Transmittal No. 24-74

Romania – AIM-120 Advanced Medium Range Air-to-Air Missiles

WASHINGTON, August 22, 2024 - The State Department has made a determination approving a possible Foreign Military Sale to the Government of Romania of AIM-120 Advanced Medium Range Air-to-Air Missiles and related equipment for an estimated cost of \$592 million. The Defense Security Cooperation Agency delivered the required certification notifying Congress of this possible sale today.

The Government of Romania has requested to buy up to one hundred eighty-six (186) AIM-120C-8 Advanced Medium Range Air-to-Air Missiles (AMRAAM) and four (4) AIM-120C-8 AMRAAM guidance sections. The following non-MDE items will also be included: AIM-120 Captive Air Training Missiles (CATMs), missile containers, propulsion sections, control sections, telemetry kits, and warhead spares; KGV-135A Cryptographic Devices; Common Munitions Built-In-Test (BIT)/Reprogramming Equipment (CMBREs); ADU-891 Computer Test Set Adapter Groups; spare parts, consumables, accessories, and repair and return support; munitions support and support equipment; classified and unclassified publications and technical documentation; classified and unclassified software delivery and support; warranties; studies and surveys; transportation support; contractor logistics support (CLS); U.S. Government and contractor engineering, technical and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$592 million.

This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the security of a NATO Ally that is an important force for political and economic stability in Europe.

The proposed sale will improve Romania's capability to meet current and future threats by further equipping Romania to conduct self-defense and regional security missions while enhancing interoperability with the United States and other NATO members. Romania already has AMRAAMs in its inventory and will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be RTX Corporation, located in Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Romania.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

The description and dollar value are for the highest estimated quantity and dollar value based on initial requirements. Actual dollar value will be lower depending on final requirements, budget authority, and signed sales agreement(s), if and when concluded.

All questions regarding this proposed Foreign Military Sale should be directed to the State Department's Bureau of Political Military-Affairs, Office of Congressional and Public Affairs, pm-cpa@state.gov.
