Lease Rental Income Drives Revenue

Lease rental income drives total revenues and other income

Depreciation of aircraft and financing costs are key costs¹

Notes:
 1. Excluding the reversal of impairment loss in 1H 2024, aircraft costs, finance expenses, other fixed costs and other variable costs would account for 48%, 43%, 5% and 4% of total costs, respectively
 2. Comprises aircraft depreciation and impairment charges (includes the reversal of impairment loss of US\$175 million in respect of two aircraft in 1H 2024)

Long-Term Leases A Key Feature of the Company

A long average remaining lease term¹

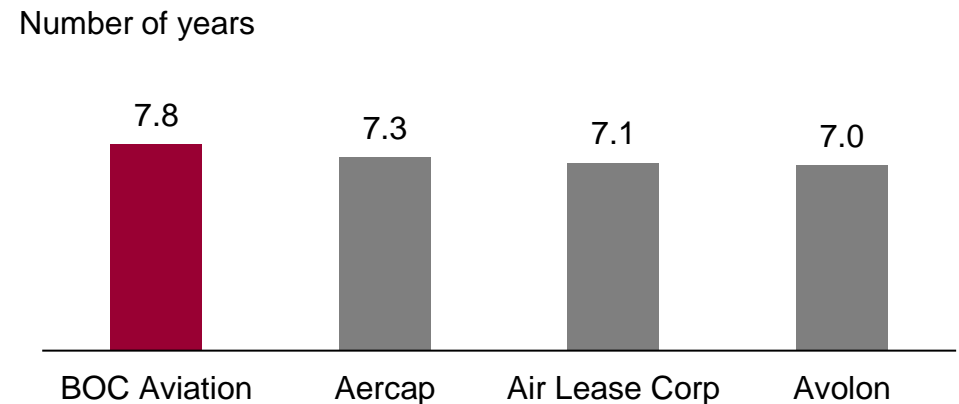

High future committed operating lease revenue

Well-dispersed scheduled lease expiries²

Industry-leading average remaining lease term³

Notes:

1. Weighted by net book value of owned fleet and finance lease receivables in respect of aircraft on finance leases
2. Owned aircraft with leases expiring in each calendar year, weighted by net book value including finance lease receivables in respect of aircraft on finance leases, as at 30 September 2024
3. Updated as at 30 September 2024 for all except for Avolon, which was as at 30 June 2024

Stable Net Lease Yield Despite Rising Cost of Debt

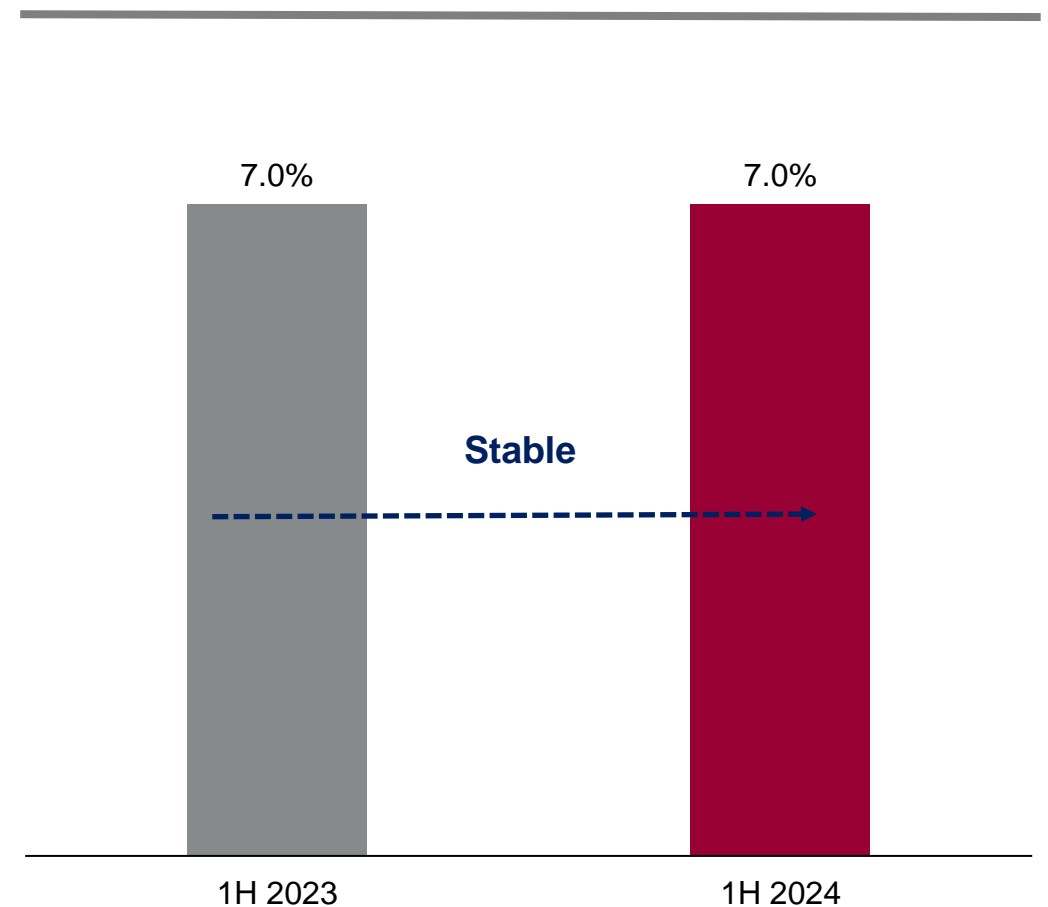

Operating lease rate factor¹

Cost of debt²

Net operating lease yield³

Notes:

1. Calculated as annualised operating lease rental income divided by the average of aircraft net book value
2. Calculated as the sum of finance expenses and capitalised interest, divided by average total indebtedness. Total indebtedness represents loans and borrowings before adjustments for deferred debt issue costs, fair values, revaluations and discounts/premiums on medium term notes
3. Calculated as annualised operating lease rental income less finance expenses apportioned to operating lease rental income, divided by the average of aircraft net book value
