## Supplementary Financial Information (Unaudited)

The information of international claims discloses exposures to foreign counterparties on which the ultimate risk lies, and is derived according to the location of the counterparties after taking into account any transfer of risk. In general, transfer of risk from one country to another is recognized, if the claims against counterparties are guaranteed by another party in a different country or if the claims are on an overseas branch of a bank whose head office is located in a different country.

A country or geographical segment (including Hong Kong) should generally be reported individually if it constitutes 10% or more of the aggregated international claims.
