

Oilseeds: World Markets and Trade

Ukraine Soybean Exports Forecast at Record in 2024/25

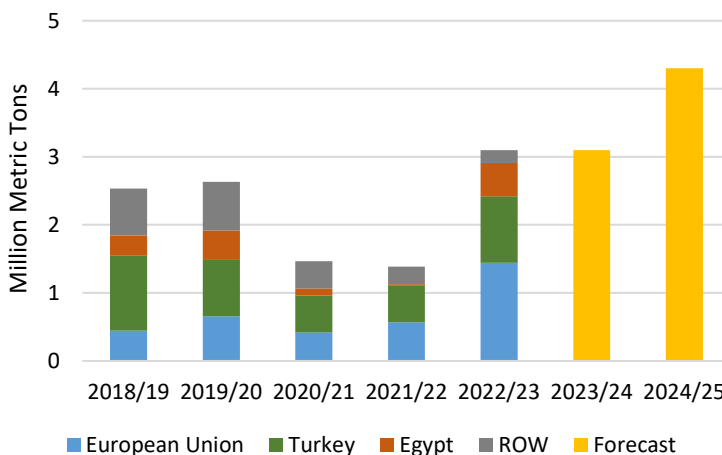

This month, USDA raised 2024/25 Ukraine soybean exports to 4.3 million tons on expectations of higher production. This would mark the third consecutive year of record exports and the second consecutive year of record production. From 2018/19 to 2022/23, Ukraine soybean production averaged around 4.0 million tons. Since, farmers have been dedicating more area to soybeans, which have been more profitable than other crops, resulting in 5.2 million tons produced in 2023/24 and 6.8 million tons expected in 2024/25.

Over half of Ukraine’s soybeans are typically exported, and the share has been growing in recent years as more soybeans ship to regional markets rather than are processed domestically. In 2022/23, Ukraine soybean exports ticked upward, more than doubling to 3.1 million. Ukraine became the sixth largest global exporter of soybeans, a position which it is expected to maintain in 2023/24. During this period, Ukraine became a top supplier to Egypt, which relied on low-price Ukrainian soybeans to satisfy its feed demand. Exports to the European Union also grew significantly, more than doubling to record levels in 2022/23 and continuing to show strength in 2023/24. Turkey, a longstanding destination for Ukrainian soybeans, also saw significant growth in 2022/23.

Top Soybean Exporters excluding Brazil and the United States

Ukraine Soybean Exports by Destination

In 2024/25, Ukraine is expected to become the fifth largest global exporter of soybeans alongside Canada. A record crop will facilitate export growth of nearly 40 percent while still allowing for increased domestic stocking and crush. Ukraine soybeans should remain competitive, especially in the regional markets that have been strong buyers in recent years.

Unseasonably Strong Q4 Canada Rapeseed Exports Exceed Prior Estimate

Strong summer shipments of rapeseed to China raise the 2023/24 Canada rapeseed export estimate by 500,000 tons to 6.9 million.

This unusually large tail for Canada rapeseed exports does not change 2024/25 forecasts for trade and crush in Canada because of large crop prospects.

In 2023/24, Canada crush slowed in June which accompanied strong export sales. This came as rapeseed prices fell steeply in line with higher outyear crop expectations, which made rapeseed increasingly attractive for importers. Bids for export often exceeded bids from crushers in June. These export purchases primarily came from China.

Export changes in 2023/24 for Canada are unlikely to carry through to the 2024/25 forecast for Canada rapeseed. Record-breaking crush on expansions in capacity will reduce exportable rapeseed supply in 2024/25, however Canada is still expected to have the highest rapeseed production in 6 years. This will enable 2024/25 exports to increase year over year to 7.5 million tons.

Canada Rapeseed Exports (Aug-Jul)

Canada Rapeseed Exports (% Total by Quarter)

Canada Rapeseed Exports to China

OVERVIEW 2024/25

The global oilseeds production forecast is raised almost 4.5 million tons to 690.5 million this month on greater soybean production in the United States, Ukraine, Russia, and India, as well as greater rapeseed projections for Russia. These gains are significantly larger than the reductions in sunflowerseed prospects in Europe and the Black Sea regions. Oilseeds trade is up nearly 1.1 million tons on higher soybean exports from the United States, Ukraine, and Russia. Oilseeds ending stocks are forecast at almost 6.3 million tons higher primarily on larger soybean carryout in China and the United States. Global crush is reduced on lower sunflowerseed utilization in Ukraine, Russia, and European Union. Global protein meal trade is lowered almost 300,000 tons on reduced sunflowerseed meal shipments. Global vegetable oil trade is down over 700,000 tons on lower sunflowerseed and palm oil exports.

The projected U.S. season-average farm price for soybeans is down 30 cents to \$10.80 per bushel.

OVERVIEW 2023/24

The global oilseeds production estimate is raised almost 300,000 tons on greater sunflowerseed production in Ukraine, more than offsetting lower soybean crops in Argentina and palm kernel seed in Indonesia. Global oilseeds trade is increased almost 2.7 million tons on greater Brazil soybeans and Canada rapeseed. Global oilseeds ending stocks are raised over 900,000 tons primarily on larger carryout in China. Global oilseeds crush is raised almost 1.1 million tons on greater Ukraine sunflowerseed utilization. Global meal trade is increased almost 100,000 tons with greater soybean meal and sunflowerseed meal trade almost mitigated by lower palm kernel meal trade. Global vegetable oil trade is reduced 200,000 tons on lower Indonesia palm and Canada rapeseed oil, not offset by higher Ukraine sunflowerseed oil.

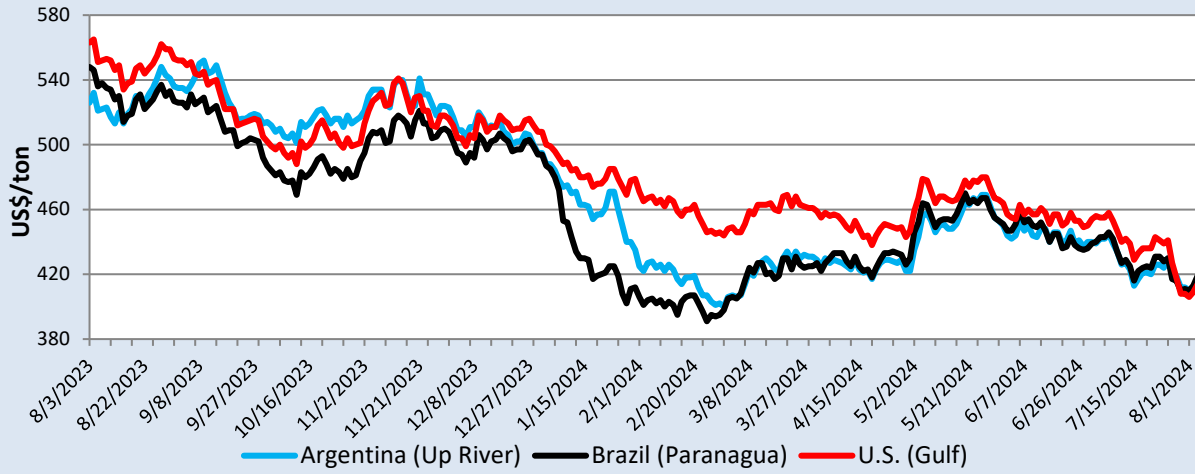

The projected U.S. season-average farm price for soybeans is unchanged at \$12.50 per bushel.

EXPORT PRICES

Favorable weather and crop developments in the United States pressured soybean prices in July. Soybean prices in South America continued to decline on high current year supplies as well as anticipated large output in the Northern Hemisphere in 2024/25.

Global soybean meal prices rallied briefly in July, most likely on strong international import demand and additional 2024/25 export sales announcements in the United States. U.S. soybean oil prices spiked briefly in July before falling to previous levels due to declining domestic supplies of vegetable oils and shifting demand dynamics for biofuel feedstocks. Additionally, a mid-July report from the National Oilseed Processors Association (NOPA) showed soybean oil stocks falling to a 6-month low. Palm oil prices went up following reduced production in Indonesia.

ENDNOTES

REGION DEFINITIONS

North America: Canada, Mexico, the United States

Central America: Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama

Caribbean: Cuba, Dominican Republic, Haiti, Jamaica, Trinidad and Tobago

South America: Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Guyana, Paraguay, Peru, Suriname, Uruguay, Venezuela

EU: Austria, Belgium/Luxembourg, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, and Sweden. Effective January 1, 2021, the separation of the United Kingdom (UK) from the European Union (EU) was complete, including trade between both entities. Starting in May 2021 with the release of 2021/22 data, grain PSDs reflect EU27 (shown in the PSD system as “European Union”) and UK separately. Beginning with the release of 2021/22 data, historical data for both EU27 and the UK are provided for 5 years (2016/17 through 2020/21).

Other Europe: Albania, Bosnia and Herzegovina, Former Yugoslavia, Gibraltar, Iceland, North Macedonia, Montenegro, Norway, Serbia, Switzerland, United Kingdom

Former Soviet Union: Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, Uzbekistan

Middle East: Afghanistan, Bahrain, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, Syria, Turkey, United Arab Emirates, and Yemen

North Africa: Algeria, Egypt, Libya, Morocco, Tunisia

Sub-Saharan Africa: all African countries except North Africa

East Asia: China, Hong Kong, Japan, South Korea, North Korea, Macau, Mongolia, Taiwan

South Asia: Bangladesh, Bhutan, India, Nepal, Pakistan, Sri Lanka

Southeast Asia: Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, Vietnam

Oceania: Australia, Fiji, New Zealand, Papua New Guinea

OTHER NOTES

Marketing Years (MY): MY refers to the 12-month period at the onset of the main harvest, when the crop is marketed (i.e., consumed, traded, or stored). The year first listed begins a country's MY for that commodity (2022/23 starts in 2022); except for oilseeds in certain Southern Hemisphere countries, where the second year begins the MY (2022/23 starts in 2023). For a complete list of local marketing years, please see the FAS website (<https://apps.fas.usda.gov/psdonline/>): go to Reports, Reference Data, and then Data Availability.

Stocks: Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

Consumption: World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in local marketing year imports and local marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

Trade: All PSD tables are balanced on the different local marketing years.
