

Agenda for this evening

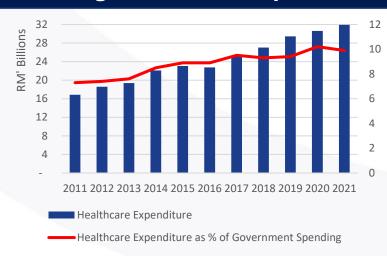

No.	Item
1	Malaysian Healthcare Market Outlook
2	2Q 2022 Results Overview
3	Strategic Direction of the Group
4	Key Financial Highlights
5	Key Operational Highlights
6	2Q 2022 Events and CSR Initiatives

The healthcare industry outlook remains to be resilient as the globe enters economic recovery

Growing Healthcare Expenditure

- The Government has allocated RM32.4 billion for the healthcare industry in Budget 2022
- The Health Ministry of Malaysia is looking to secure 5% of the country's gross domestic product to upgrade the country's public healthcare and ensure that it has a world-class standard healthcare system in the future

Health Tourism Recovery

- With the gradual resumption of international travel, Malaysia's medical tourism is expected to grow by the end of 2022 as demand recovers
- In 2019, Malaysia attracted 1.3 million international healthcare tourists with a total of MYR 1.7 billion (approx.US\$400 million) in hospital receipts.
- The government targets a rebound of revenue up to MYR 800 million (US\$190 million) in 2022 and MYR 1.7 billion (US\$400 million) in 2025 from the country's medical tourism sector through initiatives outlined under the recently unveiled Malaysian Healthcare Travel Industry Blueprint 2021-2025

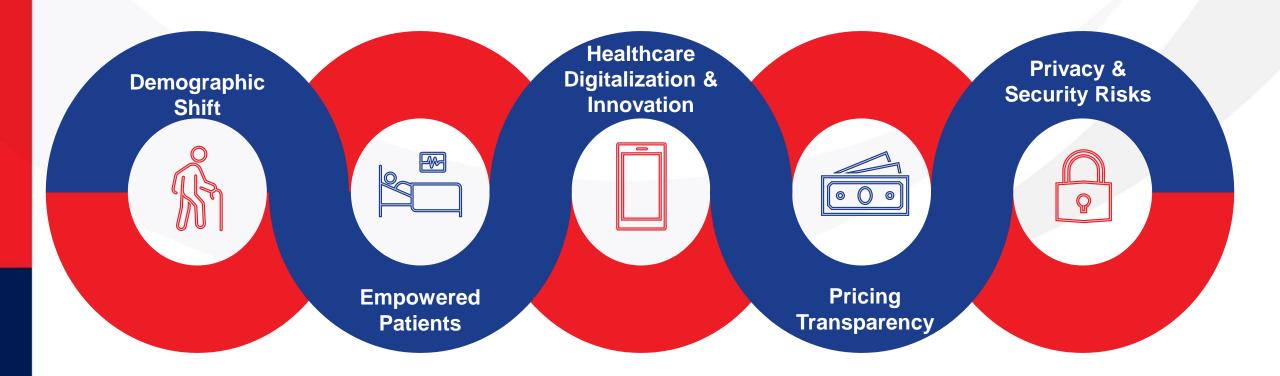

Inflation Buffers Intact

- According to Aon's 2022 Global Medical Trend Rates report, the current medical inflation rate in Malaysia is 12.0%, which is 6 times higher than the annual general inflation rate
- High medical inflation is contributed by Non-Communal Disease (NCD) prevalence, an ageing population, advances in medical treatment, ringgit depreciation
- Substantial pricing power is critical in helping healthcare players better weather through this high inflationary period
- Inelastic demand for healthcare, which gives hospital operators substantial pricing power

Megatrends in Healthcare

Improved overall performance compared to Q2 FY21 backed by higher bed occupancy rates ("BOR") and inpatient visitations

Our focus is to execute the three strategic thrusts of the KPJ Transformation Programme

Care for Life

Strengthening the Core

Achieve Operational Excellence and Active Portfolio Management

Patient and Customer Care

Clinical excellence that drives patient safety and quality

Service quality excellence that connects our employees to "Care for Life"

Relentless Growth

Business model optimisation and growing in new business area

Digital Transformation

Roadmap to create a seamless patient experience

Change Management

Engaging key stakeholders

People & Culture

Empowering people to drive transformation

Sustainability

Championing Sustainability in Healthcare

We aim to improve the Group's financial performance by taking action on nonperforming assets

Turnaround Underperforming Malaysian Based Hospitals

Recruit more Consultants and Manpower

Strengthen Insurance Panelship across all 29 hospitals

Improve and achieve internal operational efficiencies

KPJ Indonesia 2 Private Hospital

At the heart of our business is our patients where we strive to provide excellence across clinical and service quality

Care for Life

Develop a structured pathway to reach patient-centered excellence and drive patient safety and clinical quality

Key Objectives

Building trust and confidence within the community by partnering with patients and families

Attract & Retain the right talent - doctors, nurses, employees

Create a **safety first environment** with greater emphasis on reducing patient harm (i.e. falls) and increasing safety in using medication

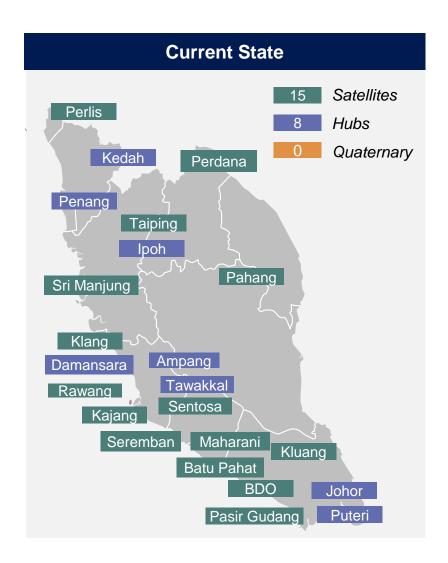

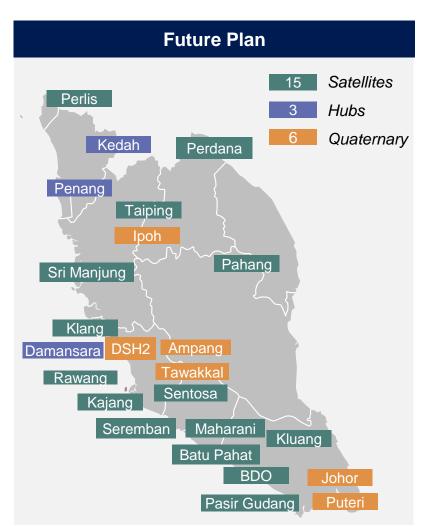

Improve **effective and open communication** by creating a system that will encourage patients and families to communicate any concerns

To enhance our business model, we aim to establish 6 Quaternary Care Hubs and launch COE's

Establishment Of Centres of Excellence (COEs) within Hubs and Quaternaries with a focus on the following specialties in 2022:

Stroke Centre in KPJ Damansara

Cardiology Centre in KPJ Ampang Puteri

- Other COEs in the pipeline are planned for 2023 and beyond
- Quaternary care hospitals will allow for:
 - Greater revenue intensity by provision of specialized and higher value services
 - Better patient referrals within the KPJ network
 - Reduced investments costs through a centralized approach

We have identified new growth areas within the healthcare value chain to expand accessibility within the community...

Referral done to Post Care facility for chronic diabetic disease, stroke, rehab etc

Referral done to KPJ hospital for tertiary care

Pre-Care

- Screening
- Family Medicine

KPJ Hospital

Admission

Post Care

- Assisted Living Care
- Rehabilitation

Referral done to KPJ hospital for follow up care

Refer to Pre-Care to save patients from travelling

... which will be supported by an expansion of our Ambulatory Care Centers (ACC) after a successful pilot in Bandar Kinrara

Pre-Care

Sub-urban areas within KPJ Hospital vicinity

Post-Care

Urban areas to tap referrals from all public and private hospitalsm

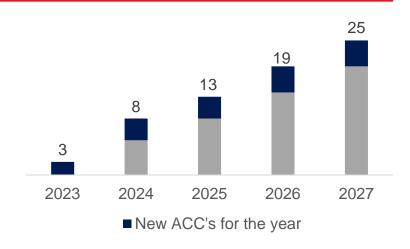

Eye-Care

Targeted area dependant on local market and competition

Development of 25 New ACC's by 2027

Synergies

- Feeder for KPJ hospitals:
 - Primary & Secondary care at Pre-Care model
 - Referral to KPJ hospitals for tertiary care
 - Direct referral to Post-Care
- Free up hospital space for other high value services
- New markets Underserved market between GPs and hospitals

Healthcare tourism (HT) remains to be a key growth area due to its promising outlook post-pandemic

As global travel returns back to normal, we have seen strong growth within the HT space

Seen strong growth within the fire space								
Country	2022	2021	2021 Growt					
Indonesia	4,936	1,264	291%					
Bangladesh	543	472	15%					
India	482	543	(11%)					
China	304	273	11%					
Myanmar	284	193	47%					
Yemen	236	213	11%					
Somalia	225	144	56%					
Korea, republic of	198	136	46%					
Libya	189	115	64%					
Singapore	161	32	403%					

This in turn will drive greater revenue intensity with the following key principles

- Leverage KPJ's strength as the largest healthcare group in Malaysia, with presence throughout Malaysia
- Provide specialist services and quaternary care through Super Hubs
- Focus on the top countries from Malaysia Healthcare Tourism Council **MHTC**
- Establish Health Tourism ecosystem across the Health Tourism value chain

We have established contact with the following partners in Indonesia to support growth from Healthcare Tourism

EUROPEISKA SERV EUROPÆISKE EUROPÆISKE

Our new flagship quaternary level smart hospital boasts a comprehensive range of services by leveraging on IoT and AI Technology has obtained CKAPs approval and will be launching in Q3 2022

"Our drive to enhance our customers' experiences through technological innovations, improved clinical processes, and management systems will further bolster our vision to become the preferred healthcare provider, delivering quality health treatment, care, and diagnosis to every single person who steps through our doors, here at Damansara Specialist Hospital 2 (DSH2)."

QUATERNARY HOSPITAL

TECHNOLOGY DRIVEN – SMART HOSPITAL

INTERNATIONAL AFFILIATIONS

INTERNATIONAL ACCREDITATION

DSH2 is focused on creating seamless patient experiences by developing an integrated digital ecosystem – a key effort towards becoming a "Smart Hospital"

Implementation of a New Health Information System (nHIS) as a core system will be rolled out across 29 KPJ Hospitals over the next several years, where **Damansara Specialist**Hospital 2 will be the first pilot

Centralisation of data

Capability to perform thorough analysis and determine best clinical outcome of patient's treatment

2

Tailored services

Holistic view of patient data can provide opportunity to develop best packages for prevention and treatment

3

Setup for Smart Hospital

Master patient data enables opportunities for virtual health as well as for patient to view billing through mobile app

Additionally, the following digital initiatives are on-going across the group to enhance customer experience

eGuarantee Letter and eBilling

- Improve admission and discharge turnaround by 83% from > 3Hrs to < 30 mins
- Improve GL approval and billing accuracy

Bill Estimator

- Improve on accuracy of bill estimation for patients
- Provide transparency to Payor

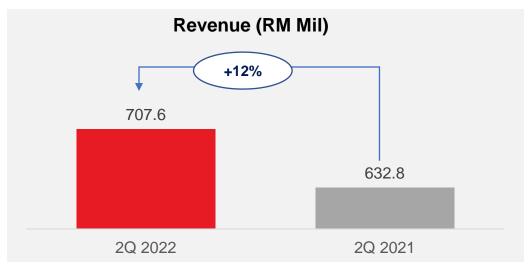

Patient Hi-Story

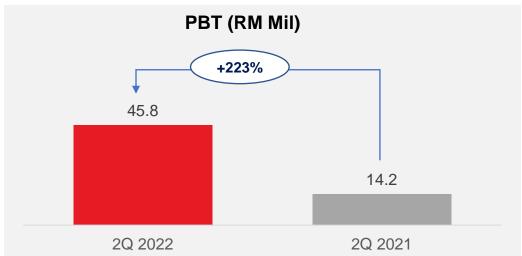

- Provide patient
 with convenient
 access to medical
 records
- Ease of referrals and collaboration

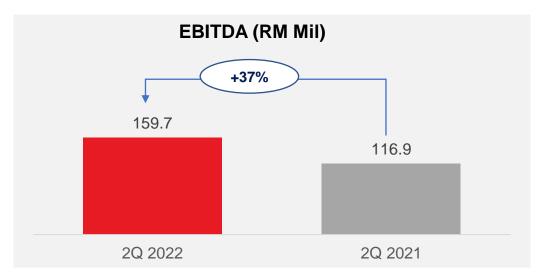

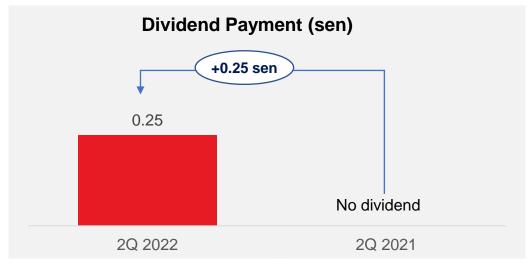

2Q 2022 Performance Up On Higher Utilisation and Hospital Activity

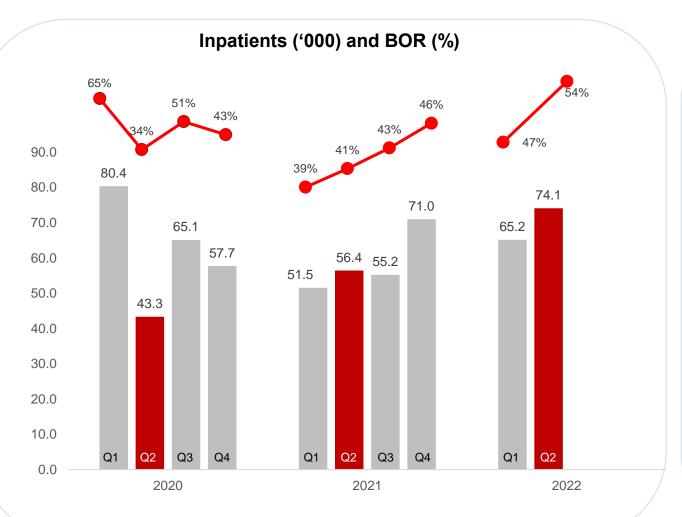

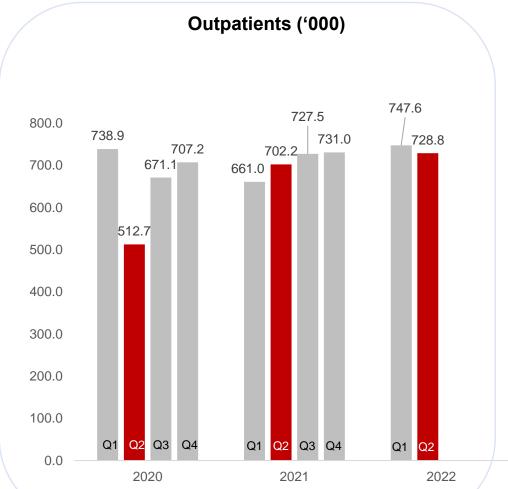

Hospital visitations trending upwards towards pre-pandemic utilisation

Other operational measures show improved bed occupancy rate and inpatient visits
