MORGAN STANLEY B.V.

INTERIM MANAGEMENT REPORT

The Directors present their interim management report, Directors' responsibility statement and the condensed financial statements for Morgan Stanley B.V. (the "Company") for the six months ended 30 June 2024.

RESULTS AND DIVIDENDS

The profit for the six months ended 30 June 2024, after tax, was €401,000 (30 June 2023: €645,000).

During the six months ended 30 June 2024, no dividends were paid or proposed (30 June 2023: €nil).

PRINCIPAL ACTIVITY

The principal activity of the Company is the issuance of financial instruments including notes, certificates and warrants ("structured notes") and the hedging of the obligations arising pursuant to such issuances.

The Company was incorporated under Dutch law on 6 September 2001 and has its statutory seat in Amsterdam, The Netherlands. The business office of the Company is at Luna Arena, Herikerbergweg 238, 1101 CM, Amsterdam, The Netherlands.

The Company's ultimate parent undertaking and controlling entity is Morgan Stanley, which, together with the Company and Morgan Stanley's other subsidiary undertakings, form the "Morgan Stanley Group".

There have not been any significant changes in the Company's principal activity in the period under review and no significant change in the Company's principal activity is expected.

BUSINESS REVIEW

Exposure to risk factors and the current business environment in which it operates may impact business results of the Company's operations.

Risk factors

Risk taking is an inherent part of the Company's business activities. The Company seeks to identify, assess, monitor and manage each of the various types of risk involved in its business activities, in accordance with defined policies and procedures.

The Morgan Stanley Group Risk Appetite Statement articulates the aggregate level and type of risk that the Group is willing to accept in order to execute its business strategy and protect its capital and liquidity resources.

The Morgan Stanley Group has an established Risk Management Framework, to support the identification, monitoring and management of risk.

The key risk factors impacting the Company are consistent with those outlined in the 2023 Annual Report and Financial Statements ("2023 annual financial statements"), with the exception of the updates below.

Business environment

The market environment, client and investor confidence and overall market sentiment improved in the first half of 2024. However, geopolitical risks, inflation and uncertainty regarding the U.S. political cycle and the future path of interest rates, which have remained high relative to recent years, present ongoing risks to the economic environment. These factors have impacted, and could continue to impact capital markets and the Company, as discussed further in 'Overview of 2024 interim period'.

INTERIM MANAGEMENT REPORT

BUSINESS REVIEW (CONTINUED)

Overview of 2024 interim period

The issued structured notes expose the Company to the risk of changes in market prices of the underlying securities, interest rate risk and, where denominated in currencies other than Euros, the risk of changes in exchange rates between the Euro and the other relevant currencies. The Company enters into derivative transactions with other Morgan Stanley Group undertakings to hedge the market price, interest rate and foreign currency risks associated with the issuance of the structured notes.

The condensed statement of comprehensive income for the six months ended 30 June 2024 is set out on page 8. The Company reported a profit before income tax for the six months ended 30 June 2024 of €541,000 compared to €814,000 recognised for the six months ended 30 June 2023. The decrease in profit before income tax is driven by a decrease in the Company's share of Morgan Stanley's derivatives business revenues. The profit before income tax of the Company represents fees received in relation to intermediary services.

The condensed statement of financial position for the Company is set out on page 10. The Company's total assets at 30 June 2024 are €10,291,214,000, an increase of €641,539,000 or 7% when compared to 31 December 2023. Total liabilities of €10,256,832,000 represent an increase of €641,138,000 or 7% when compared to total liabilities at 31 December 2023. The increase in assets and liabilities is majorly due to net issuances of structured notes, the proceeds of which were passed on to another Morgan Stanley group undertaking and increase in exchange rate fluctuations & market movements during the period.

The performance of the Company is included in the results of the Morgan Stanley Group. The Company's Directors believe that providing further performance indicators for the Company itself would not enhance an understanding of the development, performance or position of the business of the Company.

The risk management section below sets out the Company's and the Morgan Stanley Group's policies for the management of liquidity and cash flow risk and other significant business risks.

Risk management

Risk is an inherent part of the Company's business activity. The Company seeks to identify, assess, monitor and manage each of the various types of risk involved in its business activities, in accordance with defined policies and procedures. The Company is managed as part of the policies and procedures of the Morgan Stanley Group's risk management policy framework. The risk management policy framework includes escalation to the appropriate senior management personnel when necessary.

Note 19 to the 2023 annual financial statements provides more detailed qualitative disclosures on the Company's exposure to financial risks. Note 14 to the condensed financial statements provides more detailed quantitative disclosures.

Set out below is an overview of the Company's policies for the management of financial risk and other significant business risk.

Market risk

Market risk refers to the risk that a change in the level of one or more market prices, rates, spreads, indices, implied volatilities, correlations or other market factors, such as market liquidity, will result in losses for a position or portfolio.

Risk management (continued)

Market risk (continued)

The Company's market risk associated with its trading activities at a legal entity, trading division and at an individual product level is managed as part of the Morgan Stanley Group's market risk management policy framework.

The Morgan Stanley Group's market risk management policy framework ensures transparency of material market risks, monitors compliance with established limits, and escalates risk concentrations to appropriate senior management when necessary.

It is the policy and objective of the Company not to be exposed to net market risk.

Credit risk

Credit risk refers to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to the Company. Credit risk includes country risk, which is further described below.

The Morgan Stanley Group's credit risk management policies and procedures, of which the Company is a part, includes escalation to the appropriate senior management personnel when necessary.

Credit risk exposure is managed on a global basis and in consideration of each significant legal entity within the Morgan Stanley Group. The credit risk management policies and procedures establish the framework for identifying, measuring, monitoring and controlling credit risk whilst ensuring transparency of material credit risks and compliance with established limits and escalating risk concentrations to appropriate senior management.

Additional information on the primary credit exposures, credit risk management and mitigation, exposure to credit risk, including the maximum exposure to credit risk by credit rating is presented in note 14.

Country risk exposure

Country risk exposure is the risk that events in, or affecting, a foreign country might adversely affect the Company. "Foreign country" means any country other than The Netherlands. Sovereign risk, by contrast, is the risk that a government will be unwilling or unable to meet its debt obligations, or renege on the debt it guarantees. Sovereign risk is single-name risk for a sovereign government, its agencies and guaranteed entities.

The Company enters into the majority of its financial asset transactions with other Morgan Stanley Group undertakings, primarily in Luxembourg, the United Kingdom ("UK") and the United States of America ("USA"). Both the Company and the other Morgan Stanley Group undertakings are wholly-owned subsidiaries of the same ultimate parent entity, Morgan Stanley. As a result of the implicit support that would be provided by Morgan Stanley, the Company's country risk is considered a component of the Morgan Stanley Group's credit risk.

For further information on how the Company identifies, monitors and manages country risk exposure refer to page 4 of the Directors' report of the Company's 2023 annual financial statements.

Risk management (continued)

Liquidity risk

Liquidity risk refers to the risk that the Company will be unable to finance its operations due to a loss of access to capital markets or difficulty in liquidating its assets. Liquidity risk also encompasses the Company's ability (or perceived ability) to meet its financial obligations without experiencing significant business disruption or reputational damage that may threaten its viability as a going concern. Liquidity risk also encompasses the associated funding risks triggered by the market or idiosyncratic stress events that may cause unexpected changes in funding needs or an inability to raise new funding.

Since the Company hedges the liquidity risk of its financial liabilities with financial assets that match the maturity profile of the financial liabilities, the Company is not considered a major operating subsidiary for the purposes of liquidity risk. However, the Company would have access to the cash or liquidity reserves held by Morgan Stanley in the unlikely event that it was unable to access adequate financing to service its financial liabilities when they become payable.

For further discussion on the Company's liquidity risk refer to pages 4 and 5 of the Directors' report in the Company's 2023 annual financial statements.

Valuation risk

Valuation risk represents the possibility that a valuation estimate of a position would differ from the price in an actual close-out transaction due to uncertainty around the actual price that could be obtained.

Valuation Control ("VC") within Finance is responsible for the Company's fair value valuation policies, processes and procedures. VC implements valuation control processes designed to validate the fair value of the Company's financial instruments measured at fair value including those derived from pricing models.

Operational risk

Operational risk refers to the risk of loss, or of damage to the Company's reputation, resulting from inadequate or failed processes, people and systems, or from external events (e.g. fraud, theft, legal, regulatory and compliance risks, cyberattacks or damage to physical assets). Operational risk relates to the following risk event categories as defined by Basel Capital Standards: internal fraud; external fraud; employment practices and workplace safety; clients, products and business practices; business disruption and system failure; damage to physical assets; and execution, delivery and process management. The scope also includes oversight of technology risk, cybersecurity risk, information security risk, and third party risk management (supplier and affiliate risk).

The Company may incur operational risk across the full scope of its business activities.

For further discussion on the Company's operational risk refer to pages 5, 6 and 7 of the Directors' report in the Company's 2023 annual financial statements.

Risk management (continued)

Legal, regulatory and compliance risk

Legal, regulatory and compliance risk includes the risk of legal or regulatory sanctions; material financial loss, including fines, penalties, judgements, damages and/ or settlements; limitations on our business; or loss to reputation which the Company may suffer as a result of a failure to comply with laws, regulations, rules, related self-regulatory organisation standards and codes of conduct applicable to our business activities. This risk also includes contractual and commercial risk, such as the risk that a counterparty's performance obligations will be unenforceable. It also includes compliance with Anti-Money Laundering, terrorist financing and anti-corruption rules and regulations. The Company is generally subject to extensive regulation in the different jurisdictions in which it conducts its business.

Culture, values and conduct of employees

Employees of the Morgan Stanley Group are accountable for conducting themselves in accordance with the Morgan Stanley Group's core values *Put Clients First, Do the Right Thing, Lead with Exceptional Ideas, Commit to Diversity and Inclusion and Give Back*. The Morgan Stanley Group's core values drive a shared set of behaviours and attributes that help employees make decisions consistent with the expectations of our clients, shareholders, regulators, Board of Directors and the public. The Morgan Stanley Group is committed to reinforcing and confirming adherence to the core values through our governance framework, tone from the top, management oversight, risk management and controls, and a three lines of defence structure.

The Morgan Stanley Group's Board is responsible for overseeing the Morgan Stanley Group's practices and procedures relating to culture, values and conduct. The Morgan Stanley Group's Senior management committees oversee the Morgan Stanley-wide culture, values and conduct program and report regularly to the Morgan Stanley Group Board. A fundamental building block of these programs is the Morgan Stanley Group's Code of Conduct (the "Code") which establishes standards for employee conduct that further reinforce the Morgan Stanley Group's commitment to integrity and ethical conduct. Every new hire and every employee annually is required to attest to their understanding of and adherence to the Code of Conduct. Morgan Stanley's Global Conduct Risk Management Policy also sets out a consistent global framework for managing conduct risk (i.e., the risk arising from misconduct by employees or contingent workers) and conduct risk incidents.

For further discussion on the Company's culture, values and conduct of employees' risk management, refer to page 8 of the Directors' report in the Company's 2023 annual financial statements.

Going concern

Business risks associated with the uncertain market and economic conditions are being actively monitored and managed by the Company. Retaining sufficient capital and liquidity to withstand these market pressures remains central to the Company's strategy.

The effect of relevant macroeconomic scenarios on the business of the Company have been considered as part of the going concern analysis, including impact on operational capacity, access to capital and liquidity, contractual obligations, asset valuations and other critical accounting judgements and key sources of estimation uncertainty.

Taking all of these factors into consideration, the Directors believe it is reasonable to assume that the Company will have access to adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the Interim Report and Condensed Financial statements.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS
Six months ended 30 June 2024

1. BASIS OF PREPARATION

Statement of compliance

The Company prepares its annual financial statements in accordance with International Financial Reporting Standards ("IFRSs") issued by the International Accounting Standards Board ("IASB") as adopted by the EU, Interpretations issued by the IFRS Interpretations Committee and Part 9 of Book 2 of the Dutch Civil Code. The condensed financial statements have been prepared in accordance with ("IAS") 34 '*Interim Financial Reporting*' as adopted by the EU.

In preparing these condensed financial statements, the Company has applied consistently the accounting policies and methods of computation used in the Company's annual financial statements for the year ended 31 December 2023.

New standards and interpretations adopted during the period

The following amendments to standards relevant to the Company's operations were adopted during the period. Except where otherwise stated, these amendments to standards did not have a material impact on the Company's condensed financial statements.

Amendments to IAS 1 '*Presentation of Financial Statements*' (IAS 1): Classification of Liabilities as Current or Non-current were issued by the IASB in January 2020 and revised in July 2020 and October 2022, for retrospective application in accounting periods beginning on or after 1 January 2024. The amendments were endorsed by the EU in January 2024.

Amendments to IAS 1: Non-current Liabilities with Covenants were issued by the IASB in October 2022 for application in accounting periods beginning on or after 1 January 2024. The amendments were endorsed by the EU in January 2024.

There were no other standards, amendments to standards or interpretations relevant to the Company's operations which were adopted during the period.

New standards and interpretations not yet adopted

At the date of authorisation of these condensed financial statements, the following amendments to standards relevant to the Company's operations were issued by the IASB but not mandatory for accounting periods beginning 1 January 2024. The Company does not expect that the adoption of the following standards, amendments to standards and interpretations will have a material impact on the Company's condensed financial statements.

Amendments to IAS 21 '*The Effects of Changes in Foreign Exchange Rates*': Lack of Exchangeability were issued by the IASB in August 2023 for prospective application in accounting periods beginning on or after 1 January 2025. Earlier application is permitted.

Amendments to IFRS 9 '*Financial Instruments*' ("IFRS 9") and IFRS 7 '*Financial Instruments: Disclosures*' ("IFRS 7") was issued by the IASB in May 2024 for retrospective application in annual periods beginning on or after 1 January 2026. Earlier application is permitted. The Company is currently assessing the impact of IFRS 9 and IFRS 7 on its financial statements.

IFRS 18 '*Presentation and Disclosure in Financial Statements*' ("IFRS 18") was issued by the IASB in April 2024 for retrospective application in annual periods beginning on or after 1 January 2027. Earlier application is permitted. The Company is currently assessing the impact of IFRS 18 on its financial statements.

NOTES TO THE CONDENSED FINANCIAL STATEMENTS
Six months ended 30 June 2024

1. BASIS OF PREPARATION (CONTINUED)

Critical accounting judgements and key sources of estimation uncertainty

In preparing the condensed financial statements, the Company makes judgements and estimates that affect the application of accounting policies and reported amounts.

Critical accounting judgements are key decisions made by management in the application of the Company's accounting policies, other than those involving estimations, which have the most significant effects on the amounts recognised in the condensed financial statements.

Key sources of estimation uncertainty represent assumptions and estimations made by management that have a significant risk of resulting in a material adjustment to the carrying amount of assets and liabilities within the next financial year.

No critical accounting judgements have been made in the process of applying the Company's accounting policies that have had a significant effect on the amounts recognised in the condensed financial statements.

The key source of estimation uncertainty is the valuation of Level 3 financial instruments. For further detail refer to note 21 and accounting policy note 3(d) of the Company's 2023 annual financial statements.

The Company evaluates the critical accounting judgements and key sources of estimation uncertainty on an ongoing basis and believes that these are reasonable.

The going concern assumption

The Company's business activities, together with the factors likely to affect its future development, performance and position, are reflected in the Business Review section of the Interim management report on pages 1 to 6. In addition, the notes to the financial statements include the Company's objectives, policies and processes for managing its capital; its financial risk management objectives; details of its financial instruments; and its exposures to credit risk and liquidity risk.

Taking the above factors into consideration, the Directors believe that the Company will have access to adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the interim management report and condensed financial statements.

Financial assets and liabilities designated at FVPL

The financial assets and financial liabilities shown in the tables above which are designated at FVPL consist primarily of the following financial assets and financial liabilities:

Structured notes: These relate to financial liabilities which arise from selling structured products generally in the form of notes, certificates and warrants. These instruments contain an embedded derivative which significantly modifies the cash flows of the issuance. The return on the instrument is linked to various underliers including, but not limited to, equity-linked notes. These structured notes are designated at FVPL as the risks to which the Company is a contractual party are risk managed on a fair value basis as part of the Company's trading portfolio and the risk is reported to key management personnel on this basis.

Loans: These are loans to other Morgan Stanley Group undertakings that, along with the prepaid equity securities contracts and the derivative contracts classified as mandatorily at FVPL, are part of the hedging strategy for the obligations arising pursuant to the issuance of the structured notes.

8. FINANCIAL ASSETS AND LIABILITIES BY MEASUREMENT CATEGORY (CONTINUED)

Financial assets and liabilities designated at FVPL (continued)

The Company determines the amount of changes in fair value attributable to changes in counterparty credit risk or own credit risk, as relating to loans and issued structured notes, by first determining the fair value including the impact of counterparty credit risk or own credit risk, and then deducting those changes in fair value representing managed market risk. In determining fair value, the Company considers the impact of changes in own credit spreads based upon observations of the secondary bond market spreads when measuring the fair value for issued structured notes. The Company considers that this approach most faithfully represents the amount of change in fair value due to both counterparty credit risk and the Company's own credit risk.

The carrying amount of financial liabilities designated at FVPL was €24,104,000 lower than the contractual amount due at maturity (31 December 2023: €24,745,000 lower).

At initial recognition of a specific structured note issuance program, the Company's issuance process, and any planned hedging structure relating to the issuance of those structured notes, has been considered, to determine whether the presentation of fair value changes attributable to credit risk of those structured notes through other comprehensive income would create or enlarge an accounting mismatch in the statement of comprehensive income. If financial instruments, such as prepaid equity securities contracts, derivatives and loans held at FVPL, for which changes in fair value incorporating counterparty credit risk are reflected within the statement of comprehensive income, are traded to economically hedge the structured note issuances in full, the fair value incorporating any counterparty credit risk arising on the hedging instruments may materially offset any changes in the credit risk of these liabilities ("DVA") applied to structured notes, where the counterparties of the hedging instruments are part of the Morgan Stanley Group. In such cases, the DVA of those structured notes is not reflected within other comprehensive income, and instead is presented in the statement of comprehensive income.

The following table presents the change in fair value and the cumulative change recognised in the statement of comprehensive income attributable to own credit risk for issued structured notes and counterparty credit risk for loans.

⁽¹⁾ Other includes structured notes that have coupon or repayment terms linked to the performance of funds, debt securities, currencies or commodities.

The majority of the Company's financial liabilities designated at FVPL provide exposure to an underlying single name equity, an equity index or portfolio of equities. The prepaid equity securities contracts, derivative contracts and loans held at FVPL that the Company enters into in order to hedge the structured notes are valued as detailed in note 3(d) and note 21(a) of the Company's 2023 annual financial statements and have similar valuation inputs to the liabilities they hedge.

12. CONVERTIBLE PREFERRED EQUITY CERTIFICATES

On 30 March 2012, the Company issued 11,252,813 of CPECs of €100 each, classified as financial liabilities at amortised cost. The CPECs were issued to one of the Company's shareholders, Archimedes Investments Coöperatieve U.A. (a Morgan Stanley Group undertaking), in exchange for cash consideration of €1,125,281,000.

The CPECs carry no voting rights. The Company and the holder have the right to convert each issued CPEC into one ordinary share with a nominal value of €100.

On 27 February 2018, the maturity date of the CPECs was amended from 150 years to 49 years from the date of issuance. The CPECs may be redeemed earlier at the option of the Company or on liquidation of the Company.

The CPECs rank ahead of the ordinary shares in the event of liquidation.

The holder of the CPECs is entitled to receive an annual yield on a date agreed by the Company and the holder. The yield for each CPEC is calculated as income deriving from the Company's activities less the necessary amounts to cover the costs of the Company divided by the number of CPECs then in issue. Other income relating to management recharges received from other Morgan Stanley Group undertakings and gains or losses from financial instruments designated or mandatorily at fair value through profit or loss are excluded from the calculation.

On 29 March 2024, the Company paid the accrued yield of €57,555,000 (29 March 2023: €21,870,000) to the holders of the CPECs. An accrued yield for the period ended 30 June 2024 of €28,448,000 has been recognised in the condensed statement of comprehensive income in 'Interest expense' (30 June 2023: €21,136,000). The liability to the holders of the CPECs at 30 June 2024, recognised within 'Trade and other payables', is €14,775,000 (31 December 2023: €43,882,000).

13. SEGMENT REPORTING

Segment information is presented in respect of the Company's business and geographical segments. The business segments and geographical segments are based on the Company's management and internal reporting structure. Transactions between business segments are on normal commercial terms and conditions.

Business segments

Morgan Stanley structures its business segments primarily based upon the nature of the financial products and services provided to customers and Morgan Stanley's internal management structure. The Company's own business segments are consistent with those of Morgan Stanley.

The Company has one reportable business segment, Institutional Securities, which provides financial services to financial institutions. Its business includes the issuance of financial instruments and the hedging of the obligations arising pursuant to such issuances.

Geographical segments

The Company operates in three geographic regions as listed below:

- Europe, Middle East and Africa ("EMEA")
- Americas
- Asia

14. FINANCIAL RISK MANAGEMENT

Risk management procedures

The company's risk management procedures are consistent with those disclosed in the Company's 2023 annual financial statements. This disclosure is limited to quantitative data for each risk category and should be read in conjunction with the risk management procedures detailed in note 19 of the Company's 2023 annual financial statements.

Credit risk

Exposure to credit risk

The maximum exposure to credit risk ('gross credit exposure') of the Company as at 30 June 2024 is disclosed below, based on the carrying amounts of the financial assets which the Company believes are subject to credit risk. The table includes financial instruments subject to ECL and not subject to ECL. Those financial instruments that bear credit risk but are not subject to ECL are subsequently measured at fair value. This table does not include receivables arising from pending securities transactions with market counterparties as credit risk is considered insignificant. Where the Company enters into credit enhancements, including receiving cash and security as collateral and master netting agreements, to manage the credit exposure on these financial instruments the financial effect of the credit enhancements is also disclosed below. The net credit exposure represents the credit exposure remaining after the effect of the credit enhancements.

The Company does not have any significant exposure arising from items not recognised on the condensed statement of financial position.

Maturity analysis

In the following maturity analysis of financial assets and financial liabilities, derivative contracts and other financial instruments held at FVPL are disclosed according to their earliest contractual maturity; all such amounts are presented at their fair value, consistent with how these financial instruments are managed. All other amounts represent undiscounted cash flows receivable and payable by the Company arising from its financial assets and financial liabilities to earliest contractual maturities as at 30 June 2024 and 31 December 2023. Receipts of financial assets and repayments of financial liabilities that are subject to immediate notice are treated as if notice were given immediately and are classified as on demand. This presentation is considered by the Company to appropriately reflect the liquidity risk arising from these financial assets and financial liabilities, presented in a way that is consistent with how the liquidity risk on these financial assets and financial liabilities is managed by the Company.

Market risk

Equity price sensitivity analysis

The sensitivity analysis below is determined based on the exposure to equity price risk at 30 June 2024 and 31 December 2023 respectively.

The market risk related to such equity price risk is measured by estimating the potential reduction in total comprehensive income associated with a 10% decline in the underlying equity price as shown in the table below.

The Company's equity price risk is on equity securities spread across EMEA, Americas and Asia.

The Company enters into the majority of its financial asset transactions with other Morgan Stanley Group undertakings, where both the Company and the other Morgan Stanley Group undertakings are wholly-owned subsidiaries of the same group parent entity, Morgan Stanley.

The issued structured notes expose the Company to the risk of changes in market prices of the underlying securities, interest rate risk and, where denominated in currencies other than Euros, the risk of changes in rates of exchange between the Euro and the other relevant currencies. The Company uses the contracts that it purchases from other Morgan Stanley Group undertakings to hedge the market price, interest rate and foreign currency risks associated with the issuance of the structured notes, consistent with the Company's risk management strategy. As such, the Company is not exposed to any net market risk on these financial instruments.

The net foreign exchange losses recognised in 'Other expense' have arisen as a result of exposure to hedging on assets and liabilities recognised for Morgan Stanley Group purposes, under the Morgan Stanley Group's local reporting requirements.

15. FINANCIAL ASSETS AND FINANCIAL LIABILITIES SUBJECT TO OFFSETTING

In the following table:

- 'Gross amounts' include transactions which are not subject to master netting agreements or collateral agreements or are subject to such agreements, but the Company has not determined the agreements to be legally enforceable.
- 'Amounts not offset in the condensed statement of financial position' are transactions where master netting arrangements and collateral arrangements have been determined by the Company to be legally enforceable, but do not meet all criteria required for net presentation.

c. Changes in Level 3 financial assets and liabilities recognised at fair value on a recurring basis (continued)

During the period, the Company reclassified approximately €7,945,000 net derivative contracts (31 December 2023: €22,995,000) and €40,807,000 of issued structured notes (31 December 2023: €55,170,000) from Level 2 to Level 3. The reclassifications were due to positions where the unobservable inputs are now significant and the lack of observability of the valuation inputs.

During the period, the Company reclassified approximately €4,085,000 of net derivative contracts (31 December 2023: €24,934,000) and €79,397,000 of issued structured notes (31 December 2023: €35,586,000) from Level 3 to Level 2. The reclassifications were due to the unobservable inputs deemed to be no longer significant against the positions valuations.

d. Valuation of Level 3 financial assets and liabilities recognised at fair value on a recurring basis

The following disclosures provide information on the sensitivity of fair value measurements to key inputs and assumptions.

1. Quantitative information about and qualitative sensitivity of significant unobservable inputs.

The following table provides information on the valuation techniques, significant unobservable inputs and their ranges and averages for each material category of assets and liabilities measured at fair value on a recurring basis.

The level of aggregation and breadth of products cause the range of inputs to be wide and not evenly distributed across the inventory. Further, the range of unobservable inputs may differ across firms in the financial services industry because of diversity in the types of products included in each firm's inventory. The following disclosures also include qualitative information on the sensitivity of the fair value measurements to changes in the significant unobservable inputs. There are no predictable relationships between multiple significant unobservable inputs attributable to a given valuation technique. A single amount is disclosed when there is no significant difference between the minimum, maximum and average (weighted average or similar average / median).

2. Sensitivity of fair values to changing significant assumptions to reasonably possible alternatives.

The following table presents the potential impact of both favourable and unfavourable changes, both of which would be reflected in the condensed statement of comprehensive income:

	30 June 2024 ⁽²⁾		31 December 2023 ⁽²⁾	
	Favourable changes €'000	Unfavourable changes €'000	Favourable changes €'000	Unfavourable changes €'000

⁽¹⁾ Net derivative contracts represent trading financial assets – derivative contracts net of trading financial liabilities – derivative contracts. The reasonably possible alternative assumptions are applied to derivative assets and derivative liabilities separately when assessing potential variability of the fair value measurement.

⁽²⁾ The difference between the total favourable and total unfavourable changes is primarily a result of net derivative contracts classified as Level 3 in the fair value hierarchy hedging issued structured notes which can be classified as either Level 2 or Level 3 in the fair value hierarchy.

e. Assets and liabilities measured at fair value on a non-recurring basis

Non-recurring fair value measurements of assets and liabilities are those which are required or permitted in the condensed statement of financial position in particular circumstances. There were no assets or liabilities measured at fair value on a non-recurring basis during the current period or prior year.

17. ASSETS AND LIABILITIES NOT MEASURED AT FAIR VALUE

For all financial instruments not measured at fair value, the carrying amount is considered to be a reasonable approximation of fair value due to the short-term nature of these assets and liabilities.

Regarding the CPECs, their carrying value including the accrued yield in 'Trade and other payables', as detailed in note 10, are considered in aggregate as an approximation of their fair value.

18. EVENTS AFTER THE REPORTING PERIOD

There have been no significant events since the reporting date.

Independent auditor's review report

To the shareholder of Morgan Stanley B.V.

Our conclusion

We have reviewed the condensed company interim financial information for the six-months period ended 30 June 2024 of Morgan Stanley B.V. based in Amsterdam.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information for the six-months period ended 30 June 2024 of Morgan Stanley B.V. is not prepared, in all material respects, in accordance with IAS 34, 'Interim Financial Reporting' as adopted by the European Union.

The interim financial information comprises:

- the condensed balance sheet as at 30 June 2024
- the condensed statement of comprehensive income, condensed statement of changes in equity and condensed statement of cashflows for the period from 1 January 2024 to 30 June 2024; and
- the notes comprising material accounting policy information and other explanatory information.

Basis for our conclusion

We conducted our review in accordance with Dutch law, including the Dutch Standard 2410 (review of interim financial information performed by the independent auditor of the entity). A review of interim financial information in accordance with the Dutch Standard 2410 is a limited assurance engagement. Our responsibilities under this standard are further described in the 'Our responsibilities for the review of the interim financial information' section of our report.

We are independent of Morgan Stanley B.V. in accordance with the Code of Ethics for Professional Accountants, a regulation with respect to independence ("ViO") and other relevant independence regulations in the Netherlands. Furthermore we have complied with the Dutch Code of Ethics ("VGBA").

We believe the assurance evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

Responsibilities of management for the interim financial information

Management is responsible for the preparation of the interim financial information in accordance with IAS 34, 'Interim Financial Reporting' as adopted by the European Union. Furthermore, management is responsible for such internal control as it determines is necessary to enable the preparation of the interim financial information that is free from material misstatement, whether due to fraud or error.

Our responsibilities for the review of the interim financial information

Our responsibility is to plan and perform the review in a manner that allows us to obtain sufficient and appropriate assurance evidence for our conclusion.

The level of assurance obtained in a review engagement is substantially less than the level of assurance obtained in an audit conducted in accordance with the Dutch Standards on Auditing. Accordingly, we do not express an audit opinion.

We have exercised professional judgement and have maintained professional scepticism throughout the review, in accordance with Dutch Standard 2410.

Our review included among others:

- Obtaining an understanding in the entity and its environment, including its internal control, and the applicable financial reporting framework, in order to identify areas in the interim financial information where material misstatements are likely to arise due to fraud or error, designing and performing procedures to address those areas, and obtaining assurance evidence that is sufficient and appropriate to provide a basis for our conclusion;
- Obtaining an understanding of internal control, as it relates to the preparation of interim financial information;
- Making inquiries of management and others within the entity;
- Applying analytical procedures with respect to information included in the interim financial information;
- Obtaining assurance evidence that the interim financial information agrees with or reconciles to the entity's underlying accounting records;
- Evaluating the assurance evidence obtained;
- Considering whether there have been any changes in accounting principles or in the methods of applying them and whether any new transactions have necessitated the application of a new accounting principle;
- Considering whether management has identified all events that may require adjustment to or disclosure in the interim financial information; and
- Considering whether the interim financial information has been prepared in accordance with the applicable financial reporting framework and represents the underlying transactions free from material misstatement.
