5yr Auto Callable Review Notes linked to the MerQube US Large-Cap Vol Advantage Index

J.P.Morgan

The following is a summary of the terms of the notes offered by the preliminary pricing supplement hyperlinked below.

Index Overview

The MerQube US Large-Cap Vol Advantage Index (the "Index") attempts to provide a dynamic rules-based exposure to an unfunded rolling position in E-Mini[®] S&P 500[®] futures (the "Futures Contracts"), which reference the S&P 500[®] Index (the "Constituent"), while targeting a level of implied volatility, with a maximum exposure to the Futures Contracts of 500% and a minimum exposure to the Futures Contracts of 0%. The Index is subject to a 6.0% per annum daily deduction. The Constituent consists of stocks of 500 companies selected to provide a performance benchmark for the U.S. equity markets.

Summary of Terms

Issuer:	JPMorgan Chase Financial Company LLC
Guarantor:	JPMorgan Chase & Co.
Minimum Denomination:	\$1,000
Index (Index Ticker):	The MerQube US Large-Cap Vol Advantage Index (Bloomberg ticker: MQUSLVA). The level of the Index reflects a deduction of 6.0% per annum that accrues daily.
Pricing Date:	August 27, 2024
Final Review Date:	August 27, 2029
Maturity Date:	August 30, 2029
Review Dates:	Annual

CUSIP:	48135P4M0
Preliminary Pricing Supplement:	http://sp.jpmorgan.com/document/cusip/48135P4M0/doctype/Product_Termsheet/document.pdf
Estimated Value:	The estimated value of the notes, when the terms of the notes are set, will not be less than \$900.00 per \$1,000 principal amount note. For information about the estimated value of the notes, which likely will be lower than the price you paid for the notes, please see the hyperlink above.

You may lose some or all of your principal at maturity. Any payment on the notes is subject to the credit risk of JPMorgan Chase Financial Company LLC, as issuer of the notes and the credit risk of JPMorgan Chase & Co., as guarantor of the notes.

Automatic Call

If the closing level of the Index on any Review Date is greater than or equal to the Call Value, the notes will be automatically called for a cash payment, for each \$1,000 principal amount note, equal to (a) \$1,000 plus (b) the Call Premium Amount applicable to that Review Date, payable on the applicable Call Settlement Date. No further payments will be made on the notes.

Review Date	Call Value	Call Premium*
First	100.00% of the Initial Value	At least 26.25%
Second	100.00% of the Initial Value	At least 52.50%
Third	100.00% of the Initial Value	At least 78.75%
Fourth	100.00% of the Initial Value	At least 105.00%
Final	100.00% of the Initial Value	At least 131.25%

Payment at Maturity

If the notes have not been automatically called and the Final Value is greater than or equal to the Barrier Amount, you will receive the principal amount of your notes at maturity.

If the notes have not been automatically called and the Final Value is less than the Barrier Amount, your payment at maturity per \$1,000 principal amount note will be calculated as follows:

$$\$1,000 + (\$1,000 \times \text{Index Return})$$

If the notes have not been automatically called and the Final Value is less than the Barrier Amount, you will lose more than 50.00% of your principal amount at maturity and could lose all of your principal amount at maturity.

Investing in the notes linked to the Index involves a number of risks. See "Selected Risks" on page 2 of this document, "Risk Factors" in the prospectus supplement and the relevant product supplement and underlying supplement, Annex A to the prospectus addendum and "Selected Risk Considerations" in the relevant pricing supplement.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the notes or passed upon the accuracy or the adequacy of this document or the relevant product supplement, underlying supplement, prospectus supplement, prospectus and prospectus addendum. Any representation to the contrary is a criminal offense.

* In each case, to be determined on the Pricing Date, but not less than the applicable minimum Call Premium listed.

** Not all Review Dates reflected. Reflects a Call Premium of 26.25% per annum. The Call Premium will be determined on the Pricing Date and will not be less than 26.25% per annum.

The "total return" as used above is the number, expressed as a percentage, that results from comparing the payment on the applicable payment date per \$1,000 principal amount note to \$1,000.

The hypothetical returns on the notes shown above apply only if you hold the notes for their entire term or until automatically called. These hypotheticals do not reflect fees or expenses that would be associated with any sale in the secondary market. If these fees and expenses were included, the hypothetical returns shown above would likely be lower.

Capitalized terms used but not defined herein shall have the meaning set forth in the preliminary pricing supplement.

Selected Risks

Risks Relating to the Notes Generally

- Your investment in the notes may result in a loss. The notes do not guarantee any return of principal.
- The level of the Index will include a 6.0% per annum daily deduction.
- Any payment on the notes is subject to the credit risks of JPMorgan Chase Financial Company LLC and JPMorgan Chase & Co. Therefore the value of the notes prior to maturity will be subject to changes in the market's view of the creditworthiness of JPMorgan Chase Financial Company LLC or JPMorgan Chase & Co.
- As a finance subsidiary, JPMorgan Chase Financial Company LLC has no independent operations and has limited assets.
- The appreciation potential of the notes is limited to any Call Premium Amount paid on the notes.
- The benefit provided by the Barrier Amount may terminate on the final Review Date.
- The automatic call feature may force a potential early exit.
- No interest payments, dividend payments or voting rights.
- Lack of liquidity: J.P. Morgan Securities LLC (who we refer to as "JPMS") intends to offer to purchase the notes in the secondary market but is not required to do so. The price, if any, at which JPMS will be willing to purchase notes from you in the secondary market, if at all, may result in a significant loss of your principal.
- The tax consequences of the notes may be uncertain. You should consult your tax adviser regarding the U.S. federal income tax consequences of an investment in the notes.

Risks Relating to Conflicts of Interest

- Potential conflicts: We and our affiliates play a variety of roles in connection with the issuance of notes, including acting as calculation agent and hedging our obligations under the notes, and making the assumptions used to determine the pricing of the notes and the estimated value of the notes when the terms of the notes are set. It is possible that such hedging or other trading activities of J.P. Morgan or its affiliates could result in substantial returns for J.P. Morgan and its affiliates while the value of the notes declines.
- Our affiliate, JPMS, worked with MerQube in developing the guidelines and policies governing the composition and calculation of the Index.

Selected Risks (continued)

Risks Relating to the Estimated Value and Secondary Market Prices of the Notes

- The estimated value of the notes will be lower than the original issue price (price to public) of the notes.
- The estimated value of the notes does not represent future values and may differ from others' estimates.
- The estimated value of the notes is determined by reference to an internal funding rate.
- The value of the notes, which may be reflected in customer account statements, may be higher than the then current estimated value of the notes for a limited time period.

Risks Relating to the Index

- The Index may not be successful or outperform any alternative strategy.
- The Index may not approximate its target volatility.
- The Index is subject to risks associated with the use of significant leverage.
- The Index may be significantly uninvested.
- The Index may be adversely affected if later futures contracts have higher prices than an expiring futures contract included in the Index.
- The Index is an excess return index that does not reflect "total returns."
- JPMorgan Chase & Co. is currently one of the companies that make up the S&P 500® Index.
- Concentration risks associated with the Index may adversely affect the value of your notes.
- The Index is subject to significant risks associated with futures contracts, including volatility.
- Suspension or disruptions of market trading in futures contracts may adversely affect the value of your notes.
- The official settlement price and intraday trading prices of the relevant futures contracts may not be readily available.
- Changes in the margin requirements for the futures contracts included in the Index may adversely affect the value of the notes.
- The Index was established on February 11, 2022 and may perform in unanticipated ways.

The risks identified above are not exhaustive. Please see "Risk Factors" in the prospectus supplement and the applicable product supplement and underlying supplement, Annex A to the prospectus addendum and "Selected Risk Considerations" in the applicable preliminary pricing supplement for additional information.
