## Siemens launches selector application for protection devices

- **App available for laptop, tablet or mobile phone to simplify transition to the newest technology**
- **Accessible anytime and anywhere**
- **Direct access to online configurator and online purchasing**

Siemens Smart Infrastructure has launched its new selector application for protection devices as part of the service portfolio for energy automation and protection. The Easy Relay Retrofit Selector Application makes it easy for users to select a protection legacy device or 3rd. party equipment for a new device or retrofit service. The app supports all verticals in which protection devices are installed. The simple operation does not require any expert knowledge on protection technology.

The new web-based app is available for laptop, tablet or mobile phones. With the user-friendly selector, customers can quickly compare different protection devices and check if they are correct, based on their current needs. The app is accessible anytime and anywhere worldwide, enabling customers to directly access the online configurator and ordering system.

“With this new app we are addressing the needs of our customers to help them easily identify, compare, configure and order our recommended technology. This means that you are ideally equipped to tackle the current and future challenges in substation automation systems,” says Robert Klaffus, CEO Digital Grid at Siemens Smart Infrastructure.

**Siemens Smart Infrastructure (SI)** is shaping the market for intelligent, adaptive infrastructure for today and the future. It addresses the pressing challenges of urbanization and climate change by connecting energy systems, buildings and industries. SI provides customers with a comprehensive end-to-end portfolio from a single source – with products, systems, solutions and services from the point of power generation all the way to consumption. With an increasingly digitalized ecosystem, it helps customers thrive and communities progress while contributing toward protecting the planet. Siemens Smart Infrastructure has its global headquarters in Zug, Switzerland. As of September 30, 2021, the business had around 70,400 employees worldwide.

**Siemens AG** (Berlin and Munich) is a technology company focused on industry, infrastructure, transport, and healthcare. From more resource-efficient factories, resilient supply chains, and smarter buildings and grids, to cleaner and more comfortable transportation as well as advanced healthcare, the company creates technology with purpose adding real value for customers. By combining the real and the digital worlds, Siemens empowers its customers to transform their industries and markets, helping them to transform the everyday for billions of people. Siemens also owns a majority stake in the publicly listed company Siemens Healthineers, a globally leading medical technology provider shaping the future of healthcare. In addition, Siemens holds a minority stake in Siemens Energy, a global leader in the transmission and generation of electrical power.

In fiscal 2021, which ended on September 30, 2021, the Siemens Group generated revenue of €62.3 billion and net income of €6.7 billion. As of September 30, 2021, the company had around 303,000 employees worldwide. Further information is available on the Internet at [www.siemens.com](http://www.siemens.com).
