

Harris Neck National Wildlife Refuge Hunting Regulations

Welcome

Managed by the U.S. Fish and Wildlife Service, Harris Neck National Wildlife Refuge was established in 1962 by transfer of federal lands formerly managed by the Federal Aviation Administration as a WWII Army Airfield. The refuge's 2,824 acres consist of saltwater marsh, grassland, mixed deciduous woods, and freshwater impoundments. In combination, these habitats support a diversity of wildlife species and provide important sanctuary and nesting areas for resident and migratory birds.

The refuge is part of the National Wildlife Refuge System, a national network of lands and waters managed for the benefit of wildlife and people.
