Product Updates

MVE is currently integrated with three leading SD-WAN service providers. Megaport is currently integrating three additional SD-WAN providers and is working on growing its ecosystem of partners that will host additional service functionality across MVE.

Demand for 100 Gbps customer access ports has steadily increased as customers utilise Megaport's carrier-grade backbone for critical connectivity services. In response, the Company is positioning additional port inventory to stay ahead of demand. Megaport accelerated deployment of 100 Gbps port speeds for direct customer consumption with availability in 64 sites across our network in all three regions.

Adoption of MCR continues to accelerate with 80 having been sold in the quarter, up 19% QoQ. At quarter end, 12% of customers use this product, up 1% QoQ. This is driven by an increase in multi-cloud adoption and highlights the increasing need for point-and-click control of data networking for localisation, cloud-to-cloud interconnection, and performance improvement.

4Q FY21 Cash Flow Commentary

Operating Activities

Net cash outflow from operations for the Quarter was \$202K in 4Q compared to a cash outflow of \$4.9M in the prior Quarter, an improvement of ~\$5M. Excluding annual insurance premium payments in Q3 of \$2.3M, the operating cash outflow has improved by \$2.4M QoQ. The operating Cash flow reflects the Group's progress in achieving EBITDA break even on a run rate basis in June 2021.

Receipts from customers were \$23.2M (previous quarter: \$20.2M), an increase of \$3.0M or 15% QoQ. The collections and aging quality has continued to improve and the DSO remains stable QoQ at 25 days, implying that the Debtor balance as at June was less than a month's worth of revenue.

Product manufacturing and operating costs comprise costs for data centre power and space, physical cross connect fees, bandwidth and dark fibre, network operation and maintenance, and channel commissions which directly relate to generating service revenue. Network operating cash outflows were \$8.4M (previous quarter: \$8.7M), a decrease of \$0.3M, or 4% QoQ. The decrease is primarily due to cost savings initiatives in the year that have resulted in ~\$1.6M in savings in 4Q compared to ~\$0.9M in 3Q, an increase in saving of \$0.7M QoQ, partly offset by network expansion costs. Installed Data Centers count was 405, an increase of 15 QoQ.

Advertising and marketing payments were \$1.2M (previous quarter: \$0.3M), an increase of \$0.9M QoQ. Payments in 4Q mainly relate to the build of the Channel (indirect sales) program. Conference activities and related travel expenditure remains limited due to the impact of Covid-19.

Payments for leased assets were \$1.9M (previous quarter \$1.4M), an increase of \$0.5M or 36% QoQ with new leases related to network and operational expansion. This represents the principal and interest cash outflows related to the contracts that are classified as "Leases" under AASB 16 Leases.

Staff costs paid were \$9.4M (previous quarter: \$9.8M), a decrease of \$0.4M or 4% QoQ. Headcount increased by a net of 20 QoQ, with an impact of about \$0.4M QoQ. The reduction in staff related payments is attributed to a higher number of staff involved in new products and site development resulting in a slightly higher capitalisation of staff costs.

Administration and corporate payments were \$1.9M (previous quarter: \$4.3M), a decrease of \$2.3M or 55% QoQ. 3Q included an annual insurance prepayment of \$2.3M.

Investing Activities

Capital expenditure was \$4.7M (previous quarter: \$2.8M), an increase of \$1.8M or 64% QoQ. \$1.1M of this quarter's payments relate to core and capacity upgrades of existing network, of which \$0.2M is related to the MVE platform, \$1.1M vendor financed equipment purchases and \$0.9M on new sites under development. The remainder relates to inventory purchases for future expansion.

Investment in intellectual property was \$1.9M (previous quarter: \$1.7M), an increase of \$0.2M or 16% QoQ. 4Q spend mainly relates to further development of the MVE platform for integration with additional SDWAN partners and localisation of the Megaport Partner portal to further support sales and customer experience in the many countries that Megaport operates in.

Financing Activities

Proceeds from the exercise of options of \$1.0M (previous quarter: \$5.6M) represent the exercise of share options by employees.

Repayments on borrowings was \$1.0M (previous quarter: \$1.0M), reflecting the instalment payments of the amount drawn under the vendor financing facility (refer to Item 7 below for more details). \$4.8M of the \$20M vendor financing facility was undrawn at the end of the quarter.

Cash Position

Cash and bank balances at the end of the quarter were \$136.3M.

Payments to related parties of the entity and their associates

The amounts included in item 6 relate to the remuneration of directors and their associates, and the shared services and network operating services provided by companies controlled by or associated with the Chairman.
