liquidity requirements meet the requirements to be measured at FVOCI.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.7 FINANCIAL ASSETS (continued)

All other financial assets, including trading assets, are classified as measured at FVPL. IFRS 9 allows an entity to irrevocably elect to present subsequent changes in FVOCI. The Company has not elected to present changes in the fair value of non-trading equity investments in OCI.

In addition, on initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets are not reclassified subsequent to their initial recognition, except in the period after the Company changes its business model for managing those financial assets.

The Company presents client cleared derivatives on balance sheet consistent with financial instrument recognition rules and supported by the client clearing legal framework which considers such arrangements as meaning that the clearing member becomes a contractual party to the contracts cleared through a Central Clearing Counterparties ("CCP").

2.8 CASH AT BANK AND IN HAND

Cash at bank and in hand includes cash on hand and deposits held with financial institutions.

2.9 FINANCIAL LIABILITIES

The Company recognises financial liabilities in the statement of financial position when it becomes a party to the contractual provisions of the instrument. The Company classifies its financial liabilities in the following categories: amortised cost or FVPL.

Financial liabilities are classified as measured at amortised cost, except for those classified at FVPL which comprise of those held for trading or designated at FVPL.

A financial liability is classified at FVPL when it is held for trading. A liability is held for trading if it is incurred principally for the purpose of repurchasing in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking.

Financial liabilities are designated at FVPL to significantly reduce measurement inconsistencies that would arise if related instruments were treated as held for trading and the underlying financial liabilities were carried at amortised cost, or when doing so is consistent with the Company's risk management strategy.

Trading liabilities, including derivative liabilities held for trading or held for risk management purposes, are measured at FVPL. Structured debt and similar instruments that do not meet the definition of a derivative are presented as creditors and are designated as at FVPL. Repurchase agreements and securities loaned transactions are either designated at FVPL or held at amortised cost. All remaining financial liabilities including customer payables, amounts owed to brokers, dealers and clearing houses and other creditors are held at amortised cost.

When the Company designates a financial liability as at FVPL, the amount of change in the fair value of the liability that is attributable to changes in its credit risk is presented in OCI as a debit valuation adjustments reserve. However, if on initial recognition of the financial liability the Company assesses that presentation in OCI would create, or enlarge, an accounting mismatch, then the gains and losses attributable to changes in the credit risk of the liability are also presented in profit or loss. Amounts presented in the debit valuation adjustments reserve are not subsequently transferred to profit or loss. When these instruments are derecognised, the related cumulative amount in the reserve is transferred to retained earnings.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.10 IMPAIRMENT

The Company calculates a probability-weighted loss allowance for Expected Credit Loss ("ECL") on its financial assets that are debt instruments, financial guarantees, and commitments that are not measured at FVPL. The Company's credit exposures under these instruments are typically significantly less than twelve months in duration or otherwise are generally assessed as having no significant increase in credit risk since initial recognition. As a result, ECL is calculated on a twelve-month basis. In the event that significant financial difficulty or default of a counterparty indicates that an asset is credit-impaired, the ECL allowance is assessed on a lifetime basis, taking into account ECL that result from all possible default events over the expected life of the financial instrument.

Debt securities are written off, either partially or in full, when there is no realistic prospect of recovery. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

2.11 RECOGNITION OF DAY ONE PROFIT OR LOSS

Evidence of the fair value of a financial instrument at initial recognition is the transaction price (i.e., the fair value of the consideration given or received), unless the fair value of that instrument is evidenced by comparison with other observable current market transactions in the same instrument, or is based on a valuation technique whose variables include only data from observable markets.

The Company has entered into transactions where fair value is determined using valuation models for which not all inputs are market observable prices or rates. The difference between the transaction price and the model valuation, commonly referred to as "day one profit or loss", is not recognised immediately in the income statement. It is kept in either the debtor or creditor account in the balance sheet depending upon whether it's a loss or a gain.

The timing of recognition of deferred day one profit or loss is determined individually and is either deferred until the instrument's fair value can be determined using market observable inputs or realised through disposal or settlement. Day one profit or loss is deferred on instruments classified as level 3 within the hierarchy defined in IFRS 13 - Fair Value Measurement (see note 33 Fair Value Disclosures), and a minimum threshold is applied per trade which on an aggregate basis is immaterial to the Company.

The financial instrument is subsequently measured at fair value. Subsequent changes in fair value are recognised immediately in the income statement.

2.12 DIVIDEND DISTRIBUTION

Dividend distributions to the Company's shareholder are recognised as a liability in the Company's financial statements in the period in which the dividends are approved by the Company's shareholder.

2.13 PHYSICAL COMMODITIES

Physical commodity contracts are considered inventory items in the scope of IAS 2 Inventories and therefore are not considered financial instruments. However, in line with IAS 2, as a broker dealer inventory is held at fair value less costs to sell with changes in value recognised as net trading revenue as they arise.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.14 CURRENT AND DEFERRED TAXATION

The tax expense for the period comprises current and deferred tax. Tax is recognised in the income statement, except to the extent that it relates to items recognised in OCI or directly in shareholders' funds. In this case, the tax is recognised in OCI or directly in shareholders' funds, respectively.

Current tax, including UK corporation tax and foreign taxes, is provided for at amounts expected to be paid or recovered using the tax rates and laws that have been enacted or substantively enacted by the reporting date.

Deferred tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred tax is determined using tax rates and laws that have been enacted or substantively enacted by the reporting date and is measured at the average tax rates that are expected to apply when the related deferred income tax asset is realised or the deferred tax liability is settled.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised over the Company's planning horizon which is three years.

2.15 SECURITIES FINANCING TRANSACTIONS

The Company enters into secured financing transactions to accommodate customers and earn interest rate spreads (also referred to as "matched-book transactions"), to obtain securities for settlement and to finance trading positions. Such transactions are primarily entered in connection with resale and repurchase agreements, securities borrowed and loaned transactions and margin loans.

Resale and repurchase agreements are accounted for as secured financing transactions. Resale agreements are recorded at amortised cost, being their contractual amounts plus accrued interest, or mandatorily at FVPL, as a result of the business model assessment under IFRS 9. Repurchase agreements are recorded at amortised cost or at fair value under the fair value option election to eliminate accounting mismatch. Resale and repurchase agreements recorded at fair value are generally valued based on pricing models that use inputs with observable levels of price transparency.

Contractual interest coupon on resale and repurchase agreements at amortised cost are recorded as interest income or interest expense, as appropriate. Where resale and repurchase agreements are recorded at FVPL, interest is included with changes in the fair value of resale and repurchase agreements and presented in net gains and losses from other financial instruments at FVPL.

Securities borrowed transactions require the Company to provide the counterparty with collateral in the form of cash, letters of credit, or other securities. The Company receives collateral in the form of cash or other securities for securities loaned transactions. Securities borrowed transactions are recorded at amortised cost, being the amount of cash collateral advanced. Securities loaned transactions are recorded at amortised cost or at FVPL under the fair value option election. Where transactions are at FVPL, the fees paid or received by the Company are included with changes in the fair value and presented in net gains and losses from other financial instruments at FVPL. For all other securities loaned transactions, the fees paid or received by the Company are recorded as interest income or expense, as these instruments are accounted at amortised cost.

Customer margin loans provided by the Company to clients are collateralised by assets of the clients including securities. In many cases, the Company is permitted by contract or practice to sell or repledge the collateral. Customer margin loans are recorded at amortised cost.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.15 SECURITIES FINANCING TRANSACTIONS (continued)

The Company's policy is to obtain possession of collateral with a market value equal to or in excess of the principal amount loaned under the agreements. To ensure that the market value of the underlying collateral remains sufficient, collateral is generally valued daily and the Company may require counterparties to deposit additional collateral or may return collateral pledged when appropriate.

Securities financing transactions give rise to negligible credit risk as a result of these collateral provisions. These instruments therefore are managed based on market risk rather than credit risk. Substantially all repurchase and resale and securities borrowed and loaned activities are transacted under master agreements that give the Company the right, in the event of default of the counterparty, to liquidate collateral held and to offset receivables and payables with the same counterparty. The Company offsets certain repurchase and resale agreement balances with the same counterparty on the statement of financial position (see note 30 Offsetting).

Securities received under resale and securities borrowed agreements and securities delivered under repurchase and securities lending agreements are generally not recognised on or derecognised from the statement of financial position as the risks and rewards of ownership are not obtained from or relinquished to the counterparty. Subsequent sales of securities that the Company has borrowed are recognised as trading liabilities and are measured at fair value.

2.16 OFFSETTING

Where the Company has the legal right to net settle and intends to do so (with any of its debtors or creditors) on a net basis, or to realise the asset and settle the liability simultaneously, the balance included within the financial statements is the net balance due to or from the counterparty. Counterparties are assessed to identify if net settlement criteria are met. Where this is achieved, assets and liabilities facing the counterparty are offset (see note 30 Offsetting).

CCP are individually assessed to identify if net settlement criteria are met. Where this is achieved, assets and liabilities facing the CCP are offset.

2.17 DERECOGNITION OF FINANCIAL ASSETS AND LIABILITIES

The Company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire or it transfers substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a secured borrowing for the cash proceeds received.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset derecognised) and the sum of the consideration received and any cumulative gain that had been recognised in OCI is recognised in profit or loss.

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

Modifications to the terms of financial assets and liabilities may result in derecognition if it is deemed that the modification results in an expiry of the contractual rights and obligations of the original instrument, see note 2.21 Modifications of Financial Assets and Financial Liabilities for further details.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.18 TRADE AND SETTLEMENT DATED TRANSACTIONS

Funding financial instruments (e.g., securities financing transactions) are recognised and derecognised on the statement of financial position on a settlement date basis. Trading financial instruments (e.g., debt securities, equities, derivatives, etc.) are recognised and derecognised on the statement of financial position on a trade date basis and trading loans are recognised and derecognised on a settlement date basis.

2.19 SHARE BASED PAYMENTS

BAC grants equity based payment awards to employees of the Company under various incentive schemes.

For most awards, expense is generally recognised proportionately over the vesting period net of estimated forfeitures, unless the employee meets certain retirement eligibility criteria. For awards to employees that meet retirement eligibility criteria, the Company accrues the expense in the year prior to grant. For employees that become retirement eligible during the vesting period, the Company recognises expense from the grant date to the date on which the employee becomes retirement eligible, net of estimated forfeitures.

As this is a group share based payment arrangement, all awards are treated by the Company as equity settled share based payment plans and these awards are measured based on the fair value of those awards at grant date. The fair value determined at the grant date is expensed over the vesting period, based on the Company's estimate of the number of shares that will eventually vest.

The Company has entered into a chargeback agreement with BAC under which it is committed to pay BAC the market value at grant date as well as subsequent movements in fair value of those awards to BAC at the time of delivery to its employees. The share based payment transaction and chargeback agreement creates a total charge to the profit and loss based on the grant date fair value of the awards adjusted for subsequent movements in the fair value of those awards prior to delivery. This is recorded in service fee income or service fee expense.

The fair value determined at the grant date expensed over the vesting period is recognised under staff cost whereas the subsequent movement in the fair value prior to delivery is recorded in service fee income or service fee expense.

2.20 FINANCIAL GUARANTEES AND COMMITMENTS

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of the debt.

Financial guarantees are initially recognised in the financial statements at fair value on the date the guarantee was given. Subsequent to initial recognition, the Company's liabilities under such guarantees are measured at the higher of the initial measurement, less amortisation calculated to recognise in the income statement the fee income earned on a straight line basis over the life of the guarantee, and the amount determined in accordance with the ECL model.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

2. ACCOUNTING POLICIES (continued)

2.21 MODIFICATIONS OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES

If the terms of a financial asset or financial liability are modified, the Company evaluates whether the new terms of the modified instrument are substantially different to the original terms. If the new terms are substantially different, then the original instrument is derecognised and a new instrument, based on the modified terms, is recognised at fair value. Differences in the carrying amount are recognised in profit or loss as a gain or loss on derecognition.

If the contractual terms of the modified asset or liability carried at amortised cost are not substantially different, then the modification does not result in derecognition. Instead, the Company recalculates the gross carrying amount of the financial instrument based on the revised cash flows of the financial instrument and recognises a modification gain or loss in profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets).

If such a modification of a financial asset is carried out because of financial difficulties of the borrower, then the gain or loss is presented together with impairment losses. In other cases, it is presented as interest income.

Where modification does result in derecognition, the date of renegotiation is considered to be the date of initial recognition for impairment calculation purposes, including for the purposes of determining where a significant increase in credit risk has occurred.

A restructure can be considered substantial on a qualitative or quantitative basis.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements in conformity with FRS 101 requires the use of accounting estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. It also requires management to exercise judgement in the process of applying the Company's accounting policies. The estimates and assumptions that have a significant risk of causing an adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

Estimates

a) Valuation of financial instruments

Fair value is defined under IFRS 13 - Fair Value Measurement, as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Company's policy for valuation of financial instruments is included in note 33 Fair Value Disclosures. The fair values of financial instruments that are not quoted in financial markets are determined by using valuation techniques based on models such as discounted cash flow models, option pricing models and other methods consistent with accepted economic methodologies for pricing financial instruments. These models incorporate observable, and in some cases unobservable inputs including security prices, interest rate yield curves, option volatility, currency rates, commodity prices or equity prices and correlations between these inputs.

Where models are used to determine fair values, they are periodically reviewed by qualified personnel independent of the area that created them. All models are certified before they are used, and models are calibrated to ensure that output reflects actual data and comparative market prices. These estimation techniques are necessarily subjective in nature and involve several assumptions.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

b) Pensions

The Company has an obligation to pay pension benefits to certain employees and former employees of the BAC group. The cost of these benefits and the present value of the obligation depend on a number of factors, including: life expectancy, salary increases, asset valuations and the discount rate on corporate bonds. Management utilises the valuation provided by actuaries and estimates these factors in determining the net pension obligation or surplus in the statement of financial position.

The assumptions reflect historical experience and current trends. See note 16 Pension for further information concerning the defined benefit pension scheme.

Judgements

a) Classification of financial assets

The classification of financial assets is based on an assessment of the business model within which the assets are held. The Company follows the guidance of IFRS 9 in determining whether the contractual terms of the financial asset are solely payments of principal and interest on the principal amount outstanding. In some cases, this determination requires significant judgement, for example when grouping portfolios of assets managed under the same business model or when assessing the impact of contractual terms for contractually linked instruments.

In order to perform the business model assessment, the Company evaluates, among other factors, the strategy of the business and types of management information used to measure performance of the portfolio as well as information regarding sales from the portfolio. Contractual cash flow information is considered by reviewing transaction and structure documentation in conjunction with line of business experts to ensure that relevant terms are analysed. See accounting policy note 2.7 Financial Assets for further details regarding classification of financial assets.

b) Deferred tax

The Company has recognised a deferred tax asset in its financial statements which requires judgement for determining the extent of its recoverability at each reporting point. The Company assesses recoverability with reference to Board approved forecasts of future taxable profits. These forecasts require the use of assumptions and estimates. Where the temporary differences are related to losses, relevant tax law is considered to determine the availability of the losses to offset against the future taxable profits. See note 20 Deferred Tax for further information concerning deferred tax.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

4. INTEREST INCOME AND EXPENSE

	2023 \$M	2022 \$M
Interest income		
Resale agreements and securities borrowed transactions	2,338	733
Debtors, cash at bank and in hand	2,794	1,092
	5,132	1,825
Interest expense		
Repurchase agreements and securities loaned transactions	(1,790)	(910)
Creditors, bank loans and overdrafts	(3,731)	(1,256)
Negative interest on debt securities at FVOCI	(3)	(17)
	(5,524)	(2,183)
Net interest expense	(392)	(358)

Interest income due from affiliated companies within resale agreements and securities borrowed transactions was \$1,984 million (2022: \$653 million), and within debtors, cash at bank and in hand was \$909 million (2022: \$302 million).

Interest expense due to affiliated companies within repurchase agreements and securities loaned transactions was \$796 million (2022: \$364 million), and within creditors, bank loans and overdrafts was \$2,012 million (2022: \$670 million).

5. NET GAINS FROM OTHER FINANCIAL INSTRUMENTS AT FAIR VALUE THROUGH PROFIT OR LOSS

	2023 \$M	2022 \$M
Gains from other financial instruments mandatorily at fair value through profit or loss	2,436	434
(Losses)/ gains from other financial instruments designated at fair value through profit or loss	(2,336)	935
	100	1,369

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

6. OTHER OPERATING REVENUES

	2023	2022
	\$M	\$M
Service fee income from affiliates	1,332	1,466
Investment and brokerage services	471	482
Investment banking income		
Underwriting income	198	157
Financial advisory services	119	145
Syndication fees	9	12
Other operating gains / (losses) *	154	(40)
Total other operating revenues	<u>2,283</u>	<u>2,222</u>

Service fee income from affiliates includes Remote Trading fees of \$502 million (2022: \$492 million), IBK fees of \$341 million (2022: \$310 million) and Equity Network Support fees of \$257 million (2022: \$286 million).

Remote trading services occur where a trader is employed in one legal entity and is managing risk and positions on a different legal entity.

IBK fees consist of \$221 million (2022: \$162 million) IBK Franchise fees and \$120 million IBK service fees (2022: \$148 million) booked in affiliates. IBK Franchise fees are paid by BAC and US affiliates to compensate the Company for operating the Global Banking business from which BAC and other US affiliates accrue benefits. IBK service fees reflect the revenues earned by the Company's investment banking business initially recorded in other affiliates.

The Equity Network Support fees are being paid by US affiliates to compensate the Company for operating its Cash Equities business, as part of BAC's Global Markets business, from which those US affiliates accrue benefits.

* Other operating gains/(losses) include foreign exchange losses of \$10 million (2022: \$167 million) which were previously presented in administrative expenses. Refer to note 2.1 New and Amended Accounting Standards and Policies for further details.

7. ADMINISTRATIVE EXPENSES

	2023	2022
	\$M	\$M
Staff costs (see note 9)	1,095	1,113
Service fee expenses	2,719	2,594
Brokerage, clearing and exchange fees	814	962
Impairment on investment in subsidiaries (see note 14)	—	14
Other operating expenses	426	360
	<u>5,054</u>	<u>5,043</u>

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

8. AUDITORS' REMUNERATION

The Company paid the following amounts to their auditors in respect of the audit of the financial statements and for other services provided to the Company:

	2023	2022
	\$M	\$M
Fees payable to the Company's auditors for the audit of the Company's financial statements	2.3	2.5
Fees payable to the Company's auditors for audit related assurance services	0.9	0.9
	3.2	3.4

Included within fees payable to the Company's auditors for audit related assurance services was \$0.4 million (2022: \$0.4 million) in relation to services provided for client money (Client Assets Assurance Standard) reporting to the FCA.

9. STAFF COSTS

Staff costs, including directors' remuneration, were as follows:

	2023	2022
	\$M	\$M
Wages and salaries	926	970
Social security costs	128	104
Other pension costs	41	39
	1,095	1,113

Included within wages and salaries are charges relating to share-based compensation plans \$195 million (2022: \$111 million), see note 34 Share Based Payments for further details.

Included within other pension costs is a credit of \$9 million (2022: credit of \$2 million) relating to the defined benefit pension scheme. For further details see note 16 Pension.

The average monthly number of employees, including the directors, during the year was as follows:

	2023	2022
	No.	No.
Trading, sales and advisory	1,120	1,084
Support, operations and technology	1,127	1,011
	2,247	2,095

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

10. DIRECTORS' REMUNERATION

Of the directors that served during the year and up to the date of approval of this report 8 (2022: 9) directors were remunerated by the Company and the amounts included below are those relating to their services as directors for the Company and its subsidiaries based on a time allocation basis. Emoluments in relation to services performed for other group companies are not disclosed in the Company's financial statements.

Remuneration paid to directors of the Company was:

	2023	2022
	\$	\$
Emoluments	12,744,665	9,005,392
Contributions to defined contribution pension schemes	12,258	5,439
Compensation for loss of office	700,297	—
	13,457,220	14,444,830

	2023	2022
	No.	No.
Number of directors who:		
By whom shares are receivable or have been received under long term incentive schemes	4	5
Were members of a defined benefit pension scheme	—	1
Were members of a defined contribution pension scheme	4	5

Remuneration disclosed includes amounts paid to the highest paid director as follows:

	2023	2022
	\$	\$
Emoluments	4,813,211	4,296,126
Contributions to defined contribution pension schemes	2,600	1,749
	4,815,811	4,297,875

The highest paid director did not exercise share options in the current or prior year.

During the current and preceding year the highest paid director received shares under a long-term incentive scheme.

The highest paid director was not a member of defined benefit scheme.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

11. TAX ON PROFIT

	2023 \$M	2022 \$M
Corporation tax		
UK corporation tax	104	59
Adjustment in respect of prior year	(21)	12
Foreign tax on income for the year	121	66
Bank surcharge	53	68
Total current tax	257	205
Deferred tax		
Origination and reversal of temporary differences	26	(68)
Impact of change in tax rates	(10)	(31)
Adjustments in respect of prior year	(13)	—
Impact of bank surcharge	2	5
Total deferred tax	5	(94)
Total tax expense for the year	262	111

Factors affecting tax expense for the year

The table below shows the reconciliation between the actual tax expense (benefit) and that which would result from applying the standard UK corporation tax rate to the Company's profit before tax.

	2023 \$M	2023 Percent	2022 \$M	2022 Percent
Profit before tax	1,538	100.0 %	1,222	100.0 %
Tax at blended standard rate of corporation tax in the UK of 23.5% (2022 - 19%)	362	23.5 %	232	19.0 %
Effects of:				
Expenses not deductible for tax purposes	12	0.8 %	8	0.7 %
Non-taxable income	(5)	(0.3)%	(1)	(0.1)%
Adjustments in respect of prior year	(21)	(1.4)%	12	1.0 %
Impact of bank surcharge on deferred tax	2	0.1 %	5	0.4 %
Impact of bank surcharge on current tax	53	3.4 %	68	5.6 %
Changes in deferred tax recognised on tax losses	(55)	(3.5)%	(120)	(9.8)%
Changes in deferred tax recognised on temporary differences	(83)	(5.4)%	(67)	(5.5)%
Net impact of foreign taxes	7	0.5 %	5	0.4 %
Effects of changes in tax rate	(10)	(0.7)%	(31)	(2.5)%
Total tax expense for the year	262	17.0 %	111	9.1 %

The Company's effective tax rate for the year is 17.0% (2022: 9.1%).

The corporation tax rate increase to 25% (2022:19%) and bank surcharge decrease to 3% (2022: 8%) enacted in the UK Finance Act on 10 June 2021 and 24 February 2022, respectively. These changes were effective from 1 April 2023. Therefore, the current corporation tax has been calculated at a blended rate of 23.5% and bank surcharge at a blended rate of 4.2%.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

11. TAX ON PROFIT (continued)

Factors that may affect future tax charges

Factors that may affect future tax charges are disclosed in note 20 Deferred Tax.

12. SEGMENTAL REPORTING

The Company operates in three geographic regions, being EMEA, the Americas and APAC. Due to the highly integrated nature of international financial markets, the Company identifies its geographic performance based on the regional business unit structure. The methodology for allocating revenue to geographic regions is dependent on estimates and management judgement.

The table below presents the total net operating revenues of the Company by geographic region:

	2023	2022
	\$M	\$M
EMEA	4,432	3,708
Americas	451	773
APAC	1,709	1,784
Total net operating revenues*	6,592	6,265

Disposal of investments	—	(3)	(3)
At 31 December 2022	243	96	339

Investments in subsidiary companies

The Company has an investment of \$243 million (2022: \$243 million) in Fundo de Investimento Multimercado Iceberg - Credito Privado - Investimento No Exterior ("Iceberg"). The Company exercises power and control over Iceberg. It is therefore disclosed as a subsidiary undertaking in accordance with IFRS 10 - Consolidated Financial Statements. Under its legal form, Iceberg would not be classified as a subsidiary.

During the year, there was no net capital injection (2022: \$101 million capital injection), and there was no impairment (2022: \$14 million) in relation to Iceberg.

On 01 November 2023, the Company received a capital contribution of \$107 million from its parents in the form of the ordinary share capital of ML UK Capital Holdings Limited. The contribution was recorded at carrying value.

The Company has an investment of \$0.1 million (2022: \$0.1 million) in Merrill Lynch, Pierce, Fenner & Smith Limited ("MLPF&S Limited").

The Company's remaining investments in subsidiaries amount to \$381 (2022: \$381).

For further details on the Company's investments in subsidiaries, see note 15 Subsidiary Undertakings.

Other investments

Other investments, which are held at fair value through profit and loss in accordance with IFRS 9, consist of unlisted equity securities valued at \$126 million (2022: \$96 million). During the year, there was a \$30 million increase in fair market value of these securities (2022: \$2 million decrease). Additionally, no securities were sold during the year (2022: \$3 million).

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

15. SUBSIDIARY UNDERTAKINGS

The following are subsidiary undertakings of the Company:

Name	Class of shares	Holding	Principal activity
Bank of America UK Retirement Plan Trustees Limited	Ordinary	100%	Trustee of the Bank of America UK Retirement Plan and the Merrill Lynch (UK) Defined Contribution Plan
Chetwynd Nominees Limited	Ordinary	100%	Nominee company for affiliated companies
Citygate Nominees Limited	Ordinary	100%	Nominee company for affiliated companies
Iceberg	Quotas	100%	Government bonds, futures, stocks-equity cash and Bovespa index flexible options
Merrill Lynch Nominees Limited	Ordinary	100%	Nominee company for affiliated companies
MLPF&S Limited	Ordinary	100%	Intercompany funding
ML UK Capital Holdings Limited	Ordinary	100%	Intercompany funding
N. Y. Nominees Limited	Ordinary	100%	Nominee company for affiliated companies
S. N. C. Nominees Limited	Ordinary	100%	Nominee company for affiliated companies

During the year ML UK Capital Holdings Limited, the previous parent of the Company, became the fully owned subsidiary of MLI. There were no other changes to subsidiary undertakings and/or holding % during the year.

All of the above, except Iceberg, are incorporated in the UK and registered at: 2 King Edward Street, London, EC1A 1HQ. Iceberg is incorporated in Brazil and registered at: Av Pres Juscelino Kubitschek, 1909, 9th - 11th Floors, Torre Sul, Vila Nova Conceicao, Sao Paulo - 04543-907, Brazil.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

15. **SUBSIDIARY UNDERTAKINGS (continued)**

The total assets on the Company's statement of financial position relating to controlling interests in SPEs are \$474 million (2022: \$630 million). The total size of those SPEs, which is calculated as the principal outstanding of the SPE, is \$485 million (2022: \$630 million).

16. **PENSION**

The Company participates in a number of defined benefit and defined contribution pension schemes in the UK. The schemes are funded with the assets held in separate trustee administered funds.

Defined benefit scheme

The major defined benefit scheme is the final salary section of the Bank of America UK Retirement Plan (the "Plan"), which was closed to new entrants with effect from 30 June 1997 and to future accrual from existing members with effect from 30 June 2004. The funding cost relating to the Plan is assessed in accordance with the advice of independent qualified actuaries using the projected unit credit method.

The Company is one of a number of BAC employer companies based in the UK which participate in the Plan.

The Plan operates under the UK statutory Scheme Funding Regime established by the Pensions Act 2004. The last formal triennial funding valuation of the Plan's assets was carried out by a qualified actuary as at 31 December 2021 and showed the Plan's assets were in excess of its technical provisions.

The Company is able to utilise the whole of the Plan surplus in scenarios set out for the recognition of surpluses. Accordingly, there is no asset ceiling on the amount of surplus that is currently recognised in the statement of financial position.

The defined benefit plan is administered by a separate trust that is legally separated from the Company. By law, the board of trustees is required to act in the best interests of participants to the Plan and has the responsibility of setting investment, contribution, and other relevant policies.

The Company is deemed to be the sponsoring entity to the Plan and as a result, the Company recognises the present value of the defined benefit obligation, the fair value of the Plan assets, and the associated costs of the Plan.

	2023	2022
	\$M	\$M
Amounts recognised on the statement of financial position:		
Fair value of scheme assets	1,261	1,218
Present value of funded defined benefit obligations	(1,129)	(966)
Net pension asset recognised in the statement of financial position	132	252

In 2023, the increase in liabilities of the Plan were higher than the increase in the assets of the Plan leading to an overall reduction in the net asset recognised. The main factors driving the increase in Plan liabilities were a decrease in the discount rate (following a decrease in the yields on corporate bonds) and realised inflation and member movement experience over the year (resulting in higher than anticipated benefits being due). The increase in plan assets is largely due to change in exchange rates offset by decrease in the Plan's assets as a result of hedging against movements in government bond yields in order to reduce the volatility of the Plan's funding against its long-term government bond-based funding measure. Over the year government bond yields increased slightly, leading to a decrease in hedging asset values.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

16. PENSION (continued)

The movement in the defined benefit net asset over the year is as follows:

	Present value of obligation \$M	Fair value of plan assets \$M	Total \$M
2023			
As at 1 January 2023	(966)	1,218	252
Service cost	(4)	—	(4)
Interest (expense)/income	(48)	61	13
Pension (expense)/income recognised in income statement	(52)	61	9
Remeasurements in OCI:			
Losses on plan assets, excluding amounts included in interest (expense)/income	—	(52)	(52)
Gains from change in demographic assumptions	2	—	2
Losses from change in financial assumptions	(35)	—	(35)
Losses from plan experience	(61)	—	(61)
Total amount recognised in OCI	(94)	(52)	(146)
Exchange differences	(60)	73	13
Contributions:			
Employer	—	4	4
Payments from plan:			
Benefit payments	43	(43)	—
As at 31 December 2023	<u>(1,129)</u>	<u>1,261</u>	<u>132</u>

Approximately 5% of the liabilities are attributable to current employees, 57% to former employees and 38% to current pensioners.

Employer contributions of \$4 million were paid into the Plan in the year by the Company. No recharge was made for these costs to the other scheme participants. It is estimated that the Company will also pay contributions of \$1 million into the Plan in 2024.

MERRILL LYNCH INTERNATIONAL

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

16. PENSION (continued)

	Present value of obligation \$M	Fair value of plan assets \$M	Total \$M
2022			
As at 1 January 2022	(1,890)	2,313	423
Service cost	(6)	—	(6)
Interest (expense)/income	(32)	40	8
Pension (expense)/income recognised in income statement	(38)	40	2
Remeasurements in OCI:			
Losses on plan assets, excluding amounts included in interest (expense)/income	—	(839)	(839)
Gains from change in demographic assumptions	3	—	3
Gains from change in financial assumptions	730	—	730
Losses from plan experience	(28)	—	(28)
Total amount recognised in OCI	705	(839)	(134)
Exchange differences	190	(234)	(44)
Contributions:			
Employer	—	5	5
Payments from plan:			
Benefit payments	67	(67)	—
As at December 2022	<u>(966)</u>	<u>1,218</u>	<u>252</u>

Approximately 5% of the liabilities are attributable to current employees, 59% to former employees and 36% to current pensioners.

Employer contributions of \$5 million were paid in 2022 into the Plan in the year by the Company. No recharge was made for these costs to the other scheme participants.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

16. PENSION (continued)

The significant actuarial assumptions were as follows:

	2023	2022
Discount rate	4.65%	4.95%
RPI inflation	3.20%	3.20%
CPI inflation	2.70%	2.40%
Salary growth rate	4.70%	4.70%
Pension growth rate - subject to a 5% cap in any year	3.00%	2.95%
Pension growth rate - subject to a 3% cap in any year	2.15%	1.95%
Pension growth rate - fixed at 3%	3.00%	3.00%
Average life expectancy:		
Life expectancy for male aged 62	25.9	26.1
Life expectancy for female aged 62	27.8	27.8
Life expectancy at 62 for male currently aged 45	26.9	27.1
Life expectancy at 62 for female currently aged 45	28.8	28.9

The mortality assumptions are based on actuarial advice in accordance with published statistics and past experience and allow for expected future improvements in mortality rates. The salary and pension growth rates are all linked to inflation, with the exception of the fixed increase of 3%.

The Plan assets are invested in the following asset classes:

	2023	2022
	\$M	\$M
Return-seeking funds	148	181
Fixed-interest funds	139	112
Liability driven investments and money market instruments	676	638
Annuity buy-in	298	287
Total Plan assets	<u>1,261</u>	<u>1,218</u>

Of the \$1,261 million Plan assets, \$919 million (2022: \$882 million) are quoted within an active market which is split between return-seeking funds of \$104 million (2022: \$132 million) and fixed-interest funds of \$139 million (2022: \$112 million) and liability driven investments and money market instruments of \$676 million (2022: \$638 million).

In 2018, the Trustees of the Plan bought a bulk annuity to meet the future pension payments for all of its then retired members. The annuity is written in the name of the Trustees and remains an asset of the Plan. It is valued for accounting purposes using the same assumptions set out in the table, and its value is the same for both plan asset and present value of obligation purposes.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

16. PENSION (continued)

The Plan exposes the Company to a number of risks, the most significant of which are:

Volatility

The liabilities are calculated using a discount rate set with reference to corporate bond yields; if assets underperform this yield, this will create a deficit. The Plan holds a proportion of return-seeking assets which, though expected to outperform corporate bonds in the long-term, create volatility and risk in the short-term. The allocation to growth assets is monitored to ensure it remains appropriate given the Plan's long-term objectives.

Changes in bond yields

A decrease in corporate bond yields will increase the value placed on the Plan's liabilities for accounting purposes. Although the Plan's assets include a significant liability driven instruments portfolio that are designed to mitigate against a fall in government bond yields on a long-term funding measure, changes in credit spreads and differences between the long-term funding and accounting liabilities may mean that movements in the Plan's liabilities and assets do not match each other.

Inflation risk

A significant proportion of the Plan's benefit obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect against extreme inflation). However, the Plan's protection assets are also designed to protect the Plan against an increase in inflation.

Life expectancy

The majority of the Plan's liabilities are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the liabilities, although the Plan's annuity policy provides this protection on the corresponding part of the Plan's liabilities.

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

	Defined benefit obligation 2023 \$M	Estimated 2024 service cost \$M	Defined benefit obligation 2022 \$M	Estimated 2023 service cost \$M
Current figures as at 31 December	1,129	1	966	1
Following a 1.0% decrease in the discount rate				
Change	174	—	168	—
New value	1,303	1	1,134	1
Following a 1.0% increase in the inflation assumption				
Change	93	—	89	—
New value	1,222	1	1,055	1
Following an increase in life expectancy of one year				
Change	44	—	37	—
New value	1,173	1	1,003	1

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

16. PENSION (continued)

The above sensitivity analyses are based on a change in assumption, while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions might be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method (that is, present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting year) has been applied as when calculating the pension liability recognised within the statement of financial position.

The discount rate and inflation sensitivity information shown above has been prepared using the same method as adopted when adjusting the results of the latest funding valuation to the statement of financial position date. The inflation sensitivity takes account of the corresponding impacts on both salary and pension growth and is based on both RPI and CPI inflation assumptions.

The life expectancy sensitivity information shown above is approximate and has been determined taking into account the duration of the liabilities and the overall profile of the Plan membership.

The history of asset values, defined benefit obligation and surplus is set out below:

	2023	2022	2021	2020
	\$M	\$M	\$M	\$M
Fair value of scheme assets	1,261	1,218	2,313	2,378
Defined benefit obligation	(1,129)	(966)	(1,890)	(2,017)
Net pension asset value	132	252	423	361

Following the 31 December 2021 actuarial funding valuation, it was agreed on the basis of actuarial advice that the participating companies would pay the following:

- The agreed contributions for members to the Money Purchase Section of the Plan;
- 0.5% of Plan salaries in respect of spouses' death in service pensions for relevant members of the Plan;
- Lump sum death in service premiums;
- Any levies due to the Pension Protection Fund; and
- Other expenses.

The contribution requirement is monitored following each annual funding review and any contribution payments may be adjusted accordingly.

The Plan duration is an indicator of the weighted-average time until benefit payments are paid. For the Plan as a whole, the duration is approximately 14 years.

Defined contribution schemes

The major defined contribution scheme is the Bank of America UK Retirement Plan – Money Purchase Section. The cost is a percentage of each employee's plan salary based on their length of service and these costs are charged to the income statement in the period in which they fall due.

The Company's pension cost for the year in respect of defined contribution schemes was \$50 million (2022: \$41 million).

Capital gains	(15)	—	—	4	—	—	(11)	
Share based payments	126	(18)	(8)	(7)	1	—	94	
Fair value on debt securities	—	—	—	—	—	—	—	
Loan relationships	252	—	—	(21)	(1)	—	230	
Net tax assets/ (liabilities)	396	69	(5)	31	12	30	533	

Presentation of the tax note numbers has been reformatted in 2023 to provide more relevant information to the users. Comparatives have also been updated.

The deferred tax assets recognised on the balance sheet of \$572 million (2022: \$533 million) relate to losses and temporary differences. A deferred tax asset of \$276 million relates to losses suffered in prior years. Management has concluded that these deferred tax assets will be fully recovered in the future based on financial results, forecasts of future taxable profits over the Company's three-year planning horizon.

The Company has unrecognised deferred tax assets totalling \$8,045 million (2022: \$8,052 million), primarily in relation to losses. Deferred tax assets have not been recognised in respect of these items because it is not probable that future taxable profits and gains will be available against which they can be utilised.

The deferred tax assets and liabilities, which are expected to unwind after 1 April 2023, have been measured in the current reporting period based on the tax rate which became effective on 1 April 2023. The balances are now held at the updated standard rate of corporation tax of 25% in relation to losses and 28% (to include bank surcharge) in relation to temporary differences.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

21. TRADING LIABILITIES

	2023	2022
	\$M	\$M
Derivative liabilities	140,830	162,363
Equities and convertible debentures	16,791	18,064
Corporate debt and preferred stock	2,010	1,791
Non-US government and agencies	4,630	6,372
US governments and agencies	346	324
Commodities	638	—
	165,245	188,914

Balances with affiliated companies within trading liabilities were \$47,595 million (2022: \$53,487 million).

22. REPURCHASE AGREEMENTS AND SECURITIES LOANED

	2023	2022
	\$M	\$M
Amounts falling due within one year:		
Repurchase agreements and securities loaned transactions	60,755	74,847
Amounts falling due after more than one year:		
Repurchase agreements and securities loaned transactions	2,183	3,114
	62,938	77,961

Balances with affiliated companies within repurchase agreements and securities loaned transactions were \$21,247 million (2022: \$32,524 million).

Within repurchase agreements and securities loaned transactions, \$38,700 million (2022: \$52,129 million) were designated at FVPL. The amount contractually required to pay at maturity to the holder of these obligations was \$38,717 million (2022: \$52,289 million). The remaining balance is held at amortised cost.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

23. CREDITORS: AMOUNTS FALLING DUE WITHIN ONE YEAR

	2023 \$M	2022 \$M
Trade creditors		
Customer payables	39,549	44,496
Brokers, dealers and clearing houses	9,584	10,332
	49,133	54,828
Other creditors	14,465	11,330
	63,598	66,158

Balances with affiliated companies within customer payables were \$7,145 million (2022: \$7,294 million), within brokers, dealers and clearing houses were \$2,571 million (2022: \$2,616 million) and within other creditors were \$6,887 million (2022: \$5,507 million).

At 31 December 2023, the Company also had financial liabilities designated at FVPL presented within amounts owed to affiliated companies totalling \$2,478 million (2022: \$3,245 million) and within customer payables totalling \$5,683 million (2022: \$4,898 million). The amounts contractually required to pay at maturity to the holder of these obligations were \$2,114 million (2022: \$3,005 million) and \$6,672 million (2022: \$4,954 million) respectively.

Included within other creditors and accruals were \$45 million (2022: \$53 million) relating to taxation and social security.

The Company maintains certain client money balances with banks and clearing houses which principally arise where it acts on behalf of its clients as a clearing member for derivatives that are cleared through central counterparties. These balances are held subject to client money protection under the Client Assets Sourcebook rules, and the Company concluded that such amounts should not be recognised on its balance sheet as they are not assets of the Company. Therefore, client money assets amounting to \$3,848 million (2022: \$4,889 million) have not been recognised on the Company's balance sheet, \$709 million (2022: \$1,647 million) from cash balances and \$3,139 million (2022: \$3,242 million) from brokers, dealers and clearing houses, respectively.

Day one profit / (loss)

Included in the above and in the table that follows is day one profit that has yet to be recognised in the income statement relating to the difference between the fair value at recognition (being the transaction price) and the amount that would have arisen had valuation techniques used for subsequent measurement been applied at initial recognition, less any subsequent releases.

	2023 \$M	2022 \$M
At 1 January	81	52

24. CREDITORS: AMOUNTS FALLING DUE AFTER MORE THAN ONE YEAR (continued)

The Company has available credit facilities due after more than one year of \$37,000 million (2022: \$37,000 million) from affiliated companies. The undrawn element at 31 December 2023 was \$24,553 million (2022: \$25,795 million).

The drawn element is charged at a floating rate aligned with the benchmark associated with the denomination of currency borrowed and is payable in 2025 (2022: 2024) with due dates automatically extended semi-annually unless the lender provides written notice of its election not to extend.

There was a repayment of \$2,500 million subordinated loan facility with an affiliated Company on 23 February 2023.

25. CALLED UP SHARE CAPITAL

	2023 \$M	2022 \$M
Allotted, called up and fully paid 7,933,027,945 (2022: 7,933,027,945) ordinary shares of \$1.00 each	7,933	7,933

26. RESERVES

Profit and loss account

The Profit and loss account as at 31 December 2023 was \$15,200 million (2022: \$14,965 million).

The difference between equity-settled share scheme awards costs, as calculated in accordance with IFRS 2 - Share Based Payments, and the amounts recharged for such awards by BAC during the year was a \$12 million credit (2022: \$20 million credit) and is included within profit and loss reserves.

Capital contribution reserve

The capital contribution reserve relates to a combination of cash and non-cash contributions received from the Company's parents and other BAC companies.

On 01 November 2023 the Company received a capital contribution of \$107 million from its parents in the form of 100% of the ordinary share capital of MLUKCH .

Debit valuation adjustment reserve

The debit valuation ("DVA") reserve relates to credit risk associated with fair value changes of liabilities designated in FVPL. These fair value changes are presented in OCI as a debit valuation adjustments reserve.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

28. COMMITMENTS AND CONTINGENT LIABILITIES

The Company is a member of various securities and derivative exchanges and clearing houses. As a member, the Company may be required to pay a pro-rata share of the losses incurred by some of these organisations as a result of another member default and under other loss scenarios. The Company's potential obligations may be limited to its membership interests in such exchanges and clearing houses, to the amount (or multiple) of the Company's contribution to the guarantee fund or, in limited instances, to the full pro-rata share of the residual losses after applying the guarantee fund. The Company's maximum potential exposure under these membership agreements is difficult to estimate; however, the potential for the Company to be required to make these payments is remote.

In connection with its prime brokerage and clearing businesses, the Company performs securities clearance and settlement services with other brokerage firms and clearing houses on behalf of its clients. Under these arrangements, the Company stands ready to meet the obligations of its clients with respect to securities transactions. The Company's obligations in this respect are secured by the assets in the clients' accounts and the accounts of their customers as well as by any proceeds received from the transactions cleared and settled by the firm on behalf of clients or their customers. The Company's maximum potential exposure under these arrangements is difficult to estimate; however, the potential for the Company to incur material losses pursuant to these arrangements is remote.

BAC, including MLI and its affiliates, is subject to a number of investigations, inquiries, and proceedings impacting the global banking industry, including matters raised by Government authorities in the US and various international jurisdictions. Many of these investigations, inquiries, and proceedings will be ongoing at the time of approval of these financial statements and as a result, the outcomes of all these matters cannot be predicted. At this time, the directors do not consider it necessary to make a provision within the financial statements of MLI.

The Company has commitments to enter into resale and forward-dated resale and securities borrowing agreements and commitments to enter into forward-dated repurchase and securities lending agreements. These commitments generally expire within the next 12 months.

The Company provides financial guarantees to affiliated companies for International Swaps and Derivatives Association ("ISDA") and non-ISDA transactions. The Company also holds irrevocable commitments.

The below table represents the Company's maximum exposure under those guarantees and commitments:

	2023	2022
	\$M	\$M
Financial guarantees	94	243
Undrawn portion of irrevocable commitments	36	32
Forward dated resale agreement and securities borrowing	24,814	32,120
Forward dated repurchase agreement and securities lending	22,605	17,450
	47,549	49,845

29. COLLATERAL RECEIVED AND PLEDGED

The Company receives collateral in transactions that include resale agreements and securities borrowed arrangements, as well as in connection with its derivative contracts. At 31 December 2023, the fair value of financial assets accepted as collateral that the Company is permitted to use, sell or repledge in the absence of default was \$370,872 million (2022: \$344,640 million). The fair value of financial assets accepted as collateral that the Company has used, sold or repledged was \$306,100 million (2022: \$288,028 million). The collateral received is composed of cash and various securities positions such as government and agency securities, corporate debt securities and equities which are generally of high quality and considered highly liquid. In the event of a default, the Company has the legal right to liquidate collateral posted as securities in order to minimise losses. The Company's policy

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

29. COLLATERAL RECEIVED AND PLEDGED (continued)

is to monitor the market value of the principal amount loaned under resale agreements and obtain collateral from or return collateral pledged to counterparties when appropriate. Securities financing agreements do not create material credit risk due to these collateral provisions; therefore, a zero allowance for loan losses has been calculated. The Company is obliged to return cash or equivalent securities as appropriate. Transactions are conducted under standard documentation used by financial market participants, including the terms for the return of cash or equivalent securities as appropriate.

In connection with certain over-the-counter ("OTC") derivative contracts and other trading agreements, the Company can be required to provide additional collateral or to terminate transactions with certain counterparties in the event of a downgrade of the senior debt ratings of the Company. The amount of additional collateral required depends on the contract and is usually a fixed incremental amount and/or the market value of the exposure.

The Company also pledges its own financial assets as collateral in transactions that include repurchase agreements and securities lending arrangements, as well as in connection with its derivative contracts. The collateral pledged is composed of cash and various securities positions such as government and agency securities, corporate debt securities and equities. Where cash collateral has been placed with a counterparty, this is presented as customer receivables within debtors. Non-cash collateral owned by the Company and pledged to counterparties is included within trading assets. To determine whether the market value of the underlying collateral remains sufficient, collateral is generally valued daily, and the Company may be required to deposit additional collateral or may receive or return collateral pledged when appropriate. Repurchase agreements and securities loaned transactions are generally either overnight or short-term. The Company manages liquidity risks related to these agreements by sourcing funding from a diverse group of counterparties, providing a range of securities collateral and pursuing longer durations, when appropriate.

Under a normal client repurchase agreement, the assets can be repledged. The assets cannot be repledged when it's under a tri-party agreement. For certain clients, there are exemptions, and the assets can therefore be repledged for a tri-party agreement.

The carrying amounts of the Company's financial assets that have been pledged as collateral for

liabilities are summarised as follows:

	2023 \$M	2022 \$M
Trading assets	28,535	31,348
Customer receivables	22,714	21,829
	<u>51,249</u>	<u>53,177</u>

Pledged firm-owned assets that can be repledged by the secured party was \$13,053 million (2022: \$13,574 million) and assets that cannot be repledged by the secured party was \$15,482 million (2022: \$17,774 million).

The corresponding liabilities for which the Company has provided this security are included within trading liabilities, repurchase agreements and securities loaned transactions and creditors, per notes 21 Trading Liabilities, 22 Repurchase Agreements And Securities Loaned and 23 Creditors: Amounts Falling Due Within One Year. The majority of the Company's derivative contracts are entered in accordance with ISDA master agreements or their equivalent, which create a right of set-off in certain circumstances, see note 30 Offsetting for further detail on these arrangements.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

30. OFFSETTING

Financial assets and liabilities are offset and the net amount reported in the statement of financial position ("SOFP") where the Company currently has a legally enforceable right to offset the recognised amounts, and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The Company has also entered into arrangements that do not meet the criteria for offsetting but still allow for the related amounts to be set-off in certain circumstances, such as bankruptcy or the termination of a contract.

The following table presents the recognised financial instruments that are offset, or subject to enforceable master netting arrangements and other similar agreements but not offset, as at 31 December 2023 and 31 December 2022. The column 'net amount' shows the impact on the Company's SOFP if all set-off rights were exercised.

As at 31 December 2023

	Gross amounts recognised \$M	Gross amounts offset in the SOFP ^(a) \$M	Net amounts presented in the SOFP \$M	Financial instruments \$M	Cash collateral \$M	Net amount \$M

^(b) At 31 December 2022, the amount of cash margin received that has been offset against the gross derivatives assets was \$490 million. The amount of cash margin paid that has been offset against the gross derivatives liabilities was \$993 million.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

30. OFFSETTING (continued)

Financial instruments

The Company can undertake a number of financial instrument transactions with a single counterparty and may enter into a master netting agreement with that counterparty. Such an agreement provides for a single net settlement of all financial instruments covered by the agreement in the event of default on, or termination of, any one contract. These agreements are commonly used to provide protection against loss in the event of bankruptcy or other circumstances that result in a counterparty being unable to meet its obligations. A master netting arrangement commonly creates a right to set-off that becomes enforceable and affects the realisation or settlement of individual financial assets and financial liabilities only following a specified event of default or in other circumstances not expected to arise in the normal course of business.

The Company enters into ISDA master agreements or their equivalent (“master netting agreements”) with the Company’s major derivative counterparties.

Where there is not an intention to settle on a net basis in the normal course of business, the balances have not been offset in the SOFP and have been presented separately in the table on the previous page.

Financial instruments also include securities collateral received and pledged which has not been offset in the SOFP.

Cash collateral

Cash collateral relates to collateral received and pledged against both derivatives and repurchase agreements which has not been offset in the SOFP.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

31. RISK MANAGEMENT

Legal entity governance

BAC has established a risk governance framework (the “Risk Framework”) which serves as the foundation for consistent and effective management of risks facing BAC and its subsidiaries (including the Company). The Risk Framework applies to all BAC employees. It provides an understanding of the Company’s approach to risk management and each employee’s responsibilities for managing risk. All employees must take ownership for managing risk well and are accountable for identifying, escalating and debating risks facing the Company. The following are the five components of the Company’s risk management approach:

- Culture of Managing Risk Well;
- Risk Appetite;
- Risk Management Processes;
- Risk Data Management, Aggregation and Reporting; and
- Risk Governance.

The seven key types of risk faced by MLI businesses as defined in the Risk Framework are market, credit, operational, liquidity, reputational, strategic and compliance risks.

Set out below is a summary of the Company’s approach to each of the risk types. Climate related risks are integrated into the risk management framework through their potential impact to the seven risk types.

Market risk

Market risk is the risk that changes in market conditions adversely impact the values of assets or liabilities or otherwise negatively impact earnings.

Market risk is composed of price risk and interest rate risk:

Price risk

Price risk is the risk to current or projected financial condition arising from changes in the value of trading portfolios, investment securities or Treasury related funding activities. These portfolios typically are subject to daily price movements and are accounted for primarily on a Mark-to-Market basis. This risk occurs most significantly from market-making, dealing and capital markets activity in interest rate, foreign exchange, equity, commodities and credit markets.

Interest rate risk

Interest rate risk is the risk to current or projected financial condition arising from movements in interest rates. Interest rate risk results from differences between the timing of rate changes and the timing of cash flows (repricing risk), from changing rate relationships among different yield curves affecting bank activities (basis risk), from changing rate relationships across the spectrum of maturities (yield curve risk), and from interest-related options embedded in bank products or investment securities (options risk).

Interest Rate Risk in the Banking Book

Interest rate in the banking book is the risk to MLI’s current or anticipated earnings or capital arising from adverse movements in interest rates. Changes in interest rates affect MLI’s earnings and capital by impacting its projection of Earnings at Risk (“EaR”) and the underlying economic value of its assets, liabilities and off-balance sheet items (economic value of equity (“EVE”)). Gap risk results from the term structure of interest rate sensitive instruments that arises from differences in the timing of their rate changes, covering changes to the term structure of interest rates occurring consistently across the yield

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

31. RISK MANAGEMENT (continued)

curve (parallel risk) or differentially by period (non-parallel). Basis risk arises from the impact of relative changes in interest rates on interest rate sensitive instruments that have similar tenors but are priced using different interest rate indices. MLI does not offer retail deposits to its customers; interest rate risk in MLI's banking book predominantly arises from funding provided by Treasury to support MLI's trading activity and other funding activities.

Market risk measurement

At the asset and liability level, market risk is assessed by evaluating the impact of individual risk factors on individual exposures. At the aggregate level, price risk is assessed primarily through risk models, including Value at Risk ("VaR") models. MLI's aggregate potential economic exposure, as well as earnings and capital sensitivity, to interest rate risk in the banking book is also assessed.

MLI has been granted permission by the PRA to use an Internal Model Approach ("IMA") for calculating regulatory capital for market risk using the following models: VaR, Stressed VaR ("SVaR"), Incremental Risk Charge ("IRC"), and Comprehensive Risk Measure ("CRM"). The capital requirement for trading book positions that do not meet the conditions for inclusion within the approved IMA is calculated using standardised rules in accordance with Title IV of Part Three of CRR. RWA for market risk are the sum of each of these measures multiplied by 12.5.

Value at Risk

VaR is a statistical measure of potential portfolio market value loss resulting from changes in market variables, during a given holding period, measured at a specified confidence level. A single model is used consistently across the trading portfolios, and it uses a historical simulation approach based on a three - year window of historical data. The primary VaR statistic is equivalent to a 99 percent confidence level. This means that for a VaR with a one day holding period, there should not be losses in excess of VaR, on average, 99 out of 100 trading days.

	Year end 2023	High 2023	Daily average 2023	Low 2023
	\$M	\$M	\$M	\$M
99% Daily VaR				
Total	34	50	27	17
Interest rate risk	25	39	20	13
Currency risk	9	13	6	3
Equity price risk	7	23	13	6
Credit spread risk	24	45	26	19
Commodity price risk	7	10	5	3

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

31. RISK MANAGEMENT (continued)

	Year end 2022	High 2022	Daily average 2022	Low 2022
	\$M	\$M	\$M	\$M
99% Daily VaR				
Total	41	61	34	24
Interest rate risk	20	38	22	12
Currency risk	11	22	6	2
Equity price risk	16	29	17	8
Credit spread risk	37	47	34	22
Commodity price risk	5	12	6	2

In addition to VaR measures, the market risk department utilises a range of other risk measures including sensitivity analysis and stress testing to monitor exposures and manages them using a robust set of limits.

Credit risk

Credit risk is the risk of loss arising from the inability or failure of a borrower or counterparty to meet its obligations. Credit risk is created when the Company commits to, or enters into, an agreement with a borrower or counterparty. The Company defines credit exposure to a borrower or counterparty as the loss potentially arising from loans, leases, derivatives and other extensions of credit.

Credit risk management includes the following processes:

- Credit origination
- Portfolio management
- Loss mitigation activities

These processes create a comprehensive and consolidated view of the Company's credit risks, thus providing senior management with the information required to guide or redirect FLUs and certain Company strategic plans, if necessary.

Regular reporting includes monitoring of credit exposure against counterparty and aggregate MLI risk appetite limits, including aggregate and single name limits by risk profile. The robust credit risk reporting framework and internal policies and procedures enable prudent risk monitoring and escalation.

Credit Concentration Risk is managed under the BAC Credit Risk Framework. This covers an array of company-wide and legal entity specific granular controls for identifying, measuring, monitoring and controlling concentration risk. Industry and country concentrations are monitored and managed as appropriate for the MLI portfolio.

Further, Stress testing in MLI covers a wide variety of scenarios to help identify exposure concentrations and the impact of potential changes in market conditions on credit exposures.

As BAC's main investment firm outside of the US, MLI's credit strategy and origination is focused on its trading, derivatives and securities activities which account for the majority of its credit exposure.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

31. RISK MANAGEMENT (continued)

Derivatives trading

The Company enters into ISDA master agreements or their equivalent (“master netting agreements”) with its derivative counterparties. Master netting agreements provide protection in bankruptcy in certain circumstances and, in some cases, enable receivables and payables with the same counterparty to be offset for risk management purposes. Agreements are negotiated bilaterally and can require complex terms. The enforceability of master netting agreements under bankruptcy laws in certain countries is not free from doubt, and receivables and payables with counterparties in these countries are accordingly recorded on a gross basis for risk assessment purposes.

In addition, to reduce the risk of loss, the Company usually requires collateral that is permitted by documentation such as repurchase agreements or Credit Support Annex to an ISDA. From an economic standpoint, the Company evaluates risk exposures net of related collateral that meets specified standards. The Company also attempts to mitigate its default risk on derivatives whenever possible by entering into transactions with provisions that enable it to terminate or reset the terms of the derivative contracts under certain defined conditions.

Securities activities

In the normal course of business, the Company executes, settles, and finances various customer securities transactions. Execution of these transactions includes the purchase and sale of securities by the Company. These activities may expose the Company to counterparty default risk arising from the failure of customers or counterparties to satisfy their obligations. In these situations, the Company may be required to purchase or sell financial instruments at unfavourable market prices to satisfy obligations to other customers or counterparties. This potential loss arising from this replacement value is calculated as counterparty credit exposure. In addition, the Company seeks to control the risks associated with its customer margin activities by requiring customers to maintain collateral in compliance with regulatory and internal guideline.

Default

The Company considers a financial asset to be in default when:

- Material exposures are more than 90 days past due and/or;
- The borrower is assessed as unlikely to pay its credit obligations in full without the realisation of collateral, regardless of the existence of any past due amount or of the number of days past due.

In assessing whether a borrower is in default, the Company considers qualitative indicators such as breaches of covenants, as well as quantitative indicators such as overdue status and non-payment on other obligations of the same issuer. Data from external sources is also used in the consideration of whether a borrower is in default.

The table on next page reflects asset class of financial instrument, the amount that best represents the Company’s maximum exposure to credit risk and a quantification of the extent to which collateral and other credit enhancements mitigate credit risk as viewed by management.

MERRILL LYNCH INTERNATIONAL

Debtors	54,891	44,008	65,121	53,575
Cash at bank	3,139	—	5,610	—
Resale agreements and securities borrowed transactions	98,057	94,714	98,929	94,391
Financial guarantees	94	—	243	—
Undrawn portion of irrevocable commitments	36	—	32	—
	<u>317,549</u>	<u>281,503</u>	<u>357,259</u>	<u>313,774</u>

For all asset classes, where credit risk mitigation available exceeds the maximum exposure to credit risk, the mitigated credit risk balance is limited to 100% of the maximum exposure to credit risk.

As detailed in note 17 Trading Assets, trading assets include corporate debt, preferred stock, convertible debentures, government and agency securities, derivative assets, commodities, and mortgage-backed and asset-backed securities. For credit risk management purposes, inventory exposure is monitored across lines of business, and at a net issuer level. The credit risk of trading assets is mitigated through the netting of long and short positions for each issuer.

The mitigated credit risk amount reflects the market value of any netting available, including short positions, and the market value of any single-name credit default swap ("CDS") protection purchased on a specific issuer. As noted above, derivative trading activity is generally documented under a legally enforceable ISDA or similar master netting agreement, which binds both parties to apply close-out netting across all transactions covered by the agreement if either party defaults or if another pre-agreed termination event occurs. Therefore, risk is managed on a net basis, taking into consideration the effects of legally enforceable master netting agreements and collateral. However, if there is no intention to settle these balances on a net basis under normal circumstances, they do not qualify for net presentation for accounting purposes.

Debtors include amounts due from brokers, dealers and clearing houses, intercompany loans, third party loans and other trade debtors.

The Company's off-balance sheet exposure to credit risk is principally comprised of undrawn loan commitments, securities pledged as collateral for derivative trading activities, guarantees, letters of credit and similar arrangements. Depending on the terms of the arrangement, the Company may also have recourse to additional credit risk mitigation in the event that a guarantee is called upon or a loan commitment is drawn and subsequently defaults. However, the valuation of such credit mitigating measures is less certain and their financial effect has not been quantified in the analysis of mitigated credit risk.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

31. RISK MANAGEMENT (continued)

The Company's counterparties are primarily highly rated financial institutions, and a significant proportion of credit exposures in the scope of the impairment requirements of IFRS 9 relate to securities financing transactions which are largely collateralised (refer to note 30 Offsetting for non-collateralised portion). The remaining financial assets in the scope of IFRS 9 are typically short-dated. As a result, the probability of default, loss given default, or both are such that the resulting ECL is not significant to the Company. Actual amounts written off during the year are also not significant to the Company. In light of this, no further breakdown of the Company's debtors by credit risk rating is considered necessary.

For trade and other debtors, the Company uses past due information as a key part of its assessment as to whether credit risk has increased significantly since initial recognition. For affiliated company trade and other debtors, the Company's anticipated ECL was determined not to be material and no loss was recognised as these receivables are classified as stage 1 and based on historic assessment of write offs there is minimal risk of default.

The following table details third party credit exposures that are past due:

	0-30 days \$M	31-60 days \$M	61-90 days \$M	91-120 days \$M	120 days+ \$M	Total \$M
31 December 2023						
Debtors	<u>3</u>	<u>—</u>	<u>—</u>	<u>—</u>	<u>1</u>	<u>4</u>
	0-30 days \$M	31-60 days \$M	61-90 days \$M	91-120 days \$M	120 days+ \$M	Total \$M
31 December 2022						
Debtors	<u>7</u>	<u>1</u>	<u>—</u>	<u>—</u>	<u>1</u>	<u>9</u>

Amounts that are past due relate to trades with third parties that have failed settlement, and the amounts presented in the balance sheet relate to trade debtors whereby the Company will deliver securities or cash to the obligor upon receipt of the amounts due. Amounts past due greater than 90 days are assessed as Stage 3 (credit-impaired) for IFRS 9 purposes, with other amounts past due considered to be Stage 1. However, as there is still an expectation that settlement will take place for all balances, and that the Company has not or will not deliver on its part of the transaction prior to full settlement taking place, the ECL on these exposures is not considered to be significant.

Given the short-dated nature and collateralisation of the Company's significant debtors, it is not considered that the Company has a significant concentration of credit risk that would be impacted by a change in economic conditions for a particular group or portfolio of financial instruments. No further analysis of concentrations of credit risk is therefore provided.

Write offs

Loans and debt securities are written off, either partially, or in full, when there is no realistic prospect of recovery. This is generally the case when the Company determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

31. RISK MANAGEMENT (continued)

Compliance and Operational risk

Compliance risk is the risk of legal or regulatory sanctions, material financial loss or damage to the reputation of the Company arising from the failure of the Company to comply with the requirements of applicable laws, rules and regulations and internal policies and procedures. The Company is committed to the highest level of compliance and has no appetite for violations of legislative or regulatory requirements. The Company seeks to anticipate and assess compliance risks to core businesses and respond to these risks effectively should they materialise. While the Company strives to prevent compliance violations in everything it does, the Company cannot fully eliminate compliance risk, but manages it by defining risk tolerances to reduce exposure to financial loss, reputational harm or regulatory sanctions.

Operational risk is the risk of loss resulting from inadequate or failed processes, people and systems or from external events. The Company has designed an operational risk management programme, that incorporates and documents the process for identifying, measuring, monitoring, controlling and reporting operational risk information to executive management and the appropriate boards of directors, or appropriate board-level committees. The Company manages operational risk by defining risk tolerances to reduce exposure to financial loss, reputational harm or regulatory sanctions.

Compliance and Operational Risk Management

FLUs and CFs are first and foremost responsible for managing all aspects of their businesses, including their compliance and operational risk. FLUs and CFs are required to understand their business processes and related risks and controls, including third party dependencies, the related regulatory requirements, and monitor and report on the effectiveness of the control environment. In order to actively monitor and assess the performance of their processes and controls, they must conduct comprehensive quality assurance activities and identify issues and risks to remediate control gaps and weaknesses. FLUs and CFs must also adhere to compliance and operational risk appetite limits to meet strategic, capital and financial planning objectives. Finally, FLUs and CFs are responsible for the proactive identification, management and escalation of compliance and operational risks across the Company.

Liquidity risk

Liquidity risk is the inability to meet expected or unexpected cash flow and collateral needs while continuing to support the businesses and customers, under a range of economic conditions.

The MLI Liquidity Risk Policy ("LRP") is approved by the MLI Board and defines the approach to monitoring and managing MLI's liquidity risk, aligned to group processes and tailored to meet MLI's business mix, strategy, activity profile, risk appetite and regulatory requirements. The MLI Risk Appetite Statement clearly defines the amount of liquidity or funding MLI is willing to put at risk, consistent with applicable regulatory requirements. The MLI MRC reviews and recommends Risk Appetite limits to the MLI BRC, which in turn reviews and recommends to the MLI Board for approval.

The MLI LRP describes the liquidity risk roles and responsibilities including requirements for liquidity risk limits, stress testing, analytics and reporting, and recovery and resolution planning.

Each of the FLUs are accountable for managing liquidity risk within the MLI Liquidity Risk Appetite by establishing appropriate processes to identify, measure, monitor and control the risks associated with their activities. Global Risk Management ("GRM") provides independent oversight and supervision of FLU activities, an independent view of the liquidity risk of FLU activities and assesses the effectiveness of MLI's liquidity risk management processes.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

31. RISK MANAGEMENT (continued)

The MLI Board Level Liquidity Risk Appetite is defined by the following:

- Internal Liquidity Stress Test (“ILST”) 30-Day = Pre-positioned liquidity sources divided by the net peak outflows over a 30-day combined stress period
- Internal Liquidity Stress Test (“ILST”) 90-Day = Available (pre-positioned + committed line) liquidity sources divided by the net peak outflows over a 90-day combined stress period
- Liquidity Coverage Ratio (“LCR”) = High Quality Liquid Assets divided by 30-day net stress outflows
- Net Stable Funding Ratio (“NSFR”) = Available Stable Funding divided by Required Stable Funding

The Company has put in place several metrics to monitor concentration of liquidity and funding risk to counterparties and to mitigate the funding and liquidity impact from concentration risks including roll over risks from counterparty, or currency markets. The metrics are set at different levels, ranging from board and management level to risk monitoring items, capturing gross and net exposures across the entire book as well as top exposures to promote a funding profile that minimises liquidity risks.

GRM works with Treasury and the Businesses to monitor actual and forecast liquidity and funding requirements with a focus on limit utilisation and trends, and any change in business/ market behaviour may require a change in the treatment of risk and limit recalibration.

The tables below represent the undiscounted cash flows of the Company's financial liabilities as at 31 December 2023 and 31 December 2022, with the exception of those held for trading or designated at FVPL. The fair values of financial liabilities held for trading and financial liabilities designated at FVPL have been disclosed as this is consistent with the values used in the liquidity risk management of these instruments. See note 27 Analysis of Financial Assets and Liabilities by Measurement Basis.

The Company has recorded all derivative financial instrument liabilities, including those positions that have been reclassified to Creditors, in the “on demand” category to reflect the common market practice of terminating such liabilities at fair value upon a client’s request, although the Company is generally not contractually obliged to do so. The Company has provided the present value rather than contractual undiscounted cash flows for these derivative financial instruments. The Company considers it unlikely that, in any given period, all of the liabilities will unwind in the short-term. The Company manages liquidity for these instruments by actively unwinding asset positions to ensure appropriately balanced cash flows. Guarantees and commitments and financial liabilities designated at fair value are undiscounted and are shown on the basis of the earliest date they can be called. All other figures are undiscounted and show contractual maturities.

Reputational risk

Reputational risk is the potential risk that negative perception of BAC or the Company may adversely impact profitability or operations.

The Company manages reputational risk through established policies and controls in the business and risk management processes to mitigate reputational risks in a timely manner and through proactive monitoring and identification of potential reputational risk events.

Ultimately, to ensure that reputational risk is mitigated through regular business activity, monitoring and oversight of reputational risk is integrated into the overall governance process, as well as incorporated into the roles and responsibilities for employees.

Given the nature of reputational risk, MLI, aligned with BAC does not set quantitative limits for the level of acceptable risk. Through proactive risk management, MLI seeks to minimise both the frequency and impact of reputational events.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

31. RISK MANAGEMENT (continued)

At the BAC level, reputational risk is reviewed by the Enterprise Risk Committee and the Enterprise Management Risk Committee, which provide primary oversight of reputational risk. Additionally, top reputational risks are reviewed by the GRM Leadership team and the BAC Board of Directors.

For the EMEA region there is a specialist committee, the EMEA Reputational Risk Committee, whose mandate includes consideration of reputational risk issues (including matters related to environmental and social factors) and to provide guidance and approvals for activities that represent specific reputational risks which have been referred for discussion by other current control frameworks or lines of business.

The reporting of MLI reputational risk issues is captured as part of management routines for the Reputational Risk Committee. Tracking of items presented to this Committee is maintained through a reporting protocol, which provides detail such as the description of the reputational risk issue, the geographical jurisdiction, the reason for escalation and the decision reached by the Committee. In addition, the Reputational Risk Residual Risk Outlook, the number of items taken to the EMEA Reputational Risk Committee are routinely reported through the legal entity's governance routines.

Strategic risk

Strategic risk is the risk to current or projected financial condition arising from incorrect assumptions about external or internal factors, inappropriate business plans (e.g. too aggressive, wrong focus, ambiguous), ineffective business strategy execution, or failure to respond in a timely manner to changes in the regulatory, macroeconomic or competitive environments, in the geographic locations in which MLI operates (such as competitor actions, changing customer preferences, product obsolescence, and technology developments).

MLI proactively considers strategic risk in the strategic planning process which feeds into the capital, liquidity and financial planning processes throughout the year. MLI continuously evaluates the internal and external environment, including the perspective of external experts, and its strengths, weaknesses, opportunities, and threats. During the strategic and capital planning processes, the Board provides credible challenge to senior management's assumptions and recommendations and approves the strategic and capital plans after a comprehensive assessment of the risks.

MLI sets strategies within the context of overall risk appetite. MLI's strategic plans are consistent with risk appetite, the capital plan and liquidity requirements and specifically address strategic risks.

MLI tracks performance to the strategic plan and analyses progress throughout the year. Senior management continuously monitors business performance throughout the year with several existing processes ranging from the monitoring of financial and operating performance, to the management of the MLI Recovery Plan and the regular assessment of earnings and risk profile. Senior management provides the MLI Board with reports on progress in meeting the Strategic Plan, as well as whether timelines and objectives are being met and if additional or alternative actions need to be implemented.

The Board is responsible for overseeing the strategic planning process and senior management's execution of the resulting strategic plan. The strategic plan is reviewed and approved annually by the Board in line with the capital plan, financial operating plan, liquidity requirements and risk appetite. Significant strategic actions, such as capital actions, material acquisitions or divestitures and recovery and resolution plans are reviewed and approved by the Board as required.

Processes exist to discuss the strategic risk implications of new, expanded or modified businesses, products or services and other strategic initiatives, and to provide formal review and approval where required.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

31. RISK MANAGEMENT (continued)

The Board is also responsible for overseeing the capital planning process. Capital plans are reviewed and approved annually by the Board in consideration of the entity's overall strategic plans, financial operating plans and risk appetite.

Global Risk Management, Corporate Audit and other CFs provide input, challenge and oversight to FLUs strategic plans, initiatives and capital plans relating to MLI.

Transparency around meeting the objectives of MLI's strategic and capital plans by providing visibility to MLI's strategic risks is critical to effective risk management. FLUs and CFs present updates to senior management and the Board on their business performance and management of strategic risk. Updates take into account analyses of performance relative to the strategic plan, capital adequacy assessments, capital management triggers, risk appetite and performance relative to peers. Topical presentations are also made to address any developments or additional considerations as they relate to strategic or capital planning, or the strategic plan itself. The Board use these updates and presentations to ensure that management actions and decisions remain consistent with strategic plans, capital plans and risk appetite.

Capital management

The Company's objective when managing capital is to ensure that the quantity and quality of capital is adequate to support the Company's business activities and associated risk during both an expected economic environment and under stress conditions.

A strong capital position is essential to the Company's business strategy and competitive position. This is managed through its capital management framework, key components of the capital management framework include:

- A strategic capital planning process aligned to risk appetite.
- A robust capital stress testing framework.
- Regular monitoring against capital and leverage risk appetite limits.
- Regular leverage and capital reporting to management.

The capital management framework is designed to ensure that the Company is adequately capitalised at all times in relation to:

- Minimum risk-based regulatory capital requirements (Pillar 1 capital under UK CRD V), Pillar 2/ individual capital guidance set by the PRA, relevant UK CRD V buffers, and the PRA buffer as well as an internal capital buffer.
- The risks faced by the Company, such as through regular review of the current and future business activities.
- Current and future regulations impacting the Company.

Daily, monthly and quarterly capital monitoring routines enable the Company to manage its capital adequacy position within the Company's risk appetite limits, this is supported by the capital limit framework which sets out protocols for the effective communication and remediation of a limit breach.

The composition of the Company's regulatory capital as at 31 December 2023 and 31 December 2022 is as follows:

	2023 \$M	2022 \$M
Common Equity Tier 1 (equity share capital and reserves)	<u>33,878</u>	<u>33,521</u>

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

31. RISK MANAGEMENT (continued)

Capital resources are inclusive of audited current year profits after the deduction of any dividends recommended by the directors, and other regulatory capital deductions.

The Company makes “Pillar 3” disclosures as required under the PRA Rulebook Disclosure (CRR). MLI Pillar 3 disclosures can be obtained via <https://investor.bankofamerica.com/regulatory-and-other-filings/basel-pillar-3-disclosures>.

Climate Risk

Climate risk is the risk that climate change or actions taken to mitigate climate change expose the Company to economic, operational or reputational harm. Climate-related risks are divided into two major categories, both of which span across the seven key risk types:

- **Physical Risk:** Risks related to the physical impacts of climate change, driven by extreme weather events such as hurricanes and floods, as well as chronic longer-term shifts such as rising average global temperatures and sea levels, and
- **Transition Risk:** Risks related to the transition to a low-carbon economy, which may entail extensive policy, legal, technology and market changes.

Physical risks of climate change, such as more frequent and severe extreme weather events, can increase the Company's risks, including credit risk by diminishing counterparties' repayment capacity or collateral values, and operational risk by negatively impacting the Company's facilities, employees, or vendors.

Transition risks of climate change may amplify credit risks through the financial impacts of changes in policy, technology or the market on the Company or its counterparties. Unanticipated market changes can lead to sudden price adjustments and give rise to heightened market risk. Reputational risk can arise for the Company, if BAC does not meet its climate-related commitments and/or goals, or is perceived to be inadequately responsive to climate change.

The Company embeds climate risk considerations into its existing risk management programmes.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

32. STRUCTURED ENTITIES AND TRANSFERS OF FINANCIAL ASSETS

Structured entities

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in determining who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of other contractual arrangements.

The most common type of structured entity is an SPE. The party that has power to direct the most significant activities of the entity and is exposed to the risks of the entity (together constituting control of the entity) is required to consolidate the assets and liabilities of the structured entity. The structured entities over which the Company has control are consolidated into the financial statements of the ultimate parent undertaking of the Company, BAC.

Interests in unconsolidated structured entities

The Company's interests in unconsolidated structured entities are considered as the contractual and non-contractual involvement that exposes the Company to variability of returns from the performance of the structured entity. Interests in other entities can be evidenced by, but not limited to, the holding of equity or debt instruments as well as other forms of involvement such as the provision of funding, liquidity support, credit enhancement and guarantees.

The Company has involvement with various structured entities, originated within the BAC Group or by third parties. These typically include equity funds and credit vehicles.

Credit vehicles are typically created on behalf of customers who wish to obtain market or credit exposure to a specific company, index, commodity or financial instrument. The Company may transfer assets to and on occasion finance securities issued by these vehicles. The Company typically enters into credit, equity, interest rate, commodity or foreign currency derivatives to synthetically create or alter the investment profile of the issued securities.

As the Company does not prepare consolidated financial statements, all interests in structured entities are considered as unconsolidated in this disclosure. SPEs for which the Company also has control are listed in note 15 Subsidiary Undertakings. The Company typically has either an interest in or control over sponsored SPEs, and instances where it has neither are rare.

Where the Company's interest in an SPE involves the transfer of an asset, these have been disclosed in the transfer of financial assets section below.

The total size of SPEs disclosed in the transfer of financial assets section below is calculated as the principal outstanding of the SPEs.

Interest rate swaps and foreign exchange derivatives that are not complex and which expose the Company to insignificant credit risk by being senior in the payment waterfall of a securitisation and derivatives that are determined to introduce risk or variability to a structured entity are not considered to be an interest in an entity and have been excluded from the disclosures below where this is the only involvement with the SPE.

The income reported on the unconsolidated SPEs is reported in net trading revenues and interest income. The SPE funding is facilitated by the issuance of notes.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

32. STRUCTURED ENTITIES AND TRANSFERS OF FINANCIAL ASSETS (continued)

Short-term traded interests in unconsolidated structured entities

The Company invests in asset-backed securities ("ABS"), Collateralised Debt Obligation ("CDO") and other similar investments issued by third party SPEs, with which it has no other form of involvement, as part of its trading activities other than a loan or debt security issued by the SPE. The Company's maximum loss exposure to these SPEs is the investment balances. These SPEs (securities and loans) are not controlled by the Company hence, included in Note 17 Trading assets and Note 21 Trading liabilities and not in the 2023 table below.

Interests in unconsolidated SPEs where the Company is not the transferor

Interests in unconsolidated SPEs where the Company is not the transferor of an asset are as follows:

	Carrying amount of financial assets \$M	Carrying amount of financial liabilities \$M	Maximum exposure to loss \$M
31 December 2023			
Trading assets			
Asset Backed security (non residential mortgages)	37	(28)	37
	<u>37</u>	<u>(28)</u>	<u>37</u>

	Carrying amount of financial assets \$M	Carrying amount of financial liabilities \$M	Maximum exposure to loss \$M
31 December 2022			
Trading assets			
Collateralised Debt Obligation (CDO)/ Collateralised Loan Obligation (CLO)	69	—	69
Asset Backed security (non residential mortgages)	40	(31)	40
	<u>109</u>	<u>(31)</u>	<u>109</u>

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

32. STRUCTURED ENTITIES AND TRANSFERS OF FINANCIAL ASSETS (continued)**Sponsored entities**

The Company considers itself the sponsor of a structured entity where it is primarily involved in the design and establishment of the structured entity; and further where the Company transfers assets to the structured entity; markets products associated with the structured entity in its own name; provides operational support to ensure the SPEs continue operation and/or provides guarantees regarding the structured entity's performance.

During the year, the Company has not provided any non-contractual financial or other support to unconsolidated structured entities (2022: none).

Transfers of financial assets

The Company enters into transactions in the normal course of business in which it transfers financial assets to third parties and to SPEs. These transactions may result in the financial assets either continuing to be recognised or being derecognised. Refer to note 2.17 Derecognition of Financial Assets and Liabilities for the accounting policy governing derecognition of financial assets.

The maximum exposure to loss, disclosed in the below tables, typically includes the carrying value of any retained interest and derivative balances held on the statement of financial position as well as the value of any undrawn liquidity facilities provided. Where there is a potential obligation for further pay-outs (such as a potential requirement to repurchase the transferred assets) this has been incorporated such that for certain trades the maximum exposure to loss has been set equal to the value of the charged assets.

a) Transferred financial assets that continue to be recognised

Where substantially all the risks and rewards of a transferred financial asset are retained the transaction is, in substance, a secured borrowing. The financial asset continues to be recognised in full and a corresponding liability is recognised in borrowings to the extent of any cash consideration received. Transactions of this nature include repurchase agreements, securities loaned/ lending transactions (both cash and securities collateral) and derivative transactions including total return swaps and call options; and primarily involves trading assets including non-US government and agency securities, corporate debt and equities.

As a result of these transactions, the Company is unable to pledge, sell or use the assets for the duration of the transaction. The Company remains exposed to substantially all of the relevant market risks on these transferred assets.

Assets are transferred under repurchase and securities lending agreements with other banks and financial institutions. In substance, these transactions constitute secured borrowings and therefore the assets are not derecognised from the statement of financial position. The recipient is generally able to use, sell or pledge the transferred assets for the duration of the transaction. The Company remains exposed to interest and credit risk on these instruments which they are contractually required to repurchase at a later date. However, due to the nature of these arrangements, especially the transfer of collateral and ongoing margining, the Company has minimal exposure to the performance of the counterparty. The counterparty's recourse is generally not limited to the transferred assets.

The Company has entered into transactions under which it transfers equity securities to a counterparty, and contemporaneously enters into a total return swap over the equity securities with the same counterparty. These assets are not derecognised from inventory where it is determined that the Company has retained the risks and rewards of ownership. The carrying value and fair value of assets for these transactions as at 31 December 2023 was \$1,175 million (2022: \$552 million), with a corresponding liability recorded within creditors.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

32. STRUCTURED ENTITIES AND TRANSFERS OF FINANCIAL ASSETS (continued)

The carrying value of transferred financial assets that continue to be recognised is \$6 million (2022: \$4 million). This trading asset relates to transfers to SPEs and the maximum exposure to loss is \$6 million. The total size of the SPEs for the transactions is \$36 million (2022: \$19 million).

b) Continuing involvement in financial assets that have been derecognised in full

The Company has also entered into transactions where it has continuing involvement in transferred assets that have been derecognised in full. Continuing involvement typically involves derivative transactions, retained interest in notes and the provision of liquidity facilities.

The table below reflects the Company's continuing involvement in transactions where it has transferred financial assets that were derecognised in full.

	Carrying amount of continuing involvement assets \$M	Carrying amount of continuing involvement liabilities \$M	Fair value of continuing involvement assets \$M	Fair value of continuing involvement liabilities \$M	Maximum exposure to loss \$M
31 December 2023					
Trading assets					
Asset Backed security (non residential mortgages)	22	(6)	22	(6)	22
Other debtors and prepayments	3	(1)	3	(1)	12
	<u>25</u>	<u>(7)</u>	<u>25</u>	<u>(7)</u>	<u>34</u>

	Carrying amount of continuing involvement assets \$M	Carrying amount of continuing involvement liabilities \$M	Fair value of continuing involvement assets \$M	Fair value of continuing involvement liabilities \$M	Maximum exposure to loss \$M
31 December 2022					
Trading assets					
Asset Backed security (non residential mortgages)	114	(7)	114	(7)	114
Other debtors and prepayments	3	—	3	—	3
	<u>117</u>	<u>(7)</u>	<u>117</u>	<u>(7)</u>	<u>117</u>

All of the amounts in the table above relate to interests in SPEs.

The total amount of liabilities issued by the SPEs for the transactions in the above table is \$7,210 million (2022: \$9,817 million).

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

32. STRUCTURED ENTITIES AND TRANSFERS OF FINANCIAL ASSETS (continued)

The table below reflects information about profit and loss associated with the above transactions:

The decrease of \$18 million in the cumulative income is mainly due to sold or liquidated positions amounting to \$19 million offset by \$1 million income recognised during the year.

	Income recognised in the year \$M	Cumulative income \$M
31 December 2023		
Trading assets	1	46
	1	46

	Income recognised in the year \$M	Cumulative income \$M
31 December 2022		
Trading assets	8	64
	8	64

Certain transferred assets that have been derecognised may be required to be repurchased subject to contingencies. The contractual undiscounted cash flows that may be required are set out in the table below:

	1 - 5 years \$M	More than 5 years \$M
31 December 2023		
Other debtors and prepayments	8	7
	8	7
31 December 2022		
Other debtors and prepayments		7
		7

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

33. FAIR VALUE DISCLOSURES

In accordance with IFRS 13 – Fair Value Measurement, financial instruments carried at fair value have been categorised into a three-level fair value hierarchy based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3).

Financial instruments are considered Level 1 when their valuation is based on quoted prices in active markets for identical assets or liabilities. Level 2 financial instruments are valued using quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or models using inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. The Company makes use of the portfolio exception and manages certain portfolios of financial instruments (e.g. OTC derivatives and certain structured liabilities) on the basis of net open risk exposure and has elected to estimate the fair value of such portfolios based on the net open risk exposure at the measurement date. Where this is the case, valuation adjustments (e.g. bid-ask adjustment or credit risk adjustments that reflect the measurement on the basis of the net exposure) may be necessary to reflect the cost of exiting a larger-than-normal market-size net open risk position. During 2023, there were no significant changes to valuation approaches or techniques that had, or are expected to have, a material impact on the Company's financial position or results of operations. The model inputs are considered significant if, in the opinion of management, impact on balance sheet carrying value would be greater than 10%. Between 5% and 10% further review and exercise of professional judgement will be required.

Resale and repurchase and securities borrowed and loaned agreements

The fair value for certain resale and repurchase agreements and securities borrowed and loaned agreements is estimated using a discounted cash flow model which incorporates inputs such as interest rate yield curves. Resale and repurchase agreements and securities borrowed and loaned agreements for which are measured at fair value, are generally classified as Level 2 in the fair value hierarchy.

Trading assets and liabilities

The fair values of trading assets and liabilities are primarily based on actively traded markets where prices are based on either direct market quotes or observed transactions. Liquidity is a significant factor in the determination of the fair values of trading assets and liabilities. In less liquid markets, market price quotes may not be readily available. Some of these instruments are valued using a net asset value approach, which considers the value of the underlying assets. In these instances, fair value is determined based on limited available market information and other factors, principally from reviewing the issuer's financial statements and changes in credit ratings made by one or more rating agencies.

Derivative assets and liabilities

The fair values of derivative assets and liabilities traded in the OTC market are determined using quantitative models that require the use of multiple market inputs including interest rates, prices, and indices to generate continuous yield or pricing curves and volatility factors, which are used to value the position. The majority of market inputs are actively quoted and can be validated through external sources, including brokers, market transactions and third party pricing services. When third party pricing services are used, the methods and assumptions are reviewed by the Company. Estimation risk is greater for derivative asset and liability positions that are either option-based or have longer maturity dates where observable market inputs are less readily available, or are unobservable, in which case, quantitative-based extrapolations of rate, price or index scenarios are used in determining fair values. The fair value of derivative assets and liabilities include adjustments for market liquidity, counterparty credit quality and other deal specific factors, where appropriate. For exchange-traded contracts, fair value is based on quoted market prices in active or inactive markets or is derived from observable market-based pricing parameters, similar to those applied to OTC derivatives.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

33. FAIR VALUE DISCLOSURES (continued)**Derivative assets and liabilities (continued)**

In addition, the Company incorporates within its fair value measurements of OTC derivatives a valuation adjustment to reflect the credit risk associated with the net position. Positions are netted by counterparty, and the fair value for net long exposures is adjusted for counterparty credit risk whilst the fair value for net short exposures is adjusted for the Company's own credit risk. The Company also incorporates a Funding Valuation Adjustment within its fair value measurements to include funding costs on uncollateralised derivatives and derivatives where the Company is not permitted to use the collateral it receives. An estimate of severity of loss is also used in the determination of fair value, primarily based on market data.

Other investments

The fair value of other investments is determined by using quantitative models that require the use of valuation techniques. As these securities are not actively traded or where quoted prices are available, the Company utilises comparable trading multiples in arriving at the valuation for these positions. Management determines comparable public companies and calculates a trading multiple for each comparable company identified using other observable inputs. The trading multiple is then discounted for considerations such as illiquidity and differences between the comparable companies based on company specific facts and circumstances. Where possible, management corroborates fair value with observations of market transactions of the same underlying instruments between knowledgeable and willing parties in arm's length transactions.

Debt securities at FVOCI

The fair value of debt securities at FVOCI are based on both actively traded markets where prices are based on direct market quotes or observed transactions, and markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs.

Investments whose values are based on quoted market prices in active markets are classified within Level 1, including US government treasury bills and certain non-US sovereign obligations. The Company does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices are classified within Level 2. These include certain non-US sovereign obligations. As Level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Securities

A significant increase in market yields, default rates, loss severities or duration would result in a significantly lower fair value for long positions. Short positions would be impacted in a directionally opposite way. The impact of changes in prepayment speeds would have differing impacts depending on the seniority of the instrument and, in the case of CLOs, whether prepayments can be reinvested. A significant increase in price would result in a significantly higher fair value for long positions, and short positions would be impacted in a directionally opposite way.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

33. FAIR VALUE DISCLOSURES (continued)

The tables below present the carrying value of financial instruments held at fair value across the three levels of the fair value hierarchy at 31 December 2023 and 31 December 2022.

	Level 1 \$M	Level 2 \$M	Level 3 \$M	Total \$M
31 December 2023 - Recurring Fair Value Measurement Assets				
Resale agreements and securities borrowed transactions	—	39,839	—	39,839
Derivative assets	3,821	135,552	1,647	141,020
Equities and convertible debentures	19,288	12,728	59	32,075
Corporate debt and preferred stock	—	10,001	197	10,198
Mortgage-backed and asset-backed securities	—	1,134	263	1,397

Total liabilities	22,753	224,995	1,438	249,186

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

33. FAIR VALUE DISCLOSURES (continued)**Transfers between Level 1 and Level 2**

During 2023, there were transfers of financial instruments of \$8,247 million (2022: \$12,175 million) from Level 1 to Level 2 and of \$9,125 million (2022: \$10,300 million) from Level 2 to Level 1 on assets and \$6,125 million (2022: \$10,174 million) from Level 1 to Level 2 and of \$6,888 million (2022: \$6,985 million) from Level 2 to Level 1 on liabilities.

Transfers between levels of the fair value hierarchy are deemed to occur at the end of each quarterly reporting period. Transfers into and out of levels of the fair value hierarchy are primarily attributable to observability of valuation inputs and price transparency.

Fair Values of Level 3 Assets and Liabilities

The Level 3 financial instruments include corporate loans, bonds, derivatives, illiquid and unlisted equity investments.

By definition unobservable inputs relate to mark-to-model financial instruments having unobservable model inputs that have an overall significant impact on the financial instrument fair value. The model inputs are considered significant if, in the opinion of management, impact on balance sheet carrying value would be greater than 10%. Between 5% and 10% further review and exercise of professional judgement will be required. This is true whether the financial instrument is considered a cash security, securitised product or structured derivative. Classification on Level 3 is essentially a result of failure to be classified on either Levels 1 or 2. It is important to note some key points regarding the use of unobservable inputs for the purposes of estimating fair value:

- Unobservable inputs can only be used in the absence of reliable observable market data.
- If unobservable inputs are used, they must reflect the assumptions market participants would use when pricing the asset or liability, including assumptions about risk. If the Company's own data is used to develop unobservable inputs, this should be adjusted if reasonably available information suggests other market participants would use different data.
- Assumptions about risk include the risk or uncertainty inherent in a particular valuation model used to estimate fair value, as well as the inputs used by the valuation model. A fair value estimate produced from a valuation model must be adjusted for these risks if a market participant would do so in their pricing of an asset or liability.

Level 3 assets as of 31 December 2023 totalled \$2,322 million (2022: \$2,773 million) and represented 1 percent (2022: 1 percent) of both total assets and assets measured at fair value. Level 3 liabilities as of 31 December 2023 totalled \$1,558 million (2022: \$1,438 million) and represented 1 percent (2022: 1 percent) of both total liabilities and liabilities measured at fair value. The tables on the next pages present a reconciliation of the opening and closing balances for all Level 3 assets and liabilities measured at fair value at 31 December 2023 and 31 December 2022.

Day one profit / (loss)

Day one profit deferred by the entity was \$127 million (2022: \$81 million). For further information see note 23 Creditors: Amounts Falling Due Within One Year.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

33. FAIR VALUE DISCLOSURES (continued)

The following table provides a summary of changes in Level 3 financial assets.

	Derivative assets \$M	Equities and convertible debentures \$M	Corporate debt and preferred stock \$M	Mortgage - backed and asset- backed securities \$M	Repo \$M	Non US Govt \$M	Other investments \$M	Total \$M
Financial Assets								
At 1 January 2023	1,983	61	225	355	6	47	96	2,773
Total gains/ (losses) recognised throughout the year	(503)	55	30	6	—	8	30	(374)
Purchases	295	3	61	73	—	60	—	492
Sales	(1)	(2)	(86)	(197)	—	(23)	—	(309)
Issuances	—	—	4	—	—	—	—	4
Settlements	(203)	(60)	(127)	(10)	—	(62)	—	(462)
Transfers out	(362)	(4)	(31)	(117)	(13)	—	—	(527)
Transfers in	438	6	121	153	7	—	—	725
At 31 December 2023	1,647	59	197	263	—	30	126	2,322
Unrealised gains/(losses)	(503)	(5)	8	(2)	—	8	30	(464)

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

33. FAIR VALUE DISCLOSURES (continued)

The following table provides a summary of changes in Level 3 financial liabilities.

Financial Liabilities	Derivative liabilities \$M	Equities and convertible debentures \$M	Corporate debt and preferred stock \$M	Non-US governments and agencies \$M	Other creditors \$M	Total \$M
At 1 January 2023	(1,223)	—	(4)	—	(211)	(1,438)
Total (losses)/gains recognised throughout the year	(262)	—	(2)	—	(20)	(284)
Purchases	—	—	—	—	—	—
Sales	(343)	—	—	—	(16)	(359)
Issuances	—	—	—	—	(8)	(8)
Settlements	121	—	—	—	62	183
Transfers out	659	—	—	—	5	664
Transfers in	(314)	(2)	—	—	—	(316)
At 31 December 2023	(1,362)	(2)	(6)	—	(188)	(1,558)
Unrealised gains/ (losses)	315	—	1	—	21	337

Unrealised gains/ (losses) relate to profit or loss from positions still held at year end and are included within net trading revenues. Total gains/ (losses) recognised throughout the year are included within net trading revenues.

Transfers between levels of the fair value hierarchy are assessed on a quarterly basis and the policy for determining a transfer amount is consistent for transfers in and transfers out. The transfers into Level 3 from Level 2 during the year were due to a lack of observable market pricing data subsequent to purchase. The transfers out of Level 3 to Level 2 during the year were due to increased availability of observable pricing data on underlying positions.

MERRILL LYNCH INTERNATIONAL

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

33. FAIR VALUE DISCLOSURES (continued)

The following table provides a summary of changes in Level 3 financial assets.

	Derivative assets \$M	Equities and convertible debentures \$M	Corporate debt and preferred stock \$M	Mortgage- backed and asset- backed securities \$M	Repo \$M	Non US Govt \$M	Other investments \$M	Total \$M

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

33. FAIR VALUE DISCLOSURES (continued)

The following table provides a summary of changes in Level 3 financial liabilities.

	Derivative liabilities \$M	Corporate debt and preferred stock \$M	Non-US governments and agencies \$M	Other creditors \$M	Total \$M
Financial Liabilities					
At 1 January 2022	(620)	(1)	—	(471)	(1,092)
Total (losses)/gains recognised throughout the year	(158)	1	1	(3)	(159)
Purchases	(2)	—	—	—	(2)
Sales	(355)	1	—	(16)	(370)
Issuances	—	—	—	(2)	(2)
Settlements	114	—	—	19	133
Transfers out	297	—	—	272	569
Transfers in	(499)	(5)	(1)	(10)	(515)
At 31 December 2022	<u>(1,223)</u>	<u>(4)</u>	<u>—</u>	<u>(211)</u>	<u>(1,438)</u>
Unrealised gains/(losses)	<u>131</u>	<u>(1)</u>	<u>(1)</u>	<u>4</u>	<u>133</u>

The following tables provide information on the valuation techniques, significant unobservable inputs and their ranges for each major category of assets and liabilities measured at fair value on a recurring basis with a significant Level 3 balance.

The level of aggregation and breadth of products cause the range of inputs to be wide and not evenly distributed across the inventory. Further, the range of unobservable inputs may differ across firms in the financial services industry because of diversity in the types of products included in each firm's inventory.

The Company uses multiple market approaches in valuing certain of its Level 3 financial instruments. For example, market comparable and discounted cash flows are used together. For a given product, such as corporate debt securities, market comparable may be used to estimate some of the unobservable inputs and then these inputs are incorporated into a discounted cash flow model. Therefore, the balances disclosed encompass both of these techniques.

33. FAIR VALUE DISCLOSURES (continued)**Securities**

A significant increase in market yields, default rates, loss severities or duration would result in a significantly lower fair value for long positions. Short positions would be impacted in a directionally opposite way. The impact of changes in prepayment speeds would have differing impacts depending on the seniority of the instrument and, in the case of CLOs, whether prepayments can be reinvested. A significant increase in price would result in a significantly higher fair value for long positions, and short positions would be impacted in a directionally opposite way.

Derivatives assets and liabilities

For credit derivatives, a significant increase in market yield, upfront points (i.e., a single upfront payment made by a protection buyer at inception), credit spreads, default rates or loss severities would result in a significantly lower fair value for protection sellers and higher fair value for protection buyers. The impact of changes in prepayment speeds would have differing impacts depending on the seniority of the instrument and, in the case of CLOs, whether prepayments can be reinvested.

Structured credit derivatives are impacted by credit correlation. Default correlation is a parameter that describes the degree of dependence among credit default rates within a credit portfolio that underlies a credit derivative instrument. The sensitivity of this input on the fair value varies depending on the level of subordination of the tranche. For senior tranches that are net purchases of protection, a significant increase in default correlation would result in a significantly higher fair value. Net short protection positions would be impacted in a directionally opposite way.

For equity derivatives, commodity derivatives, interest rate derivatives and structured liabilities, a significant change in long-dated rates, volatilities and correlation inputs (e.g., the degree of correlation between an equity security and an index, between two different commodities, between two different interest rates, or between interest rates and foreign exchange rates) would result in a significant impact to the fair value; however, the magnitude and direction of the impact depends on whether the Company is long or short the exposure. For structured liabilities, a significant increase in yield or decrease in price would result in a significantly lower fair value. A significant decrease in duration may result in a significantly higher fair value.

Sensitivity analysis of unobservable inputs

Where the value of financial instruments is dependent on unobservable inputs, the precise level for these parameters at the reporting date might be drawn from a spectrum of reasonably possible alternatives. Appropriate levels for these inputs are chosen so that they are consistent with prevailing market evidence and in line with the Company's valuation control policies. Were the Company to have valued the financial instruments concerned using input values drawn from the extremes of the ranges of reasonable possible alternatives then as at the year end, it could have increased fair value by as much as \$954 million (2022: \$1,005 million) or decreased fair value by as much as \$1,216 million (2022: \$1,285 million) with the potential effect impacting profit and loss.

This disclosure is intended to illustrate the potential impact of the relative uncertainty in the fair value of financial instruments for which valuation is dependent on unobservable inputs and is not predictive or indicative of future movements in fair value. Furthermore, it is unlikely in practice that all unobservable parameters would be simultaneously at the extremes of their ranges of reasonable possible alternatives.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023

33. FAIR VALUE DISCLOSURES (continued)

Financial assets and liabilities carried at amortised cost

The below summarises the fair value of the Company's financial assets and liabilities which are carried at amortised cost.

Reverse repurchase agreements and repurchase agreements are classified as Level 2 and the carrying amount is deemed a reasonable approximation of fair value, given the short-term nature of these instruments. Carrying amount for Resale agreements and securities borrowed held at amortised cost was \$58,218 million (2022: 47,365 million) while for Repurchase agreements and securities loaned held at amortised cost was \$24,238 million (2022: \$25,832 million).

The fair value of other long-term funding is determined by reference to quoted market prices where available or by reference to quoted market prices of similar instruments.

Long-term funding made up of amount owned to affiliates is classified as Level 2 and has an approximate fair value of \$24,787 million (2022: \$21,894 million) and carrying amount of \$24,283 million (2022: \$22,430 million), for more details see note 24 Creditors: Amount falling due after more than one year.

Carrying amount of debtors held at amortised cost was \$54,891 million (2022: \$65,121 million) and of creditors was \$55,437 million (2022: \$58,015 million). Included within debtors, is an amount owed from an affiliated company which is due after one year and has an approximate fair value of \$3,133 million (2022: \$3,373 million) and carrying amount of \$3,014 million (2022: \$3,289 million). For more details refer to note 19 Debtors.

All other debtors and creditors in the statement of financial position are classified as Level 2. The carrying amounts are a reasonable approximation of their fair value, due to the short-term nature of these instruments.

For more details refer to note 27 Analysis of Financial Assets and Liabilities by Measurement Basis.

34. SHARE BASED PAYMENTS

BAC administers a number of equity compensation plans, with awards being granted predominantly from the Bank of America Corporation Equity Plan ("BACEP") (previously known as the Bank of America Corporation Key Employee Equity Plan ("KEEP")). Under this plan, shares of BAC's common stock are authorised to be used for grants of awards to the Company's employees.

During the year ended 31 December 2023, BAC granted restricted stock unit ("RSU") awards to certain employees of the Company under the BACEP, which will settle predominantly in shares of common stock of BAC. The RSUs granted predominantly vest over four years in one-fourth increments on each of the first four anniversaries of the grant date, provided that the employee remains continuously employed with the Company during that time. The expense recognised is net of estimated forfeitures for non-retirement eligible employees based on the grant-date fair value of the shares. For the RSUs granted to employees who are retirement eligible, they are deemed authorised as of the beginning of the year preceding the grant date when the incentive award plans are generally approved. As a result, the estimated value is expensed ratably over the year preceding the grant date.

Certain awards contain clawback provisions which permit BAC to cancel all or a portion of the award under specified circumstances.

Recipients of RSU awards may receive cash payments equivalent to dividends. For awards that are not dividend-eligible, the fair value measurement of the award is decreased to reflect the expected value of the dividends that similar awards would be eligible to receive.

MERRILL LYNCH INTERNATIONAL

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

34. SHARE BASED PAYMENTS (continued)

The total pre-tax compensation cost recognised in profit and loss for share-based compensation plans for the year ended 31 December 2023 was \$195 million (2022: \$111 million), including the incremental effects of the chargeback agreements with BAC.

35. INTEREST RATE BENCHMARK REFORM

Immediately after 30 June 2023, the remaining U.S. dollar LIBOR settings (i.e., overnight, one month, three month, six month and 12 month) ceased or became non-representative, although the FCA is requiring LIBOR's administrator, ICE Benchmark Administration Limited, to continue publication of the one-month, three-month and six month USD LIBOR settings on a "synthetic" basis (calculated using the relevant CME Term SOFR Reference Rate plus the respective International Swaps and Derivatives Association fixed spread adjustment) for use in legacy contracts, which the FCA intends to continue to publish until 30 September 2024. On 20 December 2022, Banco de Mexico announced its plan for the transition of TIE with tenors greater than one business day to the overnight TIE Funding Rate. This was approved by the Board of Governors of Banco de Mexico on 31 March 2023 and was subsequently published in the Official Journal of the Federation on 13 April 2023. In October 2023, the Steering Committee of the National Working Group for Benchmark Reform in Poland postponed the cessation of WIBOR/ WIBID benchmarks to the end of 2027.

The following table summarises the significant exposures impacted by interest rate benchmark reform as at 31 December 2023:

	CAD CDOR	PLN WIBOR	MXN TIE	Other IBOR	TOTAL
	\$M	\$M	\$M	\$M	\$M
Derivatives	142,890	107,046	54,228	280	304,444
	<u>142,890</u>	<u>107,046</u>	<u>54,228</u>	<u>280</u>	<u>304,444</u>

The table above represents indicative exposures to interest rate benchmark reform, which have yet to transition to an alternative benchmark rate. The exposure disclosed is for positions with contractual maturities after 31 December 2023. Balances are reported using the notional contract amount and where derivatives have both pay and receive legs with exposure to benchmark reform such as cross currency swaps, the notional contract amount is disclosed for both legs. The majority of the aggregate notional amount of the Company's IBOR-based products maturing after 2023 include or have been updated to include fallbacks to ARR's.

The following table relates to comparatives as at 31 December 2022:

	USD LIBOR	CAD CDOR	PLN WIBOR	THB IBOR	Other IBOR	TOTAL
	\$M	\$M	\$M	\$M	\$M	\$M
Non-derivative financial assets	425	—	—	—	—	425
Non-derivative financial liabilities	7	—	—	—	—	7
Derivatives	1,620,400	188,554	73,088	21,179	9,559	1,912,780
	<u>1,620,832</u>	<u>188,554</u>	<u>73,088</u>	<u>21,179</u>	<u>9,559</u>	<u>1,913,212</u>

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2023**

36. RELATED PARTY TRANSACTIONS

As detailed in note 1, the Company has elected to take advantage of the exemption available under FRS 101 for the requirements in IAS 24 - Related Party Disclosures to disclose related party transactions entered into between two or more members of a group.

Management considers key management personnel to be represented by the Board of Directors of the Company. Details of the remuneration of the directors are included in note 10 Directors' Remuneration.

37. EVENTS OCCURRING AFTER THE REPORTING DATE

The Company evaluates whether events occurring after the balance sheet date but before the date the consolidated financial statements are available to be issued, require accounting as of the balance sheet date, or disclosure in the financial statements. The Company has evaluated such subsequent events through 19 March 2024 which is the issuance date of the financial statements.

On 19 March 2024 the Company's directors recommended the final dividend for the year ended 31 December 2023 of \$1,186 million (\$0.15 per share).

There were no other material subsequent events that occurred during such period that would require disclosure or recognition in the financial statements as of 31 December 2023.
